Let’s attack the root of the problem:

- Learn to recognize the local and broader patterns and tenants of Agenda 21. This way you can fight back with insight, starting where the attack all around you is happening and where you can win – at the local level.

The Globalist invasion is happening right under our noses. Every county in America has its local Agenda 21 implementation underway.
Let’s examine aspects of the ‘Local Action’ Plan.

ICLEI

This is the most vulnerable globalist organization operating in America today.
The full name of ICLEI is “The International Council for Local Environmental Initiatives”. It is also called “Local Governments for Sustainability”.

ICLEI is an important NGO that:

- Closely ties policy to man-made Global Warming and climate change.

- Has formed an international Congress filled with city and county representatives. This Congress acts as a shadow World Government.

- Directs Community Planning Development and other local agencies and provides statutory and regulatory provisions that implement Sustainable policy locally.

Local tax funds pay the contract fee. Agenda 21 policy-making is fully embedded upon ICLEI’s arrival. At least 600 cities, including Bloomberg led New York City, from all across the nation, have ICLEI contracts. Local governments have been hijacked by world government agents.
Each ICLEI city’s influence is expanded as ICLEI then automatically steers Regional Air, Transportation, Water Boards and many other “regional” transformational governance apparatus.

Article 1 Section 10 of the U.S. Constitution makes the following prohibition: “No state shall enter into any Treaty, Alliance or Confederation” with a foreign political entity. Neither may a city. Ask: Is it treasonous for city leaders to contract with ICLEI an International NGO and U.N. related organization? Yes! ICLEI contracts are treasonous.

ICLEI Central California Cities and Counties Table
Contracts with ICLEI guarantee implementation of international political and economic policy at the local level. Amador County was a member of ICLEI. The county did not renew its membership, but it hasn’t cleaned out everything that ICLEI put in place. A study needs to happen.

For citizens of Amador that means understanding the operational relationship between ICLEI, the county planning and administration departments and ties to regional governance apparatus such as the Sierra Nevada Conservancy.

The battle against ICLEI is brewing. Citizens here have started the process, but there’s more to do.

We are following the *Kick ICLEI Out!* campaign at FreedomAdvocates.org.
In 2004, Governor Schwarzenegger created the Sierra Nevada Conservancy.

"The Sierra Nevada Conservancy will lead a collaborative effort among local, state and federal partners to restore and protect California's largest and most important watershed,"

http://yubanet.com/regional/Governor_Schwarzenegger_Signs_Historic_Legislation_13668.php

Presented by FreedomAdvocates.org

From YubaNet.com article:

- The Sierra Nevada Conservancy is California’s largest conservancy in terms of land mass at 25 million acres (from the Oregon border to Kern County).

- More than 65% of California’s bird and mammal species and at least 50% of the state’s reptile and amphibian species live within the Conservancy’s boundaries.

- As California’s principal watershed, the region produces 65% of the state’s water supply for residential and agricultural uses.

- Between 33% and 50% of the state’s annual timber supply comes from within the Conservancy’s borders.

- "One of the primary goals of the Sierra Nevada Conservancy is to support environmental preservation..."

- "The Sierra Nevada Conservancy will promote resource conservation and economic benefit within the Counties of Alpine, Amador, Calaveras, El Dorado, Tuolumne..."
Standard Green language – Public Private Partners pursuing economic promotion and control excused by the advance of so-called green or social policies.

The Sierra Nevada Conservancy is regionalism at its ultimate level. This new “Supra Region” negates the authority of local governments.
Program
The SNC supports the Sierra Nevada Region by providing funding…
for collaborative projects in partnership with local government, nonprofit organizations and Tribal entities.
Activities contribute to the following program objectives: include increased opportunity for tourism and recreation in the Region; protect, conserve and restore the Region’s physical, cultural, archaeological, historical and living resources; aid in the preservation of working landscapes;… protect and improve water and air quality;…
http://www.sierranevada.ca.gov/about_us.html

Though California is a worthy tourist destination, tourism is the universal pitch when locking up Wildlands.

What about private property owners?

The Sierra Nevada Conservancy is an extra constitutional organization designed to implement the Wildlands Network – which necessarily abolishes private property. The Conservancy will leave in its
tracks several smart growth communities. People will be managed as livestock.

In short, the Sierra Nevada Conservancy exists: to advance the globalist goals to regionalize governance, to implement a step by step approach to the abolition of private property, to promote the relocation of people from Wildlands and corridor areas to Smart Growth areas, and for the conscription of public private partners – the mandatory volunteers of the new fifth column.

Regionalism is the watchword. It is a core aspect of Sustainable Development. Regionalism might sound benign, but the consequences that come as a result of political regionalism must be understood by freedom loving people or liberty will be trampled. Regionalism is being used to destroy traditional boundaries and usher in a transformed system of governance that abolishes private property; the direct goal of Sustainable Development Agenda 21.
In the words of Charlotte Iserbyt former Department of Education Official, “Regionalism is Communism”. Regionalism is also Fascism. It erases political boundaries and thus representative government. Regional governance cannot coexist with a Republican form of government.

The purpose of regionalism is to consolidate (“collaboration”) the global and regional effort to conspire against the idea of private property. They do this, in part, by advocating and establishing a system of “partners” who will cooperate with the new order. Often these people are present landowners. Of course the “partnership” has one way authority for most participants. The table will be shrunk once the collaboration consolidates. Such is the change or transformation that is taking place today.
One of the partners of the Sierra Nevada Conservancy is the Sierra Business Council.

The Sierra Business Council exists in part to “manage” agricultural economy.

### Social Network Mapping

Social Network Mapping is diagramming or creating a map of the relationships between specified individuals or organizations being studied (i.e., TRACKING). Can be used to facilitate identification of who knows who and who might know what...

### Promote Ordinances to:

Use zoning codes to implement agricultural goals and policies
Create agricultural preserves
Streamline subvention programs at local agencies
Create buffers around agricultural preserves with specific permitted uses to minimize land use conflict
Create specific agricultural zoning with minimum parcel sizes for agricultural uses that have clear definitions of permitted and conditional uses
Design guidelines for agricultural tourism uses
Establish clear guidelines for agricultural housing
Define appropriate nuisance issues and nuisance ordinances to fit buffers
**Design a Right-to-Farm ordinance**
Establish criteria for agricultural subdivisions

http://www.sbcouncil.org/Publications/Use-zoning-codes-to-implement-agricultural-goals-and-policies

Presented by FreedomAdvocates.org
Total centralized control – what about the use and enjoyment of private property?

So much of the globalist invasion at the local level relies on the man-made global warming fraud. The unraveling of this masquerade has not yet hit the local political scene. People across America need to realize that the man-made global warming charade is being used to drive local policy in order to usher in globalism in transition from the American way.

Supporting AB 32
The California Business Alliance for a Green Economy is reaching out to businesses across the state to build support for a clean energy future in California.

AB 32 will help small businesses save on energy costs, create jobs, clean the air, and protect California’s economy from the dangers of climate change.

Land Use Planning Tools and Reports
Read: Local Land Use Planning and Climate Change Policy
Remove Roadblocks, How to make sustainable development happen now.

From Local Land Use Planning and Climate Change Policy: Summary Report from Focus Groups and
Interviews With Local Officials in the Intermountain West, a policy paper by David Metz and Curtis Below courtesy of the Lincoln Institute of Land Use Policy (“The findings and conclusions of this Working Paper reflect the views of the author(s)...”):

National and international “consensus” on man-caused climate change has dissipated. Copenhagen was a bust and even the Globalist U.S. Senate won’t adopt Cap & Trade. So why are you being stuck with land use controls based on this bogus issue?
The Council represents a new approach. Our perspective is regional.

“So long as a group can demonstrate that it is mission-driven for social benefit, the group and its members are welcomed here.”

We are committed to creating special places that meet today’s needs and that are sustainable environments for all time.

http://www.sbcouncil.org/About/Member-Organizations+-Friends

Presented by FreedomAdvocates.org
Here is the brochure from the Sierra Foothill Regional Smart Growth Conference:
Steve Wilensky, the Chair and District 2 Supervisor of the Calaveras County Board of Supervisors is also the
facilitator of the *Amador-Calaveras Consensus Group* meetings. He’s a member of the Calaveras Farm Bureau, the Calaveras County Chamber of Commerce, and the Upper Mokelumne Watershed Council. He’s working really hard to bring in Sustainable Development!

---

**The Amador-Calaveras Consensus Group**

The Amador-Calaveras Consensus Group is a community-based organization that works to create **fire-safe communities, healthy forests and watersheds, and sustainable local economies**

The Amador-Calaveras Consensus Group is a community-based organization that initiates, encourages, and implements balanced efforts to **improve the environmental, economic and social well-being of our communities and citizens.**

http://acconsensus.wordpress.com/

---

In Santa Cruz we killed the Fire Safe Council. These “councils” work to all ends related to the Wildlands Network.
The Amador-Calaveras Consensus Group hosted the local stop of the Global Action Research Center’s “Journey of the Global ARC 2010”.

“The Amador-Calaveras Consensus Group, with its mix of public land managers, state-level authorities, forestry practitioners and contractors, and job training and environmental non-profits, is uniquely positioned to ensure the work taking place on these lands is sustainable from both an environmental and economic perspective, ...”

– Paul Trianosky, Nature Conservancy Memo, October 13, 2009

Margaret Thatcher’s definition of “Consensus”:

“To me consensus seems to be the process of abandoning all beliefs, principles, values and policies in search of something in which no one believes, but to which no one objects—the process of avoiding the very issues that have to be solved, merely because you cannot get agreement on the way ahead. What great cause would have been fought and won under the banner "I stand for consensus"?
Katherine Evatt, another member of the Amador Calaveras Consensus Group is the President of the Foothill Conservancy. There’s a coordinated effort to recruit the same sustainable insiders to multiple posts.

Foothill Conservancy is an active member of the Amador-Calaveras Consensus Group, which recently received the U.S. Forest Service Region 5 Forester’s Honor Award for ecological restoration. Other partners include state, federal and local agencies; local forest contractors; tribal members; job-training agencies; conservation groups; and community nonprofit organizations.

The government’s legitimate role with regard to the environment is:

1. Maintain a clean water supply.
2. Maintain clean air.
3. Prohibit one from polluting the property of another.

That’s it!
About the Foothill Conservancy Mission

To protect, restore, and sustain…
for the benefit of current and future generations.

The Foothill Conservancy envisions a future where:
Rural character and scenic quality are protected.
Agricultural lands, forest lands, and open space are **conserved.**
The **natural diversity** and **habitat of native plants and animals** are **protected and restored.**
Free-flowing **rivers** and **creeks** are **protected and restored.**
Development is **ecologically, economically, and socially sustainable.**
Historic sites, small towns, and community identities are **preserved.**
Cities and counties **coordinate** their land use planning.
**Social, economic, and natural diversity** are balanced to strengthen local communities.

http://www.foothillconservancy.org/pages/aboutus.cgi
Presented by FreedomAdvocates.org

This is the essence of Regionalism – the abolition of political boundaries. Abolishing political boundaries makes it very possible to abolish private property through back room coordination.
Foothill Collaborative for Sustainability (FoCuS) regularly invites the Amador-Calaveras Consensus Group to their meetings.

FoCuS is a 501(c)(3) non-profit organization dedicated to the principles of sustainable living, community self-reliance, and well-being through education and collaboration in Calaveras and Tuolumne Counties.

Will we choose the path of a diminishing reality or will we choose the other path… the path of broadening horizons moving toward systems that are sustainable, all-inclusive, empowering and that honor all life and our relationship with it?

Eric Taylor
Co-founder of FoCuS

http://foothillsustainability.org/

Remember the population reduction goals of Agenda 21...

This is the remake of a society that was created to protect individual rights including the use and enjoyment of private property.
Eric Taylor is the co-founder of FoCuS and John D. Adams is the founder of Eartheart Enterprises. These “comrades” coordinate their organizations and advance Agenda 21.

Dr. Adams specializes in “organizational and individual change support ...and building a sustainable future”. Eartheart Enterprises is home to his Organizational Development and Transformation profession.

Eartheart Enterprises’ services have been delivered most frequently to educational... and to government agencies at all levels. The most frequently requested focuses for these services have been:
- Change leadership development
- Large scale organizational change planning & support
- Individual transition adjustment
- Influencing Effectively
- Sustainable consciousness & sustainable development
- Professional development of trainers and consultants

http://www.eartheart-ent.com/index.html

Presented by FreedomAdvocates.org
Most hometown participants involved in Sustainable Development implementation think they are doing something unique, others think they are doing something for mankind – well – they are. They are putting mankind on the verge of serfdom.

The scary part is that organizations like this are everywhere. But the battle ground is always local.

The Wildlands Network, in operation here in California, is helping to create and implement policies and legislation that promote massive land grabs.
The land policy of the United Nations was first officially articulated at the United Nations Conference on Human Settlement in Vancouver, Canada in 1976. This
quote is from the Preamble from the U.N. Policy on Land:

“Land... cannot be treated as an ordinary asset, controlled by individuals and subject to the pressures and inefficiencies of the market. Private land ownership is also a principle instrument of accumulation and concentration of wealth and therefore contributes to social injustice; if unchecked, it may become a major obstacle in the planning and implementation of development schemes... Public control of land use is therefore indispensable...”

Conservation easements are also promoted to aid in the fulfillment of the Wildlands objective. Stay away from conservation easements.
The Northern California Megaregion is designed to be comprised of Smart Growth built along transportation corridors. These corridors will be multi-modal for trucks, trains and passengers.

“San Francisco + Sacramento = SanFramento” – a Megaregion encompassing the Capital Region and the Bay Area. This Megaregion is divided into the Core and the Sphere of Influence.
You can see from this map that Amador County lies within the “Sphere of Influence” of the Northern California Megaregion.

The Sphere of Influence will be highly regulated. Human use will be massively regulated and controlled.
One of the ways the Sphere of Influence will be used is under the guise of Historic Preservation designed to advance the “common good”.

Our Goals
Over the next five years CPF is committed to increasing our membership in numbers and diversity; increasing our funding base;... Our advocacy efforts at a local and statewide level; continuing and expanding our education efforts; partnering with other non-profit organizations to promote smart growth, sustainability and cultural landscape preservation; establishing a Legal Defense Fund; establishing a list of California's "Most Endangered Properties".

http://www.californiapreservation.org/contact.shtml#navtop
The American Chamber of Commerce is an NGO. NGOs are accredited for Agenda 21 implementation by the United Nations. The American Chamber of Commerce and the American Planning Association, another NGO, are both playing a role in the Northern California Megaregion and its Sphere of Influence.

http://www.dcprovideronline.com/acce/?event_id=ACCE101

Presented by FreedomAdvocates.org
Calaveras County Chamber of Commerce:

The Calaveras County Chamber of Commerce will promote and actively achieve Calaveras County economic prosperity and community sustainability.

http://www.calaveras.org/about-the-chamber/

The Nevada City and the El Dorado County Chambers of Commerce are also full supporters of Sustainable Development.
The Amador County Transportation Commission hired the De Novo Planning Group as an environmental consultant. Let us examine an example of Public Private Partnership.

De Novo was hired by the Amador County Transportation Commission (ACTC) as an on-call environmental consultant for various projects…

which will include a Sustainable Communities Strategy.

The project is being prepared concurrently with a Regional Blueprint process. The project includes an AB 32 Green House Gas Emissions analysis…

De Novo is just one of many planning organizations enlisted to bring in Sustainable Development.
MISSION + PHILOSOPHY
http://www.denovoplanning.com/mission-philosophy

OUR MISSION
Our mission is to provide municipal and private sector clients ... the environment and provides sustainable, safe projects that improve quality of life.

OUR PHILOSOPHY
Our solutions integrate local knowledge with recognized national and international standards for planning and environmental management, to achieve a balance in local economic, social, and environmental goals.

De Novo Planning Group is dedicated to fostering a partnership with each agency we serve, through listening to the community and stakeholders and reflecting the ideas and concerns we hear in the approach developed for each project. Our planning and environmental consulting services are in response to the increasing desire of the public and agencies for planning that recognizes the environment and provides sustainable, safe projects that improve quality of life.

This is the face of the New World Order.
The Sierra Nevada Alliance promotes the wild and scenic waterways with land trusts and watershed groups. Pushing ICLEI’s Climate Change Campaign and promoting Sustainable Communities, the Sierra Nevada Alliance is coming down hard to restrict land use as it works to achieve its “Vision”.

The Sierra Nevada Alliance's mission is to protect and restore the natural environment of the Sierra Nevada for future generations while ensuring healthy and sustainable communities.

Seeds for Sustainability Campaign
Working with Sierra communities to collaborate on a vision for a sustainable community and the plan to achieve that vision.

http://www.sierranevadaalliance.org/membergrps/

This sounds good to a young person who has never been challenged to understand unalienable rights. Our freedom is being set up for defeat if people close their eyes to the approaching reality.
Sustainable Sierra Communities Program
the Alliance is forging new ground in the Sierra
by encouraging Sustainable Communities.

Sierra Water & Climate Change Campaign
Alerts the public and decision makers to the
impacts of climate change in the Sierra and ensures
that smart local resource management plans
(watershed plans, general plans, hydropower re-licensing,
integrated regional water management, forestry, etc.)
are adopted that protect natural resources by reducing
emissions and adapting to the changing climate

http://www.sierranevadaalliance.org/programs/

Locally the Central Sierra Resource Conservation &
Development (RC&D), based in Jackson, is following
the Sierra Nevada Alliance’s lead to restrict the use of
private property. RC&Ds are coordinated by the U.S.
Department of Agriculture.
Private property in Amador County is under a massive Sustainable attack. The defense must rally.
That was a lot to absorb. Let’s recap just so you can absorb it better:

- The Sierra Nevada Conservancy has brought Regionalism to 22 California counties, encroaching on the authority of local elected government.

- The Sierra Nevada Conservancy and the Sierra Business Council exist to implement the Wildlands Network and Smart Growth through the formation of Public Private Partnerships – all this designed to promise a better, happier, more prosperous life. In reality, the program is designed to corral you into planned communities with enough rules, regulations and restrictions guaranteed to wipe out the middle class.

- The Sierra Business Council and the Sierra Nevada Alliance are pushing ICLEI and the Climate Change Campaign as justification for abolishing an owner’s determination of the use of his private property.

This area is about as saturated as it can be with Regionalism and Sustainable Development.
The youth are being prepped for Global Citizenship and the effort is working.

In polling we learned that last year a majority of 2009 high school and college grads identify themselves as “global citizens” not as Americans. Sustainability is being jammed down every youngster’s throat. The future is at risk.
Welcome to Region 6 of the CREEC Network

REGIONAL HIGHLIGHTS:

Climate Change Presentations for High Schools.

Forestry Institute of Teachers (FIT) is a special summer opportunity for K-12 educators

San Joaquin County Earth Day Festival

Education and the Environment Initiative
The K-12th grade curriculum is comprised of 85 units teaching select Science and History-Social Science academic standards.

Nature Bowl 2011, Engaging youth in science, conservation, and citizenship,

http://www.creec.org/region6/

Calaveras High School

The Earth Club is a student-run club whose goal is to raise the awareness of Earth issues...that teach them to be responsible global citizens.

Earth Club’s first field trip for the 2010-11 school year was out to West Point where we met with representatives from the Global Arc Project touring the west coast promoting research and education in sustainable practices.

We got a tour of SoiTrekker, a bio-diesel, solar powered, rainwater collecting, composting van that symbolizes the future of the planet if we are going to survive through this century.

http://wwwstatic.kern.org/gems/region6b/CalaverasClub.pdf

The children are being scared, indoctrinated and culled in accordance with their usefulness to the New Order.
Can you see the plan for children?

Amador County, CA
March 10, 2011

The Global ARC
Global Action Research Center

Celebrating Sustainability Solutions in the Sierras
Journey of the Global ARC 2010

Local Host
Amador-Calaveras Consensus Group

On this 3-day Journey stop we will learn from the leaders and participants of the Amador-Calaveras Consensus Group. Led by Calaveras County Supervisor Steve Wilensky, this Group is dealing with very serious problems found throughout the Sierra Nevada: watershed and ecosystem degradation, catastrophic wildfire danger, high unemployment, waste of forest material, the energy crisis and climate change. The Group is ambitious. They seek holistic and integrative solutions with an understanding of how local, regional and global forces interact.

Presented by FreedomAdvocates.org

Solutions

The Calaveras stop on the Journey of the Global ARC will focus on the process model and solutions championed by the Amador-Calaveras Consensus Group. This includes community-based efforts to: (1) establish a skills training program, (2) create green jobs (using small wood and forest byproducts) for displaced timber workers…

Overarching Themes and Questions

…knowledge sharing helps participants interrelate otherwise scattered pieces of the sustainability puzzle, (2) to generate useful materials for Global ARC’s solutions database and our digital library, and, (3) most importantly, to inspire and cross-fertilize progressive community-based approaches to planning that merges the power of science, business and art, including music, in powerful new ways. We aren’t starting from scratch.
The school system is indoctrinating our children into global citizenship through a commitment to globalist ideology. They are not being taught the values of the American experiment.

Why do parents succumb?

Our response needs to be: Understand and recognize Sustainable Development locally and spread that understanding to others. We are not going to be salvaged by any existent political organization. Average Americans must understand and act to restore their area as the land of the free. There is no profit or power in Sustainable Development’s exposure. There is only freedom for you, and me... and our children.
Consider what has been illustrated here today – Regionalism, The Wildlands Network, Smart Growth, Public Private Partnerships, Sustainable Communities, Sustainable ideology, and Education for Global Citizenship.

Agenda 21 people are organized even as their active drones don’t know what they are organized around. Agenda 21 shows itself everywhere you look.

Do you think our politicians and bureaucrats are serving us?
