

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

THE DIRECTOR

July 28, 2006

The Honorable Tom Coburn
Chairman
Subcommittee on Federal Financial Management,
Government Information, and International Security
United States Senate
Washington, DC 20510

Dear Tom:

I am writing in response to your letter dated June 14, 2006, requesting a comprehensive report showing the total U.S. contribution to the United Nations system. The attached report was compiled with information provided to OMB by the relevant Executive Branch agencies.

If I can be of any further assistance, please do not hesitate to contact me or my staff.

Sincerely,

A handwritten signature in black ink, appearing to read "Rob Portman".

Rob Portman

COMMITTEE ON INDIAN AFFAIRS

June 14th, 2006

The Honorable Rob Portman
Director
Office of Management and Budget
Eisenhower Executive Office Building
1650 Pennsylvania Avenue, NW
Washington, DC 20503

#113914
JUN 30 2006

Dear Director Portman:

I am writing to request a comprehensive report from the Office of Management and Budget that shows the total U.S. contribution (financial, in-kind, or otherwise) to the United Nations system. This report should cover FY2001 through FY2005, be organized by U.S. department and agency, and show the U.N. account, agency, fund, program, and etc. to which the funding was directed.

Due to pending financial oversight my subcommittee is conducting, I am asking this request be fulfilled by July 17th, 2006. I look forward to your report. Should you have any questions, please contact Trey Hicks of my Subcommittee staff at (202) 224-2254.

Very truly yours,

Tom Coburn
Chairman
Subcommittee on Federal Financial
Management, Government Information, and
International Security

65208

Report on US Contributions to the United Nations System

Prepared by the Office of Management and
Budget

For the Chairman of the Subcommittee on
Federal Financial Management, Government
Information, and International Security

July 31, 2006

Data Collection Methodology

To collect the data contained in the attachment, on June 19th OMB sent a Budget Data Request through OMB Resource Management Offices (RMOs) to all federal government agencies. The data request included a list of agency contacts provided by the Department of State, and RMOs were instructed to contact agencies even if they were not listed with a point of contact. OMB gathered the data using criteria stated in Congressional correspondence.

The data request required agencies to submit information on all contributions (financial, in-kind, or otherwise) to the United Nations system from Fiscal Year 2001 through Fiscal Year 2005, and identify the activity funded by the contribution.

The request included a comprehensive list of organizations that are considered part of the United Nations system. For the purposes of the request the “United Nations system” was defined as all agencies, departments, organizations, funds, etc. that fly the UN flag or use the UN logo or are otherwise associated with the UN.

The request also required that agencies identify contributions that were passed through another entity but ultimately were used for UN projects or programs. If the US contribution was passed on to another UN-affiliated organization, then it was noted in the response and the program that ultimately received the funding was identified. The report attempts to make clear the contributing organization and the final destination within the UN system.

Agencies were provided with three templates to use in their response. The templates consisted of three contribution categories as noted above – financial, in-kind, and other.

In many cases, agencies went to multiple field offices and services to provide the necessary programmatic detail. This process, while time consuming, ensured a higher level of reliability and detail in the response.

The report provides a summary by agency with a government-wide total. Detailed information is then organized by department or agency, each with a subtotal. Each agency reported for all organizations under its purview. For example, the Department of Agriculture section includes contributions to the UN from the Foreign Agricultural Service, the Food Safety and Inspection Service, and the Agricultural Research Service. Other small agencies are grouped together at the end of the report.

United Nations Environment Program	Currently, the U.S. and 188 other countries are Parties to the Montreal Protocol. The U.S. has repeatedly affirmed its commitment to this international treaty and to demonstrating world leadership by phasing out domestic production of ozone depleting substances (ODS), as well as helping other countries find suitable alternatives to ODS. Over the lifetime of the Montreal Protocol Multilateral Fund, 5000 projects have been funded in developing countries -- resulting in reductions of 170,000 tons of ozone-depleting substances, enabling developing countries to reduce ODS consumption by 70% from baseline. In 2005, the Fund approved 200 projects in developing countries.	Under the Montreal Protocol on Substances that Deplete the Ozone Layer, the U.S. and other developed countries contribute to the Multilateral Fund to support projects and activities that eliminate the production and use of ozone depleting substances (ODS) in developing countries.	10,976	9,576	9,514	10,935	9,920

¹ The objective of the project is to explore the feasibility of developing a country's capability to survey higher qualified people, including recipients of doctorate level degrees. The primary purpose of the research is to establish an internationally coordinated survey of the careers of higher qualified people, building on the existing work currently conducted. An important element of this work is to measure the mobility of higher qualified people within a country but especially across borders. The interest in cross-border movement underscores the need for this survey to be internationally comparable.

² These amounts represent NSF's share (approximately 13%) of funds from all agencies participating in the Climate Change Science Program. Total funding for the program is: \$820,000 in FY 2003, \$898,000 in FY 2004, and \$1 million in FY 2005.

³ Staff Detailed to UNESCO Secretariat

⁴ The proposed conference is aimed at developing an international dialogue on systemic educational reform. The dialogue will advance discovery and understanding of educational reform, while promoting teaching, training and learning. The initiative will be used to analyze and compare various learning models and pedagogic approaches to science and mathematics teaching, with the long-term aim of improving mathematics and science achievement at the K-12 level. The conference will develop new research strategies and partners at the national and international level, who will link the systemic reform efforts in the US in context with similar efforts around the world. The dialogue between UNESCO representatives and staff from education and science divisions and the US science and mathematics communities will be renewed and strengthened. Results of the conference will be published both in print form and on the AAS website. Alliances developed through the conference among university-based academics, policy-makers in development agencies and school-based science and math educators will help bridge the gap between the research produced by development agencies and that produced for academic audiences.

Contributing Bureau / Account	Final Recipient Organization	Description of Activity Funded	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005
		<p>⁵ The PI requests support for travel costs for approximately 13 U.S. scientists to participate in the 2005 International Ocean Research Conference, June 6-10, 2005, at the UNESCO Headquarters in Paris, France. The Oceanography Society is hosting this conference together with UNESCO/IOC to further its commitment to fostering and facilitating communication among scientists. The program co-chairs have planned a program that will span a broad range of topics in oceanography and will feature a combination of invited and contributed talks, as well as posters. Over 275 abstracts have been submitted to the conference committee for consideration. The goals of the conference are to reflect on how far oceanography has come and to help define the coming decade of international collaboration in science and education. Several conference sessions relate directly to current OCE Programs. Approximately 125 of the 275 abstracts have been submitted by non-U.S. scientists, creating a unique and timely opportunity for discussion and collaboration between U.S. and international scientists.</p> <p>⁶ The Intergovernmental Oceanographic Commission (IOC) of UNESCO coordinates and facilitates ocean research among governments. A total of 129 countries comprise the membership; the United States is a key participant and strong supporter of IOC activities. The IOC develops and promotes international research to improve global understanding of ocean processes and their relationship to the sustainable development and stewardship of ocean resources. This project constitutes the NSF portion of support to the Ocean Science Section of the IOC, including development of a new program on Multidisciplinary Science and Natural Resources and an international initiative to examine critical issues of land-atmosphere-ocean biogeochemistry. These funds provide for a scientist on the staff of the IOC at a level of \$120,000 per year, and beginning in 2005, a post-doctoral fellowship on ocean carbon programs at the IOC at \$40,000 per year.</p> <p>⁷ Support for UNESCO's G-WADI information sharing and website as part of NSF's Science and Technology Center for Support of Sustainability of Water Resources in Semi-Arid Regions (SAHRA)</p>
