# BIOMETRICS – YOUR BODY IS NOW YOUR ID

Problems, answers and legislative solutions

Enrolling the world in a single global biometric ID system

Citizens of the world are being enrolled in a single global system of identification and financial control. Facial recognition, digital fingerprinting and iris recognition are forms of biometric identification being used by many states and nations to identify their citizens, for control and surveillance. Once enrolled, your body becomes proof of identity.

Facial recognition creates a digital map of the face

There must be enrollment (passports, driver's license/ID cards –DL/ID cards, etc.), common standards (so information can be shared) and linked databases (for access, searching and sharing of personal-biometric information).

U.S. citizens are being identified and enrolled in this system without their knowledge, through DL/ID cards and passports. This global biometric system relies on common standards designed by two international organizations, over which U.S. citizens have no control, the American Association of Motor Vehicle Administrators (AAMVA) and the International Civil Aviation Organization (ICAO), part of the United Nations (UN).

AAMVA sets biometric DL/ID card standards and provides the information-sharing network, AAMVAnet, which will include Mexico, Canada and other nations under the REAL ID ACT of 2005 (a federal DL/ID law that imposes these international standards on state ID). ICAO sets facial recognition photo and international biometric "e-Passport" standards (enrollment is 50 million/year).

Despite being highly inaccurate, facial recognition is the biometric of e-Passport and REAL ID. Since facial recognition is used with common digital photos, collected by states and nations, PERMANENT biometric enrollment can occur as databases, containing personal-biometric-photo information, are linked. Database linking can occur without the individual's knowledge. REAL ID requires states to link their databases, sharing personal-biometric information and the Department of Homeland Security (DHS) boasts of a global personal-biometric sharing system.

Robert Mocny (DHS US-Visit) stated that *"information sharing is appropriate around the world,"* and DHS plans to create a *"Global Security Envelope of internationally shared biometric data that would permanently link individuals with biometric ID, personal information held by governments and corporations."*
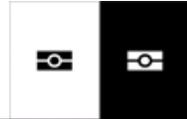

This system attacks state and national sovereignty and our rights of representation. U.S. citizens have no control over the international organizations that will identify them and control their ability to buy, sell and travel. A universal ID system will break open the borders and is the foundation for

such programs as the "Security Prosperity Partnership." Biometrics, and global information sharing, permanently enrolls us into a system that threatens religious beliefs, privacy and states' rights (all protected by the Bill of Rights) and will certainly facilitate an international ID theft pandemic.

DRIVER'S LICENSE or PASSPORT = GLOBAL BIOMETRIC ENROLLMENT

Driver's License with Facial Recognition Biometrics

ICAO's Biometric e-Passport Logo

EU e-Passport with biometrics, RFID chip and ICAO biometric e-Passport Logo

US e-Passport with biometrics, RFID chip and ICAO biometric e-Passport Logo

Enhanced Driver's License - Facial Recognition - RFID chip – used as a DL/ID-passport for border-states

ICAO Logo – ICAO is part of the UN

ACTION - Stopping REAL ID is not enough – DHS will impose biometrics, global data sharing, and collection of personal information through REAL ID, other legislation or through of the state DL/ID card vendor. Once state databases are "standardized," DHS can legally access state records and share personal-biometric information globally. Standardization must occur before sharing. To prevent that, the goal of state legislation is to make state databases UNUSABLE for sharing, incomplete, incompatible with facial recognition, etc.

Use this document to inform State and U.S. lawmakers of the problems and solutions. <u>Email "Stop REAL ID Coalition" for digital copies of documents and proposed, and existing, legislation.</u> Share this document with pastors and political groups but especially with lawmakers. Ask them to author or support legislation that will:

- Ban participation in REAL ID
- Ban the use of biometrics
- Reduce DL/ID card photo resolution so it is incompatible with facial recognition
- Wipe existing biometric data – stored and backup
- End the collection and storage of Social Security Numbers and end state participation in federal programs that collect a SSN (through DL/ID cards) and share data through AAMVA
- Require the Legislature and Governor to approve ALL DL/ID card related rules and information sharing agreements, by state motor vehicle departments, before implementation (for transparency - no hidden biometrics or international agendas, AAMVA, ICAO, etc.)
- Establish a state-to-state data sharing system and do away with AAMVA information sharing for non-Commercial Driver Licenses
