Recognize Unalienable Rights

Fiat Money, Unalienable Rights and Sustainable Development

A. Intro –

1. Understanding fiat money makes the understanding of Sustainable Development compelling and necessary.

This is because today's fiat money system HAS been used to corrupt our law and destroy the American essence of individual liberty and equal justice.

Fiat money is created by a narrow cadre of globalist bankers that seek a new World order. Fiat money is created out of thin air.

The fiat system is based on debt. We owe and they are owed.

With the power they accrue, a plan has been launched to reorganize all aspects of human life. That plan is called Agenda 21 or Sustainable Development. It is a U.N. program, agreed to by 178 nations, that is designed to create a world order where human beings are regarded as biological resources. The evolving system does not recognize unalienable rights.

With America under this assault, the study of Sustainable Development and the Sustainable Development ACTION PLAN requires a time sensitive analysis. It requires that we reassert the foundations of freedom – NOW!

A note for today: When I refer to Sustainable Development I may use other terms that all mean the same thing. These terms include; *Agenda 21, Sustainable Development, Sustainability, Sustainable Action Plans, Visions, or Global to Local.* They all refer to America's commitment to United Nations' "Agenda 21" policies.

Agenda 21 is a document that reveals a program designed to eliminate national and individual sovereignty, reduce population and control all human activity in the name of the environment through Sustainable Development.

Fiat money is the engine and Agenda 21 Sustainable Development is the blueprint for a "new world order."

The heightened awareness related to monetary reality, makes even more relevant the understanding of the power, the goals, and the methodology of the globalist Sustainable ACTION Plan.

The understanding of the ACTION PLAN makes possible an informed citizen response.

Let's prepare ourselves.

2. The work accomplished at Freedom 21 and many of its sponsoring organizations has provided all of us a body of knowledge that reports on and assesses the political globalist phenomenon of Agenda 21 Sustainable Development.

Thanks to Henry Lamb for his ground breaking work including covering the U.N. conferences that unleashed Agenda 21, his writings and information and his creation of this organization;

To Michael Coffman for his game saving work on planting the seeds of understanding on the attack on private property ownership and also his timely work on exposing the global warming scam; and

Tom DeWeese on getting the information on Sustainable Development coordinated, communicated and distributed.

And to many others who have been shedding light on the thousand points of darkness. These points are contrived to contribute to the creation of global governance through the execution of Agenda 21 Sustainable Development policies.

3. Throughout this presentation, I will describe and illustrate the philosophy and policy of Agenda 21 Sustainable Development.

Summarily Sustainable Development is designed:

- a. To abolish private property.
- b. To *neutralize* the Judeo-Christian ethic that our Creator imbued man with certain unalienable rights including the right to life, liberty and property.
- c. To de-industrialize and/or de-populate the planet.

4. We are reminded that EVERYTHING HAS ITS PRICE: A world wide system of fiat money is the necessary precursor to launching the Agenda 21 Sustainable Development blueprint. This blueprint consists of 'global to local' programs that cost money. The programs are designed to usher in World Governance, and World Governance means that we will live in a system devoid of the political recognition of unalienable rights.

What are unalienable rights?

I'm going to trace some history regarding the definition of unalienable rights. To set the stage let's look at the governing documents for the U.S.A. and for the U.N.

Unalienable or Inalienable?

Document:	Declaration of Independence:	Declaration of Human Rights:
relevant language:	..."all men are created equal and they are endowed by their creator with certain unalienable Rights, that among these are Life liberty and the pursuit of Happiness."	"Whereas recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world." "These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations."
Purpose of government	Government exists to protect the natural rights of the individual.	Government exists to manage mankind. All rights are subordinate. No right is permanent.

Let's look further into the meaning of unalienable and inalienable? I am going to refer to Webster's 1828 dictionary and compare it with Webster's 1988 unabridged dictionary:

Pursuit of Liberty or Orwellian reality

	Unalienable Rights	Inalienable Rights
1828 Webster's Dictionary	"not alienable; that cannot be alienated; that may not be transferred; as in unalienable rights"	"can not be legally or justly alienated or transferred to another"
Foundation	Imbued within our nature granted by our Creator natural rights	Man made law (as such they may be revoked)
Permanence	Can be suppressed but cannot be eliminated from human spirit	Right exists subject to the most recent making of law

The political recognition of Unalienable Rights is why the founding of America is mankind's greatest achievement

Today's dictionary defines unalienable exactly as it defines "inalienable" was defined in 1828. In other words, "Unalienable" is no longer defined as it was in the time of Thomas Jefferson. Orwell forecast this morphing of meaning.

George Orwell, in his classic *1984* described the role of dictionary evolution in the takedown of mankind.

B. What is Sustainable Development? The Power, Goals and Methodology

1. The Power

Sustainable Development is a global Action Plan comprised of 178 governments and their agencies, most well funded think tanks, multi-national corporations, most political parties throughout the world, major media, academia and non-elected councils called Non-Government Organizations or NGOs.

How can that be?

The structural element underlying Sustainable Development rests on the concentration of power and influence, which is fueled and directed by contemporary fiat money.

This story begins with the creation of a monetary system that was originated in the mid 1700's in order to control the making of law (quote Rothschild). This monetary system is designed over time to centralize all power in the world.

Tremendous advances toward these objectives have been made. George Bush I called the result of these advances "The New World Order."

The Sustainable Action Plan is designed to achieve the philosophical, economic, and spiritual objectives of this 'new world order.' The Action Plan implements a 'global to local' program that is now infused into every county in America. This infusion is designed to lead us into a new world full of top down, TOTAL, control.

Sustainable Development, as a formal and announced movement, was given birth by the United Nations in 1992. Implementation is overseen by globalist front groups such as the World Bank, The World Health Organization, The World Trade Organization, the European Union, NATO, Security and Prosperity Partnership of North America, Codex Alimentarius, and a whole lot more.

2. The Goals

The Action Plan process has, at its root, three objectives:

- a. The abolition of private property.

The United Nations and Land

“Private land ownership is also a principle instrument of accumulation and concentration of wealth and therefore contributes to social injustice... Public control of land use is therefore indispensable”

**United Nations “Habitat 1 Conference Report
1976**

Copyright FreedomAdvocates.org

13

Maurice Strong, Secretary General of the 1992 UN Conference responsible for issuing Agenda 21 said: “...current lifestyles and consumption patterns of the affluent middle class - involving high meat intake, use of fossil fuels, appliances, home and work air conditioning, and suburban housing are not sustainable.”

- b. Education for global citizenship achieved through the International Baccalaureate or No Child Left Behind programs. Michael Chapman adeptly describes how the federal Department of Education job is to assess, monitor and control us from cradle to grave.
- c. Control over humanity. (Page 773 introduced by the three documents)

Under Sustainable Development philosophy we and our posterity become chattel of the ruling elite.

The policies of Sustainable Development are weighing upon us as contemporary middle class society begins to sink. Now we have been promised more of this “change.”

We see examples of Sustainable Development's thousand points of darkness...

- A U.S. budgetary mess
- Global U.S. military adventures
- Raising domestic surveillance
- A shrinking middle class
- An attack on monotheism
- An attack on family autonomy
- The loss of borders
- The debasement of our currency
- A congress convinced that it holds unlimited powers
- An educational system that is destroying the prospects for the next generation through its indoctrination of attitudes, values and beliefs
- Smart growth designed stack 'em and pack 'em housing
- The manipulation and withdrawal of our natural resources from our access
- The culture of nihilism...
- Implementation of the all Seeing Eye – as we form a surveillance society
- And so much more – truly, a thousand points of darkness...

3. Methodology

We must learn to recognize Sustainable methodology or we are doomed.

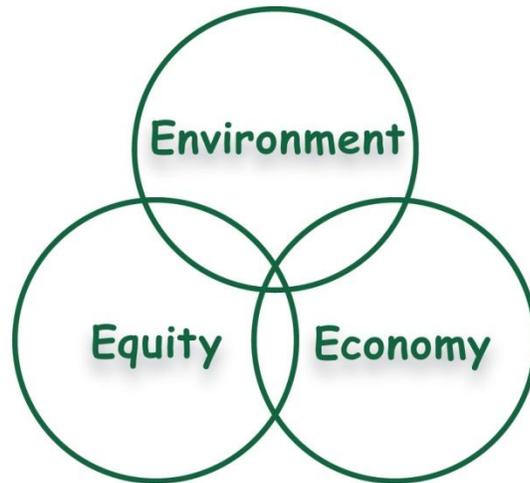

Sustainable methodology can be summarized in four points:

- a. Land use controls

Biodiversity and Wildlands Project - USA

- i. The Wildlands Project
 - ii. Smart Growth
- b. Educational transformation for the creation of “global citizens”
- c. Described as the Three E’s of Sustainable Development – Let me elaborate...

SUSTAINABLE DEVELOPMENT

FREEDOM ADVOCATES.ORG
Recognize Unalienable Rights

4. The Reduction of human population.

C. What can we expect from the fiat money engineered, global Sustainable attack – preparing for the worst

The course of fiat money always ends in destruction usually via inflation... The coming dollar destruction – How fiat money is destroyed; we have been set up! – Roosevelt and Nixon, both parties etc. Why?

1. Watching the destruction of the dollar –

The recent, massive, bailouts are expressions of favoritism (redistribution) to Wall Street and other insiders. The printing press is in overdrive. This brings great risk of massive inflation and devaluation. Perhaps even destruction of the dollar.

- One becomes focused when one begins to recognize the massive scale of manipulation over finance, industry and government made possible with fiat money. We have now seen reckless money printing in the last year. Soon we will feel its inflationary effects.
- This power to manipulate is controlled by the concentrated few operating in this coordinated global fiat money system.
- The restructure of our society – the promised “change” is designed to take control of you – your life, your liberty and your property.
- Add effect on human psyche, fiat money and its destruction...

We are likely to encounter traps and barricades as we work to restore liberty in America. Be ready.

2. Maintain your confidence!

Do not shun the viability of today’s fiat dollar. Prepare for its decline but use it and value it. Treat this funny fiat dollar with respect until it is substituted.

Do not give the system an opportunity to blame the crash on *our* lack of “faith.”

We *want* an honest monetary system that supports a free society. Our goal is *not* to crash the funny money fiat dollar.

Read and listen to Jefferson, Jackson and..., and Griffin.

- Our legislators should not worsen the devaluation threat by committing to additional printing.
- Nor should growing citizen hardship be compounded by having to maintain the tax costs of what has become the *extraordinary* scope and *outrageous* cost of government.
- Return America to its principle of governance: “of, by and for the people;” pursued in the recognition of *every* individual’s *unalienable rights*. Reinstitute the **limited** scope of legitimate government.

Demand the globalist, anti American, pro-internationalist banking cartel, that includes the American Federal Reserve, be prevented from earning taxpayer funded interest payments.

An interim fiat system run by the Treasury, subject to annual limits on the creation of new money, should replace the Federal Reserve.

Big problems would remain in such a monetary system – but two goals in the fight for human freedom would be achieved!

- Globalist banking would be defrocked of a huge hunk of income, and
- The American branch of the globalist banking machine destroyed!

Central economic power, generated through the fiat money system is and has been used to support the political, financial and academic rush to globalism arranged via the Action Plan of Sustainable Development.

Watch out for a gold backed system. Who do you think controls a quorum on gold after 250 years of literally “making money out of thin air?” Just perhaps the banking cartel and its partners do! America’s political and financial structures can only be rectified if we take cognition of reality.

3. The effect of the dollar’s destruction –
Would destruction become the excuse needed for the existing American Soviet to finalize the collectivization of America? Obama is the current political leader working to make that delivery, which was well set up for him by George Bush, Clinton and Bush 1. Both parties are committed to the global implementation of Agenda 21 Sustainable Development. The evidence of this is clear. We **are** in trouble!

A coup has been launched without firing a shot!

4. How to prepare:
 - 1) Barter
 - 2) Debt
 - 3) Food preparations
 - 4) Find others

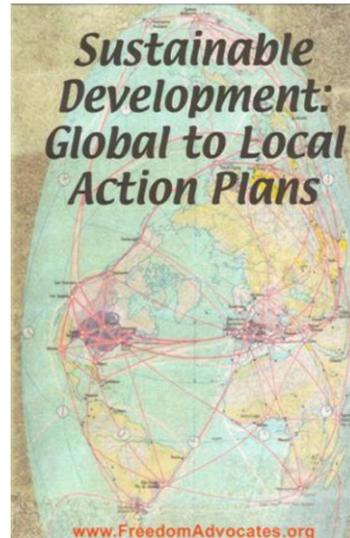

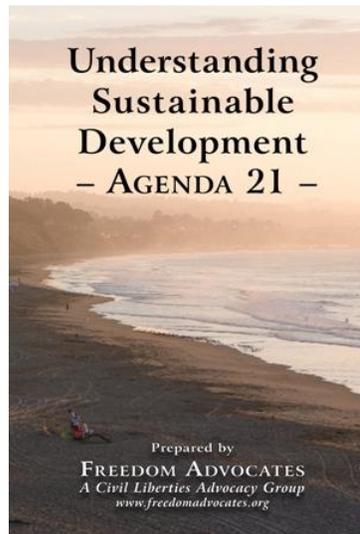

Once you are prepared, you can help work to restore the American experiment by exposing the global nature and stopping the local application of Sustainable Development.

Sustainable Development is the destruction of the American Republic and of human freedom.

5. When battling: Be *for* something – Understand liberty and its corollary – the political recognition of unalienable rights. Use the philosophy of freedom as your foundation for the political war we have been thrust into.

D. How does a Person Committed to Liberty Proceed?

Freedom Advocates Products

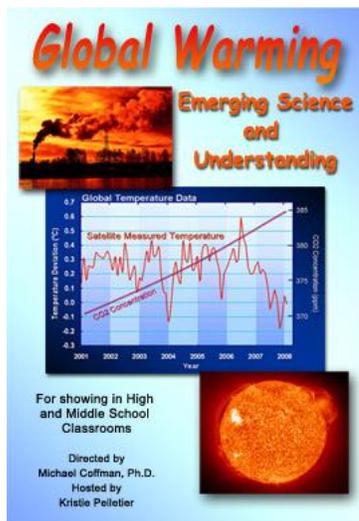

Copyright FreedomAdvocates.org

5

- First *Understand Sustainable Development* – attendance here, pamphlets from FA, etc. and then...
 - i. Become active locally; Examine your Local Situation
 1. Understand property and fiscal issues relating to Smart Growth and/or the Wildlands Project; Understand that private property is being abolished through rules, regulations, Court decisions. Educational systems ignore the matter and in fact fuel the intellectual failure in this regard.

Understand how the Global Warming fraud fuels the land use grab often coordinated by an NGO called ICLEI.

Produced by
Michael Coffman, Ph.D.

Copyright FreedomAdvocates.org

8

2. Understand the step by step process under Agenda 21, of abolishing private property.
3. Recognize that one's life and liberty cannot be one's own without private property being *protected* by government. Examine government, including the courts, from that perspective.
4. Sustainable Developers, like The Nature Conservancy, conspire to steal property. The Nature Conservancy is a Public-Private Partner designed to assist the abolition of private property and the implementation of the Wildlands Project.
5. Share the information, knowing that the issue is not left or right, liberal or conservative, or this or that political party.
The real battle is between:
 - 1) The forces of central ('global to local') world government, including the vast majority of elected officials, and
 - 2) The people of America, charged with their duty to posterity, while living with the hope of salvaging their own freedom.
6. Identify the NGOs, federal agencies, and local change agents who pursue sustainable objectives in your town – Understand their programs and goals.

ICLEI - Local Governments for Sustainability is an example of an NGO: describe, point out global warming connection.

ICLEI

- ICLEI is the international environmental agency for local governments
- ICLEI's mission is to build and serve a worldwide movement of local governments to achieve tangible improvements in global environmental and sustainable development...
 - www.iclei.org

If ICLEI coordinates your local government's Sustainable Development Action Plan, track Freedom Advocates as we monitor this issue.

Put ICLEI under attack in your town. These counter-attacks on globalism will accelerate if you and your community get involved.

ICLEI now has a contract with over 500 American governments.

This ad is now running in Santa Cruz County:

All of this and higher taxes to fund favored businesses and bureaucratic controls!

ICLEI is directing local policies that cause:

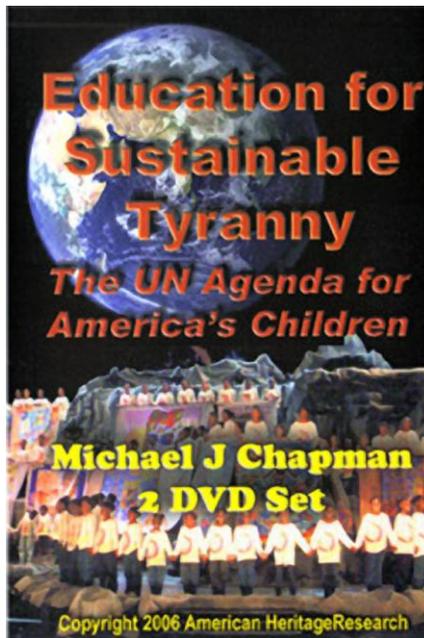

- *stack 'em and pack 'em housing scams*
- *traffic congestion*
- *inaccessible open space*
- *managed control over our lives*
- *mismanagement of water supplies*
- *prohibition on natural resource management leading to increased fire hazards and private property restrictions.*

This is a big **opportunity to awaken you neighbors and rid your town of a huge threat!** Join in; contact Freedom Advocates; Reassert the principles of freedom! Neutralize ICLEI.

- ii. This war for 'global to local' transformation **is** happening in your town. The battle for your town and county can only be won in **your** town and in **your** county by people like you.

The generational protection of liberty can, **must**, be achieved in your home first. That is difficult to do if you send your children to today's government schools. The transformation promoted by American schools is camouflaged and packaged. But bottom line – government schools teach pure Sustainable theory and engage the students in Sustainable practice.

The purpose of today's government schools is to impart attitudes, values and beliefs necessary to advance global government.

6

A poll of recent grads indicates most identify themselves as “global citizens.” As Michael Chapman has said for years, “The school system is working as it is intended to work!” The mantle of the American ideal has been dropped at our nationalized schools all across the country.

Locally, we must center our defense of liberty on the protection of private property. George Washington said, "Private property and freedom are inseparable."

Private property is not just a thing. Private Property is the relationship between a person and something. Under the concept of private property the owner determines the property's use. Protect this idea in your county.

- iii. Turn the local progress into a national movement.

When enough towns and counties get going to expose Sustainable Development, state governments and then the national government can be caused to reject the Sustainable concept and begin restoring the American Republic.

America, the geographic area where the principles of equal justice were introduced, can be the home of where the people become wiser and stronger because they met today's challenge to restore the principles of equal justice and individual liberty. We have a lot to gain by going to work for a free America. We have a lot to lose if we don't.

Nikita Khrushchev declared that America would be defeated "without firing a shot." The idea now expressed as "Sustainable Development" is not new. It is quite clever of him to have suspected that Americans can be fooled...if only for a while.

If we accept government's implementation of Sustainable philosophy...Well, old Nikita would look pretty "smart!"

Americans still have the tools to object. Exercise our freedoms or lose them for a very long time – maybe forever. Now is the time to reassert and protect our heritage for ourselves and our posterity!

- iv. Know that the organized political-economics of our time have supported and are supported by a fiat money system run by an oligarchy. Over the course of time this international oligarchy has created an army of mercenaries that invades everywhere in pursuit of centralized world control through the policy known as Sustainable Development.
- v. Understand that local progress comes via a methodical approach coupled with specific strategic objectives. Your job is to join in – lead or follow – get in the way of your county's Sustainable Action Plan. Restore the principles of freedom.

Our future as a land of the free is dependent on what we, the ordinary citizens, do.

The globalist call for “change” has accelerated. We should expect the buzzing, whirling confusion to continue to accelerate. We must remain calm. We need to prepare ourselves now to be ready for the effect of the rising globalist assault on the experiment and promise of America. And we must accelerate the public’s understanding of Sustainable Development so that more react to reject the takedown by Sustainable policy before it is fete accompli. America can only be protected by Americans reacting to the globalist takedown.

Conclusion:

One cannot appreciate the evil behind today's thrust without understanding what we stand to lose. America's ascent to having come close to becoming the shining city on a hill is being reversed. Why? Why did this nation ascend? Why are we in decline?

Mankind's greatest *is* America's Declaration of Independence. Why? Because; The Declaration was the first, and is the only, political recognition of unalienable rights in the history of the world.

The notion that government exists to protect each person's *un- a- lien- able* right to life, liberty and property was and is a revolutionary idea. The fact that American government acted in this pursuit for even a short while accounts for the fruits of today's society.

From the end of the revolutionary war the forces of a 'crown' have worked to submerge this idea and bring about a new order – an order where the entire world submits to a very different premise for government. That new premise is called Sustainable Development.

Our foundation is being rocked.

Is the Declaration of Independence what you adhere to?

Are you ready to give our children over to the new one world tyranny?

These are troubling times. They are bound to get worse before freedom can actually be rescued.

Prepare yourself. Then find your position in the defense of freedom. America, its promise of individual liberty and equal justice, is not lost as long as the commitment to its pursuit is alive. Carry forward – *defend freedom locally*.

Demand the Recognition of Unalienable Rights.

Roll back globalism.

Defrock the Federal Reserve and most importantly,

Defend your town against Sustainable Development policies!

We *can* Restore America's Independence; premised on the ideals of individual liberty, meaning the political recognition of unalienable rights... by squashing Sustainable Development.

May God Bless you, and *our* work; as we restore the American Republic!
