ICLEI Primer: Your Town and Freedom Threatened

By Freedom Advocates

****Now easy read format USA ICLEI member list included**** Right now, in your town and neighborhood, policies are being implemented that will ultimately eliminate your freedoms and destroy your way of life. You need to know what's going on to stop this process. Many town officials are selling us out to global regional development with help from the [International Council for Local Environmental Initiatives \(ICLEI\): Local Governments for Sustainability](#). ICLEI is used as one of the mechanisms to undo the political recognition of [unalienable rights](#).

ICLEI uses the false premise and outright lies of [anthropogenic global warming](#) to change our way of life, for the worse!

[ICLEI: Local Governments for Sustainability](#) promotes [Local Action 21](#), [Local Agenda 21](#) and other [United Nations programmes](#) implemented through local town councils, planners, mayors and local governments.

Why should you care?

Social engineering and behavior modification are some of the true objectives being implemented under the guise of environmental and climate protection. This is accomplished by exploiting people's desire to maintain a healthy and lasting environment in the name of "[sustainability](#)." Here is an example of how [ICLEI changes behavior](#), just like another organization called "[Fostering Sustainable Behavior](#)".

It is also ICLEI's job to implement United Nations' policies that restructure our representative form of government through [global and regional development](#) (< click and then view slide show). Policies and programs take control from our representative government and put it into the hands of regional, non-elected boards. This allows elected officials to shirk their responsibilities. It turns us into a [soviet system](#) that is based on [Regionalism](#). It facilitates both communism and fascism. Representative government with defined limits is the basis of a free and just society.

Cool Mayors Fire-up Hot Debate

ICLEI methods include infiltrating local government. Organization representatives seek to be hired into

local planning departments or they provide “toolkits” to staff. Too many elected officials such as [Cool Mayors](#) allow ICLEI to influence policy changes through the use of [funding incentives and rewards](#). While some of these policies sound good on the surface, they result in consequences such as:

- High-density housing scams
- Traffic congestion
- Open space where access is not allowed
- Government “partnering” with favored private businesses and non-profit agencies, using your tax money
- Undermining Constitutional administration of government
- Managed control over your life
- Mismanagement of public utilities
- Prohibitions on natural resource management leading to increased fire hazards, lack of water, and private property restrictions,
- Increased taxes, fees, regulations and restrictions

Is ICLEI running your town or coming to a town near you?

Are your [elected officials](#) being lured into enacting ridiculous rules and regulations in exchange for [funding](#)? Do your elected officials know that there are long term consequences to their irresponsible actions?

Currently there are more than 550 communities in North America paying [membership dues to ICLEI](#). Upon becoming a member of ICLEI, members become governed by [ICLEI Charter](#). If your community is one of these, you are paying for the loss of your unalienable rights.

Has your town, city or county signed on with ICLEI? Find out here:
