

Let's attack the root of the problem:

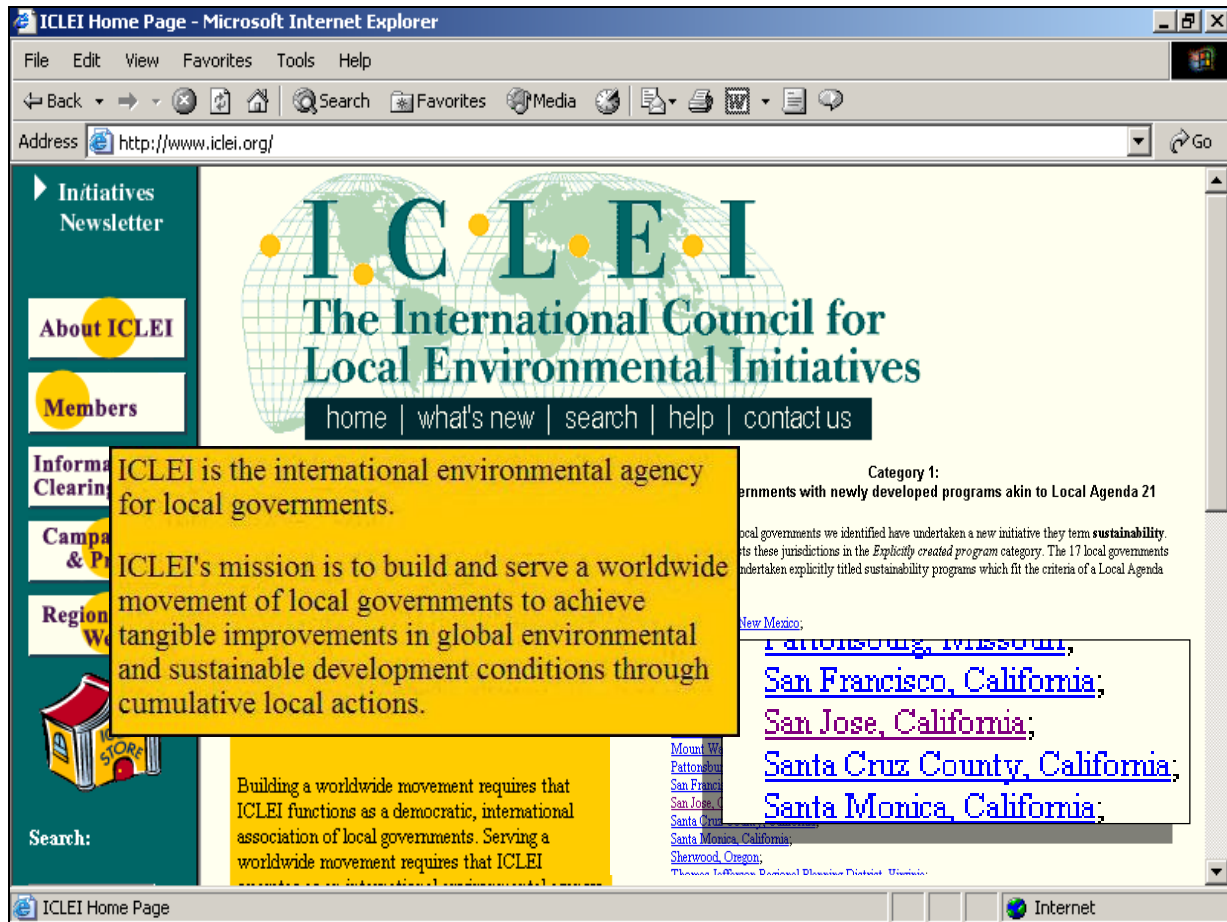

- Learn to recognize the local and broader patterns and tenants of Agenda 21. This way you can fight back with insight.

The Globalist invasion is happening right under our nose. Right here on the Olympic Peninsula!

Let's examine aspects of the 'Local Action' Plan:

ICLEI

This is the most vulnerable globalist organization operating in America today.

The full name is “The International Council for Local Environmental Initiatives.” It is also called “Local Governments for Sustainability.”

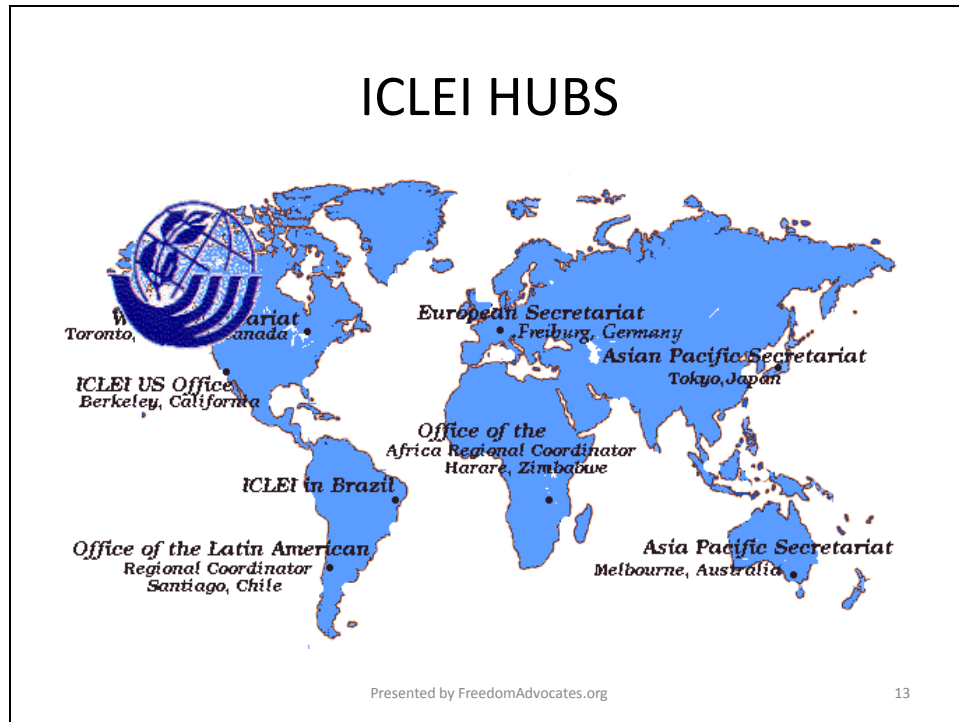

ICLEI is an important NGO that:

- Closely ties policy to man-made Global Warming and climate change.

- Has formed an international Congress filled with city and county representatives. This Congress acts as a shadow World Government.
- Directs Community Development and other local agencies and provides statutory and regulatory provisions that implement Sustainable policy locally.

Local tax funds pay the contract fee. Globalist policy-making is fully invaded upon ICLEI's arrival. Seattle was an early participant but now it is not alone. 600 cities, including Bloomberg led New York City, from all across the nation, have ICLEI contracts. Local governments have been hijacked by world government operatives.

Each ICLEI city's influence is expanded as ICLEI then automatically steers Regional Air, Water Boards, and many other "regional" transformational governance apparatus.

ICLEI has contracts with King County, Olympia, Shoreline, Seattle, Sequim, Clallam County, and Port Townsend. There are 34 city and county contracts in effect in this state. A full list is available.

Article 1 Section 10 prohibits: “No state shall enter into any Treaty, Alliance or Confederation” with a foreign political entity. Neither may a city. Ask: Is it treasonous for city fathers to contract with ICLEI, an International NGO and U.N. related organization? I think so.

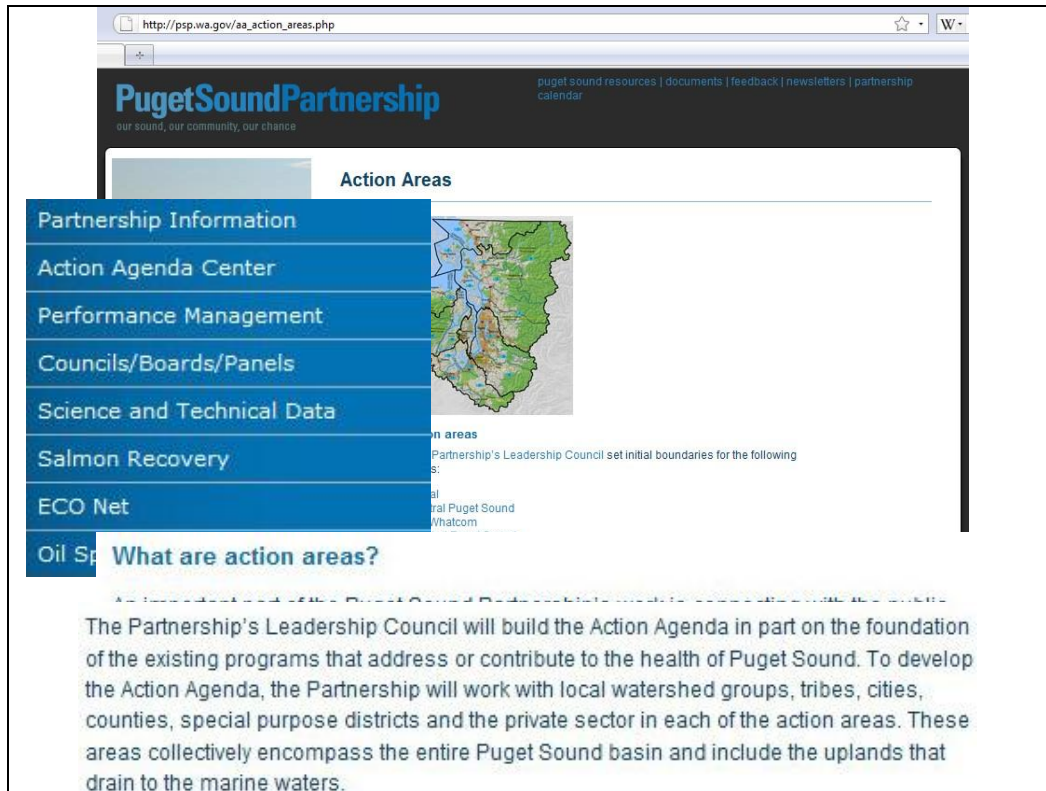

In any event, contracts with ICLEI guarantee implementation of international political and economic policy at the local level. Drive city alliances with ICLEI out of Washington and out of all of America.

Where's the Sheriff? It is time for good Sheriffs to take action! Ridding towns of ICLEI is more important to the future of America than was the Sheriff's role in ridding the west of rustlers and train robbers!

So much of the Agenda 21 invasion at the local level relies on the man-made global warming fraud. But the unraveling of this masquerade has not yet hit the local scene. ICLEI is particularly vulnerable because of public awareness of the warming fraud. Citizens need to react soon! Now *is* the time.

Residents in Spokane, Washington and various cities in the Colorado plains are taking on their city's contract and contract with ICLEI as other localized rebellions brew. You can do this too. We are tracking the Kick ICLEI Out! campaign at FreedomAdvocates.org.

I am going to identify some of the Agenda 21 operatives working to create the globalist objectives here on the Olympic Peninsula. The first organization is the Puget Sound Partnership.

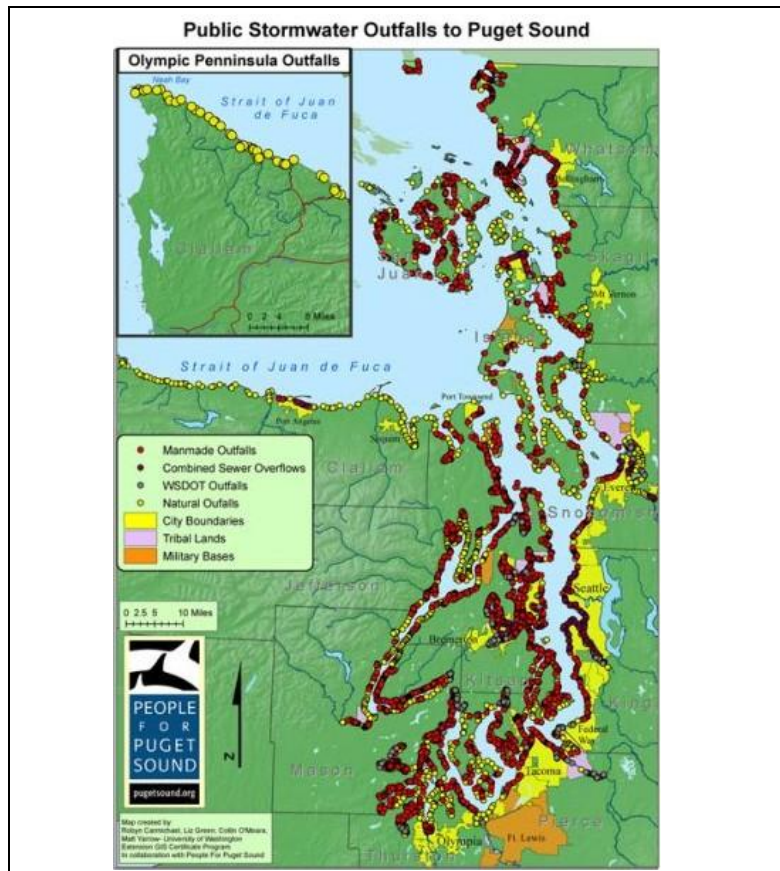

The word “Action” is the local red light call to arms by those working wittingly or unwittingly to abolish private property through Sustainable policy. Where I live the equivalent organization to this is *Action Pajaro Valley*. Discovery of their internal documentation reveals that

the word Action is an acronym for “Agenda 21; Community Teamwork In Operation Now” (ACTION).

Leadership councils are not unique to the Puget Sound. Santa Cruz has run continuous seminars for recruiting “leaders” from the business community to partner with government often for the purpose of creating new non-profit councils in order to further the transformation of America. Under the emerging system the political-economic system is to be run by “public-private” partners as in economic fascism. Globalism is not simply a left wing movement!

Another organization, People for Puget Sound, issued a map that has been described as: *“Poisons in Puget Sound: Where they come from.”*

Despite the existence of legitimate reasons for mapping storm drains, my experience is that this kind of mapping is part of a nefarious Action Plan.

What this 'Action' is intended to accomplish is give policy makers the opportunity to impose "watershed" restrictions, massive restrictions on any land based activity. You will see how this begins the process of ridding rural landscapes of free enterprisers and private

property owners. This missive will be an engine in the effort to finalize the takedown of the Olympic Peninsula. The Peninsula is scheduled to become, to the extent it is not already, a Wildlands Network zone with some buffer zones surrounding the core Wildland.

Santa Cruz County has similarly mapped the drainage outlets to the Monterey Bay National “Sanctuary.” This was more than 5 years ago. Now government agencies, together with associated non-profits, NGOs and academic collaborators, have developed a program to control all “non point pollution” sources. This means controls over water use, including over all activities that have a potential for affecting rainwater drainage or agricultural irrigation drainage.

If the forces of power achieve this planned outcome, we as individuals become chattel. Control the water, control the people.

Remember government powers are *granted* under the Constitution – they cannot just be **taken** by a narrow mob, with political front men, seeking power and control over resources.

An example, of course, is the Olympic Wilderness.

Under what authority do these designations originate? Government parks should be determined and owned by states and or local governments. There is no federal authority for the ownership and management of parks.

Today, many people think the Global Warming charade has faded. Average Americans have reconciled the claimed catastrophic temperature rise with their personal experience that it is not getting hotter. That reconciliation came with the email-gate disclosure that the U.N.'s Panel of Climate Change was 'creating' their findings and that the "science" was a fraud. The subject is over.

Not quite. It is not only ICLEI that depends on perpetuation of the Global Warming fraud. Washington State Department of Ecology also peddles Global Warming as the excuse for their policies.

The screenshot shows a web browser window with the address bar displaying <http://www.ecy.wa.gov/climatechange/partners.htm>. The browser's address bar also shows "Climate Change Partners | Washingto...".

A notice at the top of the page states: ">NOTICE: Ecology is closed July 12, 2010 due to mandated temporary lay-offs. [More info...](#)".

The page header features the Washington Department of Ecology logo and the text "DEPARTMENT OF ECOLOGY State of Washington". To the right of the logo is a search bar with a "GO" button. Further right are links for "A-Z Index" and "Contact Us".

The main navigation bar includes links for "Home", "WATER", "AIR", "WASTE", "CLEANUP", "TOXIC HAZARDS", "GREEN", "About Us", and "Jobs". Below this is a secondary navigation bar with links for "Programs", "Services", "Publications", "Databases", "Laws & Rules", "Public Calendar", and "Public Records".

The main content area has a large "Climate Change" header. On the left side, there is a sidebar menu with the following items: "FACING CLIMATE CHANGE", "Policy Framework", "Understanding GHG Emissions", "Reducing GHG Emissions", "Preparing for Impacts", "National & Regional Leadership", "Washington's Clean Energy Economy & Jobs", "Climate Education", "Partners", "Contacts & Comments", "Reports", and "Resources".

The main content area displays the "Climate Change Partners" page. It includes a breadcrumb trail: "Climate Change > Partners". The page title is "Climate Change Partners".

The section "Washington State & the Northwest" lists the following partners and resources:

For several decades, people have accepted that we had entered the era of man-made climate change. First we were told the earth was cooling. Later we have been told the earth was warming. Both conclusions were said to be due to the activities of modern man. A consensus driven determination in order to impose belief of an impending gloom, they thought, would justify a universal political-economic transformation.

The world got the news of the scientific climate change fraud last fall via the climate gate email scandal with the U.N.'s Intergovernmental Panel on Climate Change. Yet the state of Washington has its core governance policy still tied to the man-made changing climate nonsense.

Sustainable Washington 2009: Planning for Climate Change

An expanding online resource you can use and contribute to.

Sustainable Washington 2009: Planning for Climate Change is a continuation and extension of the [Livable Washington](#) initiative of the Washington Chapter of the American Planning Association. This site is intended as a resource for Washington planners as we work toward creating sustainable communities while attempting to develop adaptation and mitigation strategies to address the impacts of climate change.

This web-based resource consists of several parts:

- An extensive [online resource document](#), including background on the issues, actions planners can take, and the role of GMA and state initiatives;
- An 8-page Executive Summary, which also serves as a mailer and public information piece;
- An expandable [wiki](#), which includes case studies and information on a wide array of initiatives and approaches to planning for sustainability and climate change.

Sustainable Washington is not just a static website; the [wiki](#) in particular is an expanding online resource which allows you to share your own stories and experiences with others. Please feel free to explore — and add your own content! Send your additions or revisions to Keith Maw at kmaw@ci.lynnwood.wa.us.

We welcome your comments, suggestions for changes, and information for updates. Please send any comments to: SusWAComments@washington-apa.org.

There is no surprise that the American Planning Association is an NGO. That means they are accredited by the United Nations for purposes of advancing Agenda 21 Sustainable Development. Their effort for decades has been to build an army of agents whose first calling is the incremental abolition of private property. Your local Department of Community Development is comprised of people who are active members of the APA.

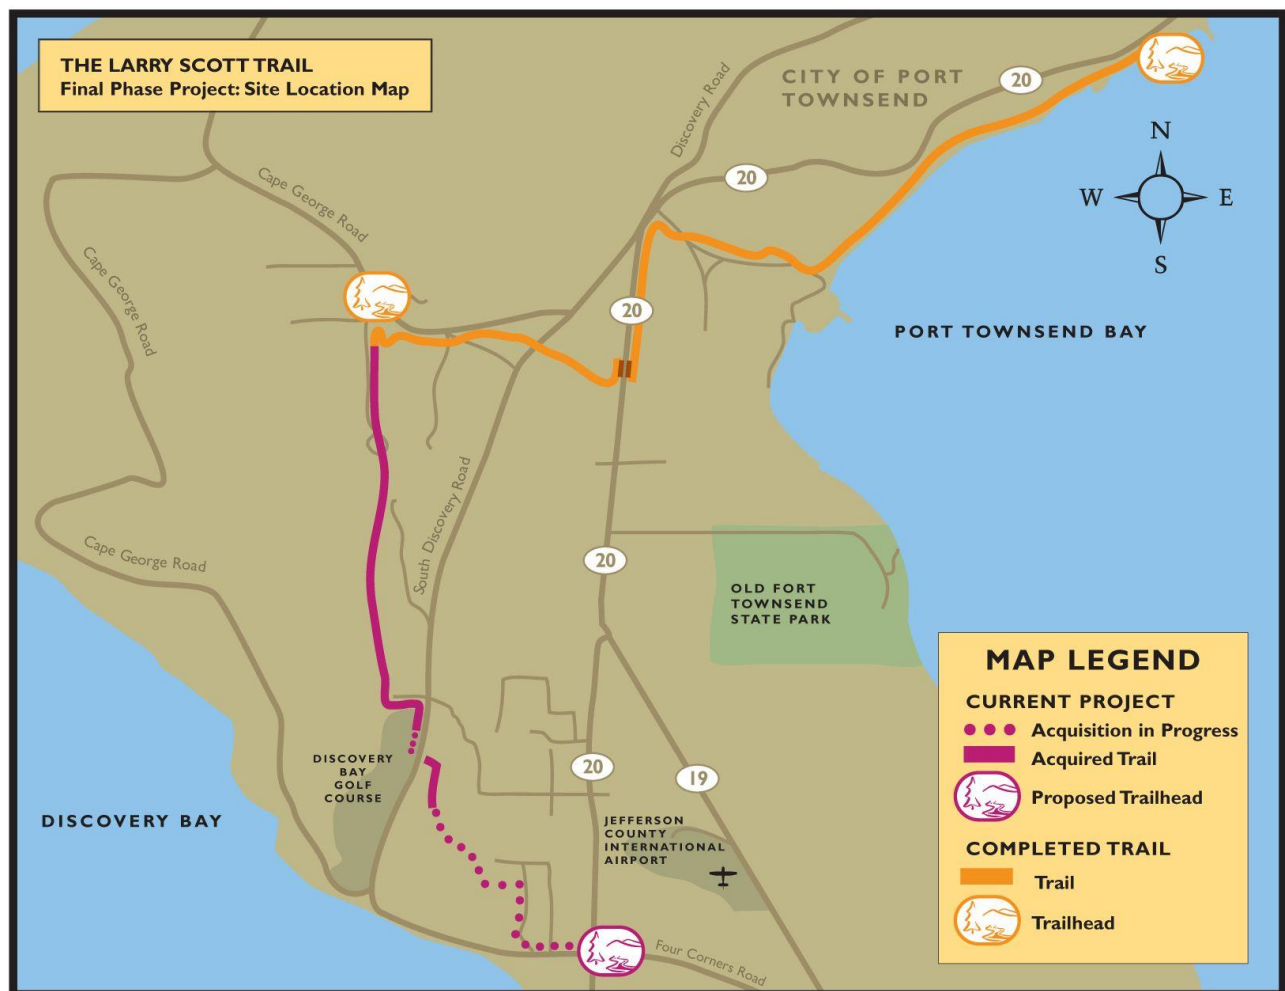

I have not before seen so forward a public approach by the APA. They must think they have a cheering squad.

Only fools are the cheerleaders of the APA.

No one will be spared when globalism takes full hold. If, or when, humans become chattel of ruling elite, even those who jockey today to become our slave masters or our feudal lords will become themselves chattel of ruling elite.

Get to know your local American Planning Association chapter. Attend their fall forum. Gather information. It will pay off.

Let's talk about "the trail".

Wikipedia (en)

The Olympic Discovery Trail - An alte...

From the North Olympic Peninsula:
The Olympic Discovery Trail – helping create 'livable' communities at taxpayers' expense

By Sue Forde, Citizen Review Online
www.citizenreviewonline.org

Clallam County, WA – May 23, 2002 – A fresh outcry has been heard lately as a new group of landowners is being pinpointed for the North Olympic Trail across or near their properties. Near Port Angeles, approximately 45 residents made an uproar when presented with county designs near their property. The neighbors petitioned county commissioners to reconsider the trail location. It's going through anyway.

In Sequim, residents on several streets in the northeast part of the city have opposed trail proposals for their neighborhoods. The city moved forward with accepting a bid for the trail, "partly because of pressure from the state DOT [Department of Transportation] officials on use of the grant money".

Citizens along Sequim Bay Road just east of Sequim aren't happy either. They don't want a trail crossing their property or even being close to it. It's going there, too.

This isn't the first time that people have had to accept the trail near their property despite their protests against it. Over the years, as the trail has been pieced together, there have been other protests, to no avail.

Politicians and other agents of Agenda 21 are inundating us with overlapping schemes that quietly and deliberately drown our property rights and freedom. For surefire evidence, take a look at the plot that is outlined in the [U.S. Congress - H.R. 5101 Wildlife Corridors Conservation Act of 2010](#). This bill includes transboundary tax-payer funded projects for wild animal bridges and tunnels, increasing roadless areas and other means to capture more natural resources and private property for government and its partners.

H.R. 5101 states that, "The Secretary, in cooperation with the States and Indian tribes, shall develop a Habitat and Corridors Information System, that shall include maps and descriptions of projected shifts in habitats and corridors of fish and wildlife species in response to climate change; and to assess the impacts of existing development on habitats and corridors." The System is charged with identifying, prioritizing and describing "key parcels of non-Federal land (i.e., state lands and private property) located within the boundaries of units of the National Park System, National Wildlife Refuge System, National Forest System, or National Grassland System that are critical to maintenance of wildlife habitat and migration corridors." This is way over and above what the federal government has already swallowed up under other guises.

Does anyone smell collectivism? Do you think private property is being abolished? Do you think a new system is being designed to reorder our society?

A thousand points of darkness are descending upon us. If we understand Agenda 21's Action Plan, then we can restore Liberty without fighting a thousand battles. Cut off Agenda 21 at its head; *Defeat local implementation of Agenda 21!*

Washington State urgently requires a new political direction with new political majorities. And you need them soon! The good news is this state has begun that process. Washington has legislators including Joel Kretz, Shelly Short, Matt Shea, Jan Angel, Dan Christiansen and Senator Bob Morton that understand Agenda 21.

And so do many of you and a growing legion around the state.
