

Major ongoing Congressional Breaches of the Constitution

by Michael Shaw

Three Congressional Breaches of Constitutional authority have opened the door for implementation of the Global to Local Action Plan of Agenda 21. Congress has done much to put us into the grasp of globalism, including these three breaches:

Major Constitutional Breaches Undertaken by Congress:

1. Ownership and/or Management of Broad Landscapes

- 1. Federal ownership and/or management of broad landscapes.**

Implementation of the Wildlands Network is a violation of Article 1 (dealing with the Legislative Branch), Section 8 (dealing with legislative powers) of the U.S. Constitution.

Constitutional authority for land ownership is set out in Article 1 Section 8.

U.S. Constitution: Article 1 Section 8

The Congress shall have Power...

“To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding 10 Miles square) as may...become Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings;”

Presented by FreedomAdvocates.org

The federal government has no authority to own or “manage” areas of land.

There is **no** mention of a need or authority for creating the Department of Interior for the creation of massive “Wildlands” zoning anywhere in America!

There is **no** authorization for the various federal land ownership or contemporary Wildlands bills that have been processed by Congress.

The Constitution was written to *protect* the unalienable rights of the people, not to abrogate them.

The Wildlands Network works to *abrogate* unalienable rights, not protect them.

Who is Congress working for? There is a war on American ideals and Congress is on the wrong side.

Remember government powers are *granted* under the Constitution – they cannot just be **taken** by a narrow mob, with political front men, seeking power

and control over resources. And yet that is exactly what is happening.

Defaulting to federal authority in the area of land and resource management is a huge mistake. Government parks should be determined and owned by states and/or local governments. There is no federal authority for the ownership and management of parks and the resources they hold.

A second Congressional breach of Constitutional responsibilities is:

Major Constitutional Breaches Undertaken by Congress:

1. Ownership and/or Management of Broad Landscapes
2. Delegation of Trade Policy to International Institutions

2. Delegation of trade policy to international institutions.

Congress has delegated authority over U.S. trade policy to the World Trade Organization and to various multi-lateral trade pact organizations. This *abrogates national sovereignty*.

The effects of surrendering trade policy control include:

- A disintegrating border; Example: NAFTA agreement – 124 mile or 200 kilometer wide “International Zone of Cooperation” to facilitate globalist trade policy and environmental concerns along the southern border.
- Constitutional taxing authority (Article 1 Section 9) becomes neutered. The Constitutionally intended form of taxation known as indirect taxation consists primarily of import and excise duties that are lost to the World Trade Organization’s so-called “free trade”

requirements. It is not free trade that is being established; it is a managed global trade control exercised over America. This policy is designed to economically equalize nations in accordance with the *Earth Charter* mandate to equalize wealth within and between nations.

- American Industries are lost to the Globalization process.
- Average American earner wages are reduced toward global norms.
- Multinational Corporations profit from cheap, often slave, labor from overseas. A massive profit arrangement is protected by the World Bank from American duties.

Domestic production is sacrificed. And America sinks.

American involvement in the World Trade Organization is designed to destroy the Nation.

The Designs of:
Globalist Managed 'Free Trade'

1. Multinational Corporate Control in Partnership with World Government Agencies
2. Redistribute America's Wealth
3. Neuter American Sovereignty

The modern trade regime results in manufacturing job losses starting with a shuttling of resource extraction activity. Production has left the U.S. Finished goods are then imported, often from slave labor nations, always concentrating wealth into the hands of global business partners of prospective world government while draining American capital.

Prince Charles established the Sustainable Business Council with major multinational businesses.

Globalist corporate coordination has occurred.

So what do we do?

American trade policy must again become American made. America cannot surrender its trade making power and remain a sovereign nation.

American involvement in the World Trade Organization is designed to destroy the Nation.

The Sustainable problem is more than green.

A third Congressional breach of Constitutional responsibilities is:

Major Constitutional Breaches Undertaken by Congress:

1. Ownership and/or Management of Broad Landscapes
2. Delegation of Trade Policy to International Institutions
3. Delegation of Monetary Authority to a Private Consortium

Presented by FreedomAdvocates.org

3. Delegation of monetary authority.

Another Congressional long standing abrogation of their Constitutional responsibilities is the delegation of its monetary responsibilities to a globalist system of central banks, resulting in the loss of a Constitutional and honest monetary system. This is another Congressional breach of Article 1 Section 8: This time it regards the

establishment and maintenance of Central Banking within a world system of Central Banking. **This action provides the indispensable ingredient for creating World Government.**

Congress has **NO** authority to delegate an exclusive monetary system authority to a third party. That is what happens when a Central Bank like the Federal Reserve is formed. This accounts for, at least, the financial aspect of the dilemma we face.

The existence of Central Banks, like the Federal Reserve, allows for the printing of the money necessary to fund the globalist movement while accounting for its creation as debt owing from us.

The current monetary system is designed to cause a financial collapse which allows opportunity to further consolidate and strengthen globalist power.

America will need a new monetary system. Today we must understand this issue if we are to avoid

becoming trapped in an arranged future that has little regard for human life.

The collapse of the monetary system appears to be in process now.

So:

- We need to cause federal land to become private property or state lands;
- We need to reestablish an American trade policy in D.C.; and
- We must abolish the current fiat monetary system.

Presented by FreedomAdvocates.org

Each of these Constitutional breaches is a pillar upon which Globalism and Agenda 21 is being constructed.

American people's goal must be: To recapture the federal government. How do we do that? Not easily. To get there the battle we can and must win soon is the Local battle.

To win the local war, you must learn of your area's local Agenda 21 program. The pattern you will see is the same pattern in operation everywhere.

I recommend you go to FreedomAdvocates.org and regularly check the *Town Crier* to learn about upcoming events as well as learn about efforts to fight back against Agenda 21 coming in from all over the country.
