

Let's attack the root of the problem:

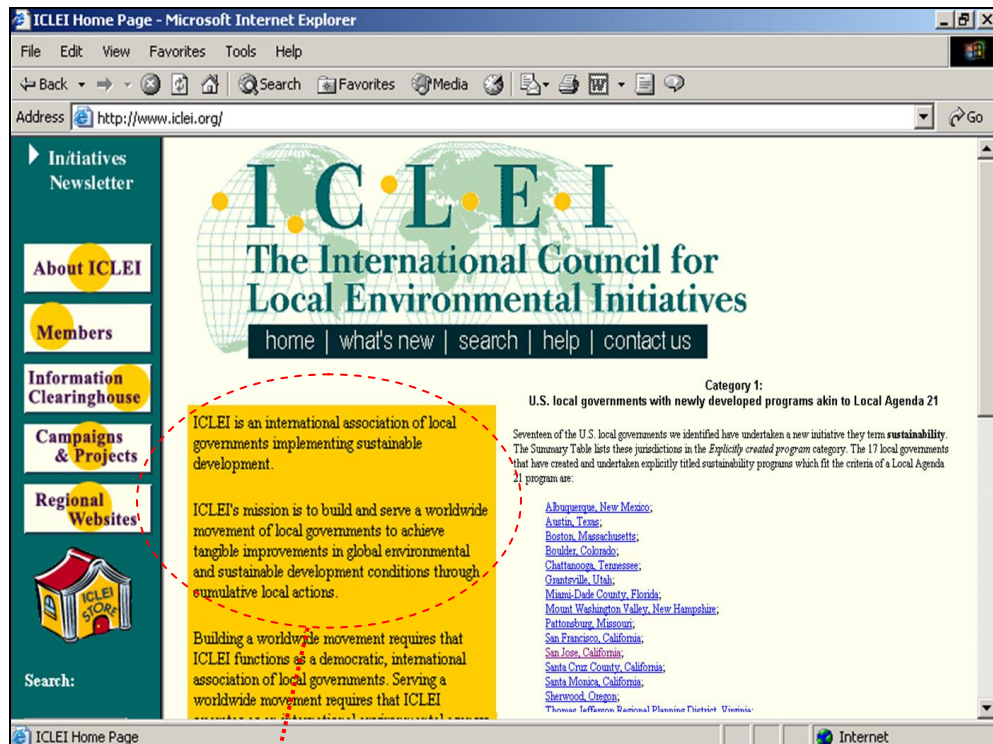

- Learn to recognize the local and broader patterns and tenants of Agenda 21. This way you can fight back with insight, starting where the attack all around you is happening and where you can win – at the local level.

The Globalist invasion is happening right under our noses. Every county in America has its local Agenda 21 implementation underway.

Let's examine aspects of the 'Local Action' Plan:

ICLEI

This is the most vulnerable globalist organization operating in America today.

[Advance PPT]

ICLEI is the international environmental agency for local governments.

ICLEI's mission is to build and serve a worldwide movement of local governments to achieve tangible improvements in global environmental and sustainable development conditions through cumulative local actions.

The full name of ICLEI is “The International Council for Local Environmental Initiatives”. It is also called “Local Governments for Sustainability”.

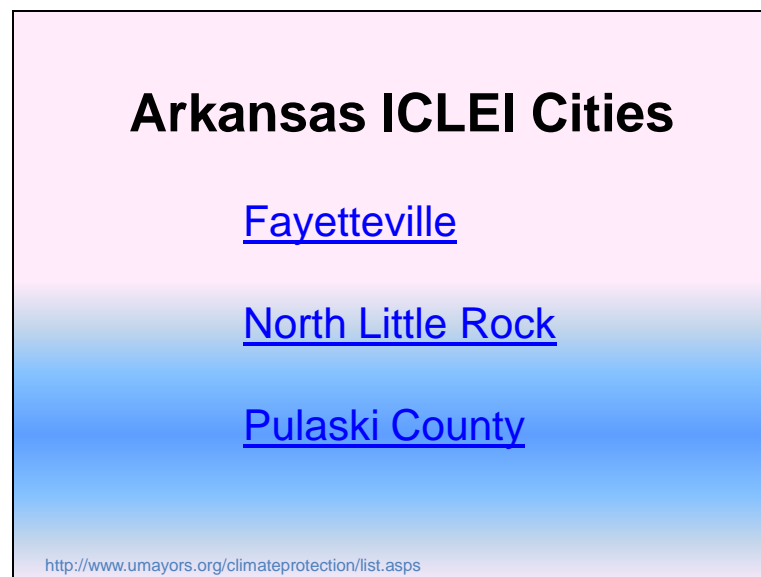

ICLEI is an important NGO that:

- Closely ties policy to man-made Global Warming and climate change.
- Has formed an international Congress filled with city and county representatives. This Congress acts as a shadow World Government.
- Directs Community Development and other local agencies and provides statutory and regulatory provisions that implement Sustainable policy locally.

Local tax funds pay the contract fee. Agenda 21 policy-making is fully embedded upon ICLEI’s arrival. At least 600 cities, including Bloomberg led New York City, from all across the nation, have ICLEI contracts. Local governments have been hijacked by world government agents.

Each ICLEI city's influence is expanded as ICLEI then automatically steers Regional Air, Transportation, Water Boards and many other "regional" transformational governance apparatus such as the *Arkansas Watershed Advisory Group (AWAG)*.

Article 1 Section 10 of the U.S. Constitution makes the following prohibition: "No state shall enter into any Treaty, Alliance or Confederation" with a foreign political entity. Neither may a city. Ask: Is it treasonous for city leaders to contract with ICLEI an International NGO and U.N. related organization? Yes! ICLEI contracts are treasonous.

Contracts with ICLEI guarantee implementation of international political and economic policy at the local level. Drive city alliances with ICLEI out of the communities surrounding you.

Where's the Sheriff? It is time for good Sheriffs to take action! Ridding towns of ICLEI is more important to the future of America than was the Sheriff's role in ridding the west of rustlers and train robbers! If Sheriffs are America's last hope, we need Sheriffs to start Kicking ICLEI Out of communities. City attorneys and County Counsel's offices also have a role to play. Their duty *is* as a fiduciary to you. Failure to protect you from ICLEI breaches their fiduciary duty and makes them liable to citizens.

So much of the Agenda 21 invasion at the local level relies on the man-made global warming fraud. But the unraveling of this masquerade has not yet hit the local political scene. ICLEI is particularly vulnerable because of general public awareness concerning the 'man-made warming' fraud. For several reasons citizens need to react to ICLEI soon! Now *is* the time.

Residents in Spokane Washington and various cities in the Colorado plains are taking on their city's contract and contract with ICLEI as other localized rebellions brew. You can do this too. We are following the *Kick ICLEI Out!*, campaign at FreedomAdvocates.org.

I am going to sample the Arkansas and Northern Arkansas area and pull examples of Agenda 21 Sustainable Development as it routinely pops up on the local scene. Most hometown participants think they are doing something unique, others think they are doing something for mankind – well – they are. They are putting mankind on the verge of serfdom.

You can recognize globalism operating at the local level by recognizing the themes and programs presented by the local Action network and understanding them in the context of Agenda 21.

Regionalism is the watchword. It is a core aspect of Sustainable Development. Regionalism might sound

benign, but the consequences that come as a result of political regionalism must be understood by freedom loving people or liberty will be trampled. Regionalism is being used to destroy traditional boundaries and usher in a transformed system of governance that abolishes private property; a goal of Sustainable Development Agenda 21.

In the words of Charlotte Iserbyt former Department of Education Official, “Regionalism is Communism”. It erases political boundaries and thus representative government. Regional governance cannot coexist with a Republic form of government.

Let’s start by viewing a local regional council. The *Arkansas Watershed Advisory Group (AWAG)* is a statewide soviet-style council that develops policy that is then rubber-stamped by elected officials, with no meaningful public discourse. The policy ends up destroying land owners’ use of water. In the

regionalization process, control of water is transferred from land owners to multi-national corporate and/or government control agents, who then begin their work to achieve sustainable development objectives which include severe limitations on individual water use.

AWAG Arkansas Watershed Advisory Group

<http://www.awag.org/index.html>

About AWAG
The Arkansas Watershed Advisory Group was formed to assist... citizens and organizations by promoting local... watershed management and conservation.
... to better address the public's needs concerning our water resources... the Arkansas Watershed Advisory Group have been partly funded by a series of Environmental Protection Agency 104 (b)(3) grants.

Gulf of Mexico Alliance
We have added a new link in our [Links](#) section pertaining to education and activities in the Gulf area.

The Gulf of Mexico Alliance is a federal assault on the sovereignty of the southern states, endorsed by the legislature.

Gulf of Mexico Alliance

The Gulf of Mexico Alliance
A regional partnership formed to implement the U.S. Ocean Action Plan in the Gulf of Mexico. The public Website posts activities of the Priority Implementation Teams including: Coastal Community Resilience, Ecosystems Integration and Assessment, Environmental Education, Habitat Conservation and Restoration, Nutrients and Nutrient Impacts, and Water Quality.

<http://www.epa.gov/gmpo/>

There is a grand collaboration working to change water policy in a way to gain control over your water and further sustainable development and smart growth objectives.

The purpose is to consolidate (“collaboration”) the global and regional effort to conspire against the idea of private property. This is done, in part, by advocating and establishing a system of “partners” who will cooperate with the new world order.

[Regionalism, Globalism!]

My hometown county of Santa Cruz has similarly mapped the drainage outlets to the Monterey Bay National “Sanctuary.” This was more than 5 years ago. Now government agencies, together with associated

non-profits, NGOs and academic collaborators, have developed a program to control all “non point pollution” sources. This means controls over water use, including over all activities that have a potential for affecting rainwater drainage or agricultural irrigation drainage.

The Core Methodology -- Regionalism

The Mississippi River basin drains approximately 41% of the land area of the conterminous United States, ranging as far west as Idaho, north to Canada, and east to Massachusetts.

NOAA=
National
Oceanographic
& Atmospheric
Administration

Regionalism practiced by organizations like AWAG produces policy and strategy for the state of Arkansas. These organizations exist to advance the globalist goal to abolish private property, promote the relocation of people from Wildlands and corridor areas and the conscription of public private partners – the *mandatory volunteers* of the new fifth column.

Who's in charge – the watershed authority or your local county? That's the question.

County View/Boundary Lines:

The screenshot shows the homepage of [ArkansasWater.org](http://arkansaswater.org). The header features the site's name in a large, stylized font with the tagline "Your one-stop for Arkansas water quality information". Below the header, the text "ArkansasWater.org" is followed by a description: "ArkansasWater.org compiles and shares water quality information and resources." A central box titled "Open County/Watershed Selector" contains a map of Arkansas with county boundaries. To the right of the map are two dropdown menus: "Select a... County" and "Watershed". Below the map is a "Select County..." link. At the bottom of the page, a paragraph explains the funding for the website, mentioning the Environmental Protection Agency (EPA), the Arkansas Natural Resources Commission (ANRC), and the Arkansas Association of Conservation Districts (AACD). A URL is provided at the very bottom: http://arkansaswater.org/index.php?option=com_frontpage.

You are being “Communized”. Here’s where Arkansas will be if you let this continue.

Watershed View/Boundary Lines:

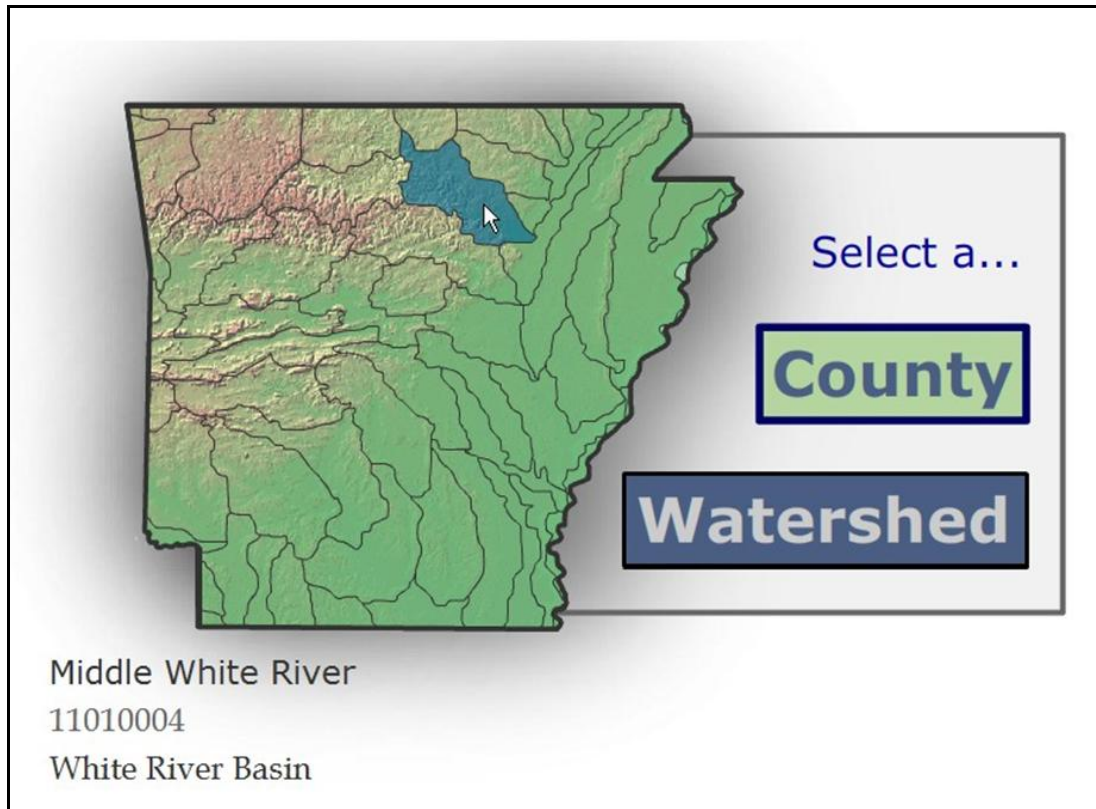

There are 3 watersheds within IZARD County (your county):

- [Middle White](#)
- [North Fork White](#)
- [Strawberry](#)

[PPT automatically advances]

Middle White Watershed:

Despite the existence of legitimate reasons for mapping watersheds and river basins, this kind of mapping is part of a nefarious globalist Sustainable Development Action Plan.

What this 'Action' is intended to accomplish is give policy makers the opportunity to impose "watershed" restrictions, massive restrictions on any land based

activity. You will see how this begins the process of ridding rural landscapes of free enterprisers and private property owners.

This is the organization that monitors the watershed activity so that ultimate control of the resource can be centralized.

Why the country is going broke. Part of the plan.

Monitor and Control – Abolishes private property.

About Us

WCRC provides specialized assistance concerning watershed resource issues to a variety of organizations including; watershed groups; local, state and federal governments; non-profit organizations; conservation districts; and other entities that request assistance.

- ° Watershed assessment
- ° **Water quality monitoring**
- ° Stream stabilization and restoration
- ° GIS mapping and natural resource database development
- ° **Environmental data collection**
- ° Watershed plan development

The watersheds are used to grab regional control and that's how they grab private property. Water can be used to control all land use activity. If the forces of power achieve this planned outcome, we as individuals become chattel. Control the water, control the people.

Eco-Tourism

**Arkansas Association of Resource
Conservation and Development Councils, Inc.**

**Ecotourism Development
Manual**

Traditional tourism is very important to the economy throughout NW Arkansas. However, in recent years there has been an increasing interest in a different kind of tourism – Ecotourism. Ecotourism is defined as "Purposeful travel to natural areas to understand the cultural and natural history of the environment, taking care not to alter the integrity of the ecosystem, while producing economic opportunities that make the conservation of natural resources financially beneficial to local citizens.

<http://www.aarcd.org/organization/projects/nw/tourism.htm>

[Money for ecotourism by abolishing private property. We are being treated as cattle as our Wildland areas are being taken in a Globalist takeover. The Resource Conservation Districts and the NRCs are fully committed to Agenda 21's AG policy.]

There will be no Ecotourism, because people who can't afford a car in California aren't going to come to see your historic sites in Arkansas.

[And people in Arkansas living under the philosophical pinnings of Globalism including Regionalism, Earth Worship, the Abolition of Private Property, and Control over Human Action (or Social Justice and Public Private Partnerships) are not going to continue as middle class, making it difficult for them to travel as well.]

Historic Preservation

Private property; includes your person, your thoughts and your **relationship** to *something*. By relationship I mean the power to use and enjoy that thing.

Historic Preservation brings restrictions not just on the use and enjoyment that come about on the buildings that are required to be preserved, but also on land uses of all of the surrounding land. In general, the courts no longer regard the protection of private property as critical to a free society. They don't pay attention to the step by step process of abolishing private property!

***Theft of
Private
Property***

**NATIONAL
TRUST
FOR
HISTORIC
PRESERVATION®**

SUSTAINABILITY AND HISTORIC PRESERVATION

Going Renewable

Appropriate siting of energy infrastructure protects – and powers – historic places.

[READ MORE](#)

Our Position on Sustainability [Learn More](#)

Historic preservation can – and should – be an important component of any effort to promote sustainable development. The conservation and improvement of our existing built resources, including re-use of historic and older buildings, greening the existing building stock, and reinvestment in older and historic communities, is crucial to combating climate change.

[Click – advance PPT]

Our Commitment

Focus on Local, State and Federal Policy: The National Trust for Historic Preservation will work with several cities to develop model policies that encourage preservation as sustainable development. This work will include refining building, energy and zoning codes, as well as developing model language for comprehensive plans and climate change action plans. . . .

[Click – advance PPT]

Empower Preservation Practitioners: . . . This will include development and dissemination of best practices and other guidance for greening older and historic buildings.

<http://www.preservationnation.org/issues/sustainability/>

Scenic Byways

What could sound more friendly and beneficial than Scenic Byways? It has the sound of bucolic, small town scenic back roads being preserved for those quiet drivers. But this is another program that ends up costing land owners their property rights.

If you're in a Scenic Byway, you can't control your property. The government can control everything you do if they conclude your property can be seen along the Scenic Byway. The road's "Viewshed" – everything visible through your car windows – can include distant mountains, farmland, homes and other property miles away. This is another way of abolishing one's right to the use of private property.

ARKANSAS STATE HIGHWAY AND TRANSPORTATION DEPARTMENT

Scenic Byways Program

The Arkansas Highway Commission adopted criteria by which routes in Arkansas could be designated as Arkansas Scenic Byways.

Scenic Byways

- [Sylamore Scenic Byway](#)

Designation Criteria

The route must be designated as a "scenic highway" by the State General Assembly.

http://www.arkansashighways.com/scenic_byways_program/scenic_byways_program.aspx

[Click – advance PPT]

Designation Criteria

An active organization composed of various private and governmental groups, businesses, and agencies who are interested in preservation, enhancement, marketing, and development of the route's scenic, cultural, recreational, and historic qualities must be established.

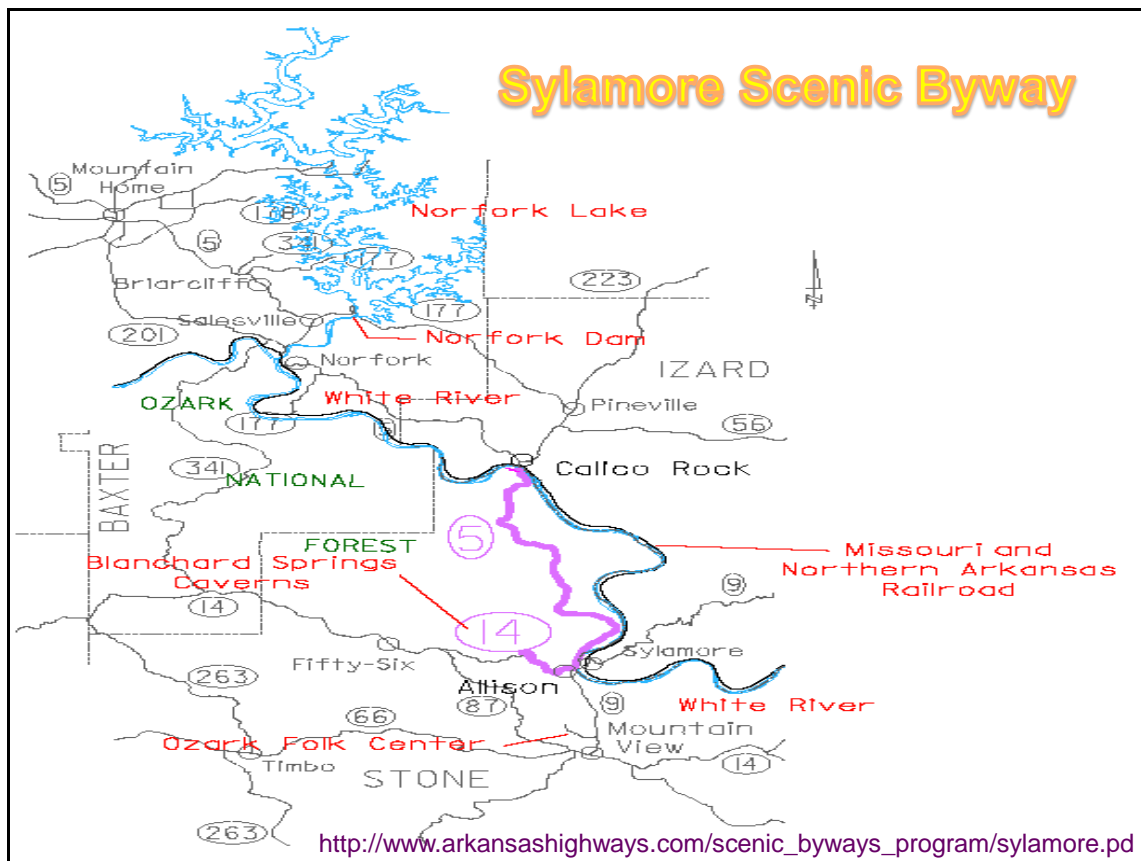

[Click – advance PPT]

Designation Criteria

The route's corridor must contain abundant scenic, cultural, recreational, and/or historic qualities that would be of interest to tourists.

Historic Preservation and Scenic Byways play into each other.

The Sylamore Scenic Byway – local scenic byway:

Along with Scenic Byways, Sustainable policy calls for biking and walking corridors. This isn't the plan for just here in Arkansas, it's happening everywhere.

[Here comes your Pedestrian planning...
Our new mode of transportation, not recreation, is
bicycles and footpaths.]

But I don't know anyone who uses bicycles for
transportation. Bicycles are used for recreation.

ARKANSAS STATE HIGHWAY AND TRANSPORTATION DEPARTMENT

Bicycle and Pedestrian Coordination

... bicycling and pedestrian activities are increasingly being rediscovered for their transportation value.

Today, the Federal Highway Administration (FHWA) and a growing number of Federally-funded agencies and organizations actively promote Bicycle and Pedestrian Transportation.

FHWA encourages communities to plan for multiple modes of transportation and a **Complete Streets** or **Smart Growth** model can help. The outcome is a more bikeable and walkable community. Development patterns that result... encourage walking, bicycling and transit use while continuing to accommodate motor vehicles.

http://arkansashighways.com/planning_research/statewide_planning/bicycle_pedestrian_planning/bicycle_pedestrian_planning.aspx

Bicycle and Pedestrian Coordination is an
infrastructure highlight for a “Sustainable” society that
has abandoned private property, constrained and
controlled mobility, and one that has abandoned
individuality.

The youth are being prepped for Global Citizenship and the effort is working. In polling we learned that last year a majority of 2009 high school and college grads identify themselves as “global citizens” not as Americans. Sustainability is being jammed down every youngster’s throat. The future is at risk.

AWAG Arkansas Watershed Advisory Group

Bring the environment into your classroom and still meet today's standards!

Education Connections

The guide is designed to meet the common components of **national education reform** by using the **constructivist approach** to learning, **whole language teaching**, **cooperative learning**, **problem solving**, and **authentic assessments**.

<http://www.awag.org/education.html>

People wonder why the youth aren't performing. Where's the learning? Where are the facts?

The school system is indoctrinating our children into global citizenship through a commitment to globalist ideology.

Why do parents succumb?

The following listing incorporates those elected officials who give their support to ICLEI global warming policy. These people need to be voted out of office.

Arkansas Mayors for Climate Change	
Dani Joy	Eureka Springs
Goheld Jordan	Fayetteville
Raymond Baker	Fort Smith
Mark Stodola	Little Rock
Patrick Hays	North Little Rock

Things like ICLEI's climate change "Best Practices" account for the federal government's financial condition. States and municipalities also commit massive resources to the policy commitments that fuel the Globalist transformation.

**President of ICLEI USA wins major climate award
June 23, 2010**

Mayor Hays, who is also a member of the [World Mayors Council on Climate Change](#) accepted the Small City category award (Chicago won the Large City award) at the U.S. Conference of Mayors annual meeting in Oklahoma City and offered some advice to colleagues:

Mayor Patrick Hays
at Resilient Cities 2010
Bonn, Germany, in May

Take incremental steps, build momentum and then watch change take root.

By coming together for a **common cause** and being proactive, local governments can—and have—**influenced state, federal, and international policy makers**.

As the President and Board Chairman of ICLEI-Local Governments for Sustainability

USA, Mayor Hays is recognized worldwide, in all levels of government, as one of the most **vocal leaders** in support of local government **climate action**.

"former"

http://www.worldmayorsagreement.com/index.php?id=1487&tx_ttnews%5Bpointer%5D=5&tx_ttnews%5BpS%5D=1262336077&tx_ttnews%5B%5D=7768

[ICLEI is a foreign organization and important NGO that closely ties policy to man-made global warming and climate change... ICLEI is on a mission to transform local government and steers regional transformation governance apparatus...]

People across America need to realize that the man-made global warming charade is being used to drive local policy to usher in globalism in transition from the American way.

Consider what has been illustrated here today – The Wildlands Project, Smart Growth, Regionalism, the Three Es, Sustainable Communities and Sustainable ideology, Monitoring methods, and Education for Global Citizenship.

Agenda 21 people are organized even as their active drones don't know what they are organized around. Agenda 21 shows itself everywhere you look.

Do you think our politicians and bureaucrats are serving us?
