

The Ultimate War: Globalism vs. America

by Michael Shaw
President, FreedomAdvocates.org

Part II
Agenda 21 in Sonoma County, CA
August 6, 2011

You can learn to recognize the local and broader patterns and tenants of Agenda 21. This way you can fight back with insight, starting where the attack all around you is happening and where you can win – at the local level.

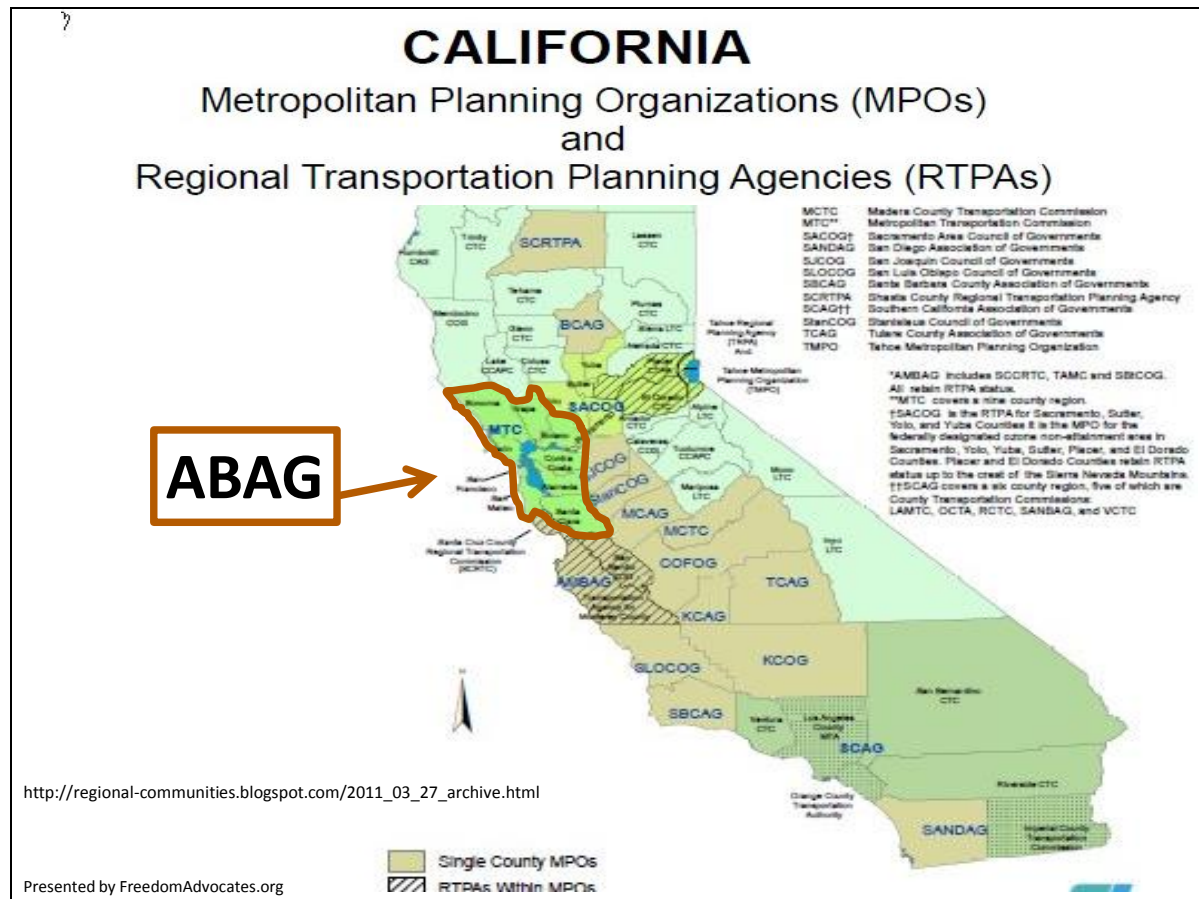

The Globalist invasion is occurring right under our noses. Every county in America has its local Agenda 21 implementation underway.

What I am going to do for the next 45 minutes or so is demonstrate the operation of Agenda 21 in Sonoma, the Bay Area and Central California generally.

Association of Bay Area Governments (ABAG)

ABAG is a Council of Governments (COG) and a member of CALCOG.

Association of Bay Area Governments

About ABAG

The Association of Bay Area Governments (ABAG) is the regional planning agency for the nine counties and 101 cities and towns of the San Francisco Bay region. ABAG is committed to lead the region through advocacy, collaboration, and excellence in planning, research, housing, and member services to advance the quality of life in the San Francisco Bay Area. ABAG's planning and service programs work to address regional economic, social, and environmental challenges.

The Bay Area is comprised of nine counties: Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma. All nine counties and all 101 cities and towns within the Bay Area are voluntary members of ABAG, representing all of the region's population – more than 7,000,000 people. ABAG offers its members research and analysis, planning and outreach, as well as cost-effective member service programs.

Building coalitions and partnerships within the Bay region and beyond have typified ABAG's problem-solving approach to issues affecting the Bay Area. The Joint Policy Committee (JPC) is a key partnership and exemplifies ABAG's approach to working on regional planning issues. JPC member agencies include ABAG, the Bay Area Air Quality Management District (BAAQMD), the Bay Conservation and Development Commission (BCDC), and the Metropolitan Transportation Commission (MTC).

ABAG is the regional planning agency for nine counties and 101 cities... Abag's planning and service programs work to address regional economic, social and environmental challenges

ABAG is running your city. It controls major zoning decisions, infrastructure decisions and more.

Regionalism in action.

Now ABAG is in the power business. What kind of service do you think you're going to get?

Answer: shortage, by design!

If you don't conserve, the power will go out. If you do conserve, the power will go out. We need to espouse solutions other than the two presented to us by ABAG.

Water policy is following the same "Smart" approach.

This is an ABAG newsletter:

Service Matters

 Association of Bay Area Governments

July - August 2011 • Issue No. 113

Completed GHG Inventories A Snapshot of GHG Emissions and Energy Consumption for Local Governments

The Municipal Operations Greenhouse Gas Emissions Inventory Assistance program provided training and assistance to the following ABAG members: City of Lafayette, City of Sausalito, City of Napa, Town of Yountville, City of Oakley, City of Concord, City of Pleasant Hill, and Sonoma County jurisdictions. This GHGE Inventory Assistance is part of the Green Communities Program, a joint effort of ABAG and Pacific Gas and Electric Company and funded by energy rate payers through the California Public Utilities Commission.

Working together, ABAG and ICLEI were able to assist these eight jurisdictions in the completion of greenhouse gas emissions inventories for their operations. ABAG recruited local governments and

Presented by FreedomAdvocates.org

They'll do this by monitoring – individuals and households. How? Through SMART Meters. This is why utility bills are in the midst of rapidly advancing unit costs.

As a next step ABAG, ICLEI, and PG&E are preparing local governments for community wide GHGE inventories. This program is expected to start in January of 2012.

ICLEI is a foreign, U.N. related political organization.
Expose ICLEI. Get out of ABAG, work to disband PG&E's governing authority.

ICLEI

Jeb Brugman founder of ICLEI says: 'The U.N. will become the United Cities of the World.'

One Bay Area

One Bay Area is supported by four other regional governance organizations: the Association of Bay Area Governments (ABAG); the federal Bay Area Metropolitan Transportation Commission; the Bay Area Air Quality Management District; and the Bay Conservation and Development Commission – all extra-Constitutional regional governmental apparatus. And we wonder why America is falling!

This is an outrageous plan for 9 counties. People around the Bay Area are waking up. This spark should become a firestorm!

The “Plan” is the Bay area’s primary Agenda 21 guidebook, just like the “Local Agenda 21” guidebook that infests Santa Cruz. It is made to look so benign. But you can come to understand their meaning of terms and monitor their programs; *then* you can ask yourself what it is you can do about it.

The globalist vision: government controlled housing, getting people out of cars, comprehensive control over human action, while jamming people like sardines so to make them into slaves. This is all in accordance with Agenda 21 Sustainability policy and objectives.

Let's take a look at an excerpt from the United Nations' Agenda 21.

Earth Summit - Agenda 21: The United Nations Programme of Action

Chapter 7 Human Settlements

Promoting Transport Systems

International organizations should:

- Promote comprehensive planning approach
- Encourage development that reduces transport demand
- Adopt programmes favouring high occupancy public transport
- Encourage non-motorized modes of transport by:
- Providing safe cycleways and footways in urban and suburban centres in countries.

Presented by FreedomAdvocates.org

California is adopting these “systems” at the state and local level. Your representatives need to understand who they represent, how Agenda 21 is designed to take control over human action and what they must do to avert this.

In California, Comprehensive Planning is called Smart Growth. So what does SMART mean? Here is PG&E's definition:

SMART

Specific: A defined level of program progress

Measurable: All results can be tracked by staff

Actionable: Action can be taken on reported progress

Relevant: Direct measurements of program activities and results

Timely: Results can be reported on a quarterly basis

Acronym from Pacific Gas and Electric Green Communities Letter January 2010

Below the header is a banner image of a city street with a transit center. The main content area features a news article titled "San Francisco's Trans bay Transit Center Project Epitomizes Smart Growth". The article includes quotes from Speaker Pelosi and San Francisco Mayor Gavin Newsom, and a quote from Ray La Hood. The URL <http://www.smartgrowth.org/engine/index.php/news/2010/news-143> is displayed at the bottom left, and "Presented by FreedomAdvocates.org" is at the bottom right.

San Francisco's Trans bay Transit Center Project Epitomizes Smart Growth

"We are coming together to create jobs and revitalize our economy... a new 'Grand Central Station of the West'," said Speaker Pelosi.

"This project is the ultimate manifestation of smart growth," said San Francisco Mayor Gavin Newsom.

One of the most "transformational public transportation projects" in the nation. "It will soon be possible to get almost anywhere in the Golden State via public transit..." Ray La Hood

<http://www.smartgrowth.org/engine/index.php/news/2010/news-143>

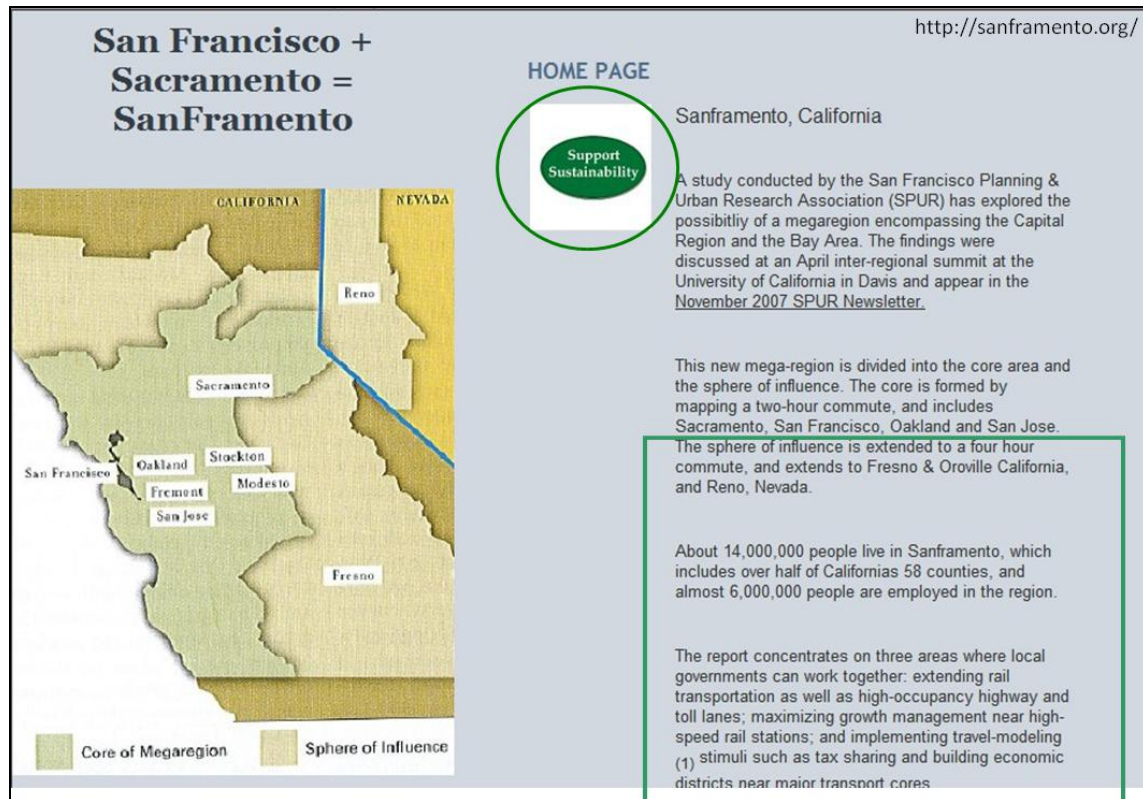

Presented by FreedomAdvocates.org

The federal government has a plan for the Bay Area.
They have plenty of partners to aid in the task.

Northern California Megaregion

The Northern California Megaregion is designed to be comprised of Smart Growth built along transportation corridors. These corridors will be multi-modals for trucks, trains and passengers.

“San Francisco + Sacramento = *SanFramento*” – a Megaregion encompassing the Capital Region and the Bay Area. This Megaregion is divided into the Core and the Sphere of Influence.

The report concentrates on three areas where local governments can work together: extending rail transportation as well as high-occupancy highway and toll lanes; maximizing growth management near high-speed rail stations; and implementing travel-modeling (1) stimuli such as tax sharing and building economic districts near major transport cores.

All in the pursuit of Agenda 21 Chapter 7 objectives.

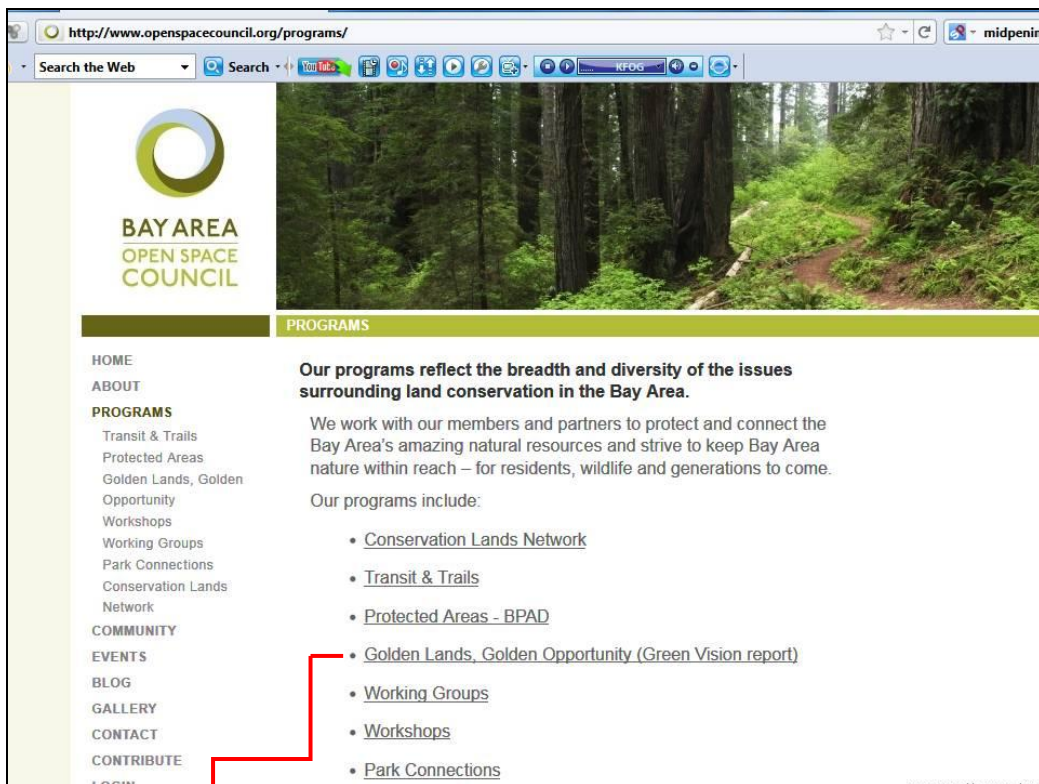

A megaregion is what *One Bay Area*, which is 9 counties, grows into. Regionalism metastasizes. Look into *Cities 21* (www.cities21.org/conspirators.htm)

which is taking you into a Central California megaregion.

Don't stop with ICLEI, don't stop with One Bay Area or Bay Area Open Space Council. The trap that has been set runs deep and wide. Keep your defense up.

Bay Area Open Space Council

To collectivize lands – take them out of private property in order to implement the Wildlands Project.

GOLDEN LANDS, GOLDEN OPPORTUNITY

Ridges and farms, watersheds and forests in the San Francisco Bay Area provide vital public benefits—but many are still unprotected. This report celebrates the region's "golden lands" and calls for action to fully protect its greenbelt.

"Preserving Bay Area open space is a natural first step to fight global warming and build better communities for us all."

— Mary Nichols, California Air Resources Board

Golden Lands, Golden Opportunity is a collaboration of Greenbelt Alliance and the Bay Area Open Space Council with the Association of Bay Area Governments. Over 100 Bay Area organizations contributed to this effort:

www.greenbelt.org | www.bayareavision.org | www.openspacecouncil.org

<http://www.golden-lands.org/>

Presented by FreedomAdvocates.org

Golden Lands is an organization that wants to take control over farms from owners for open space opportunities.

Implementation of the *Bay Area Open Space Initiative* is coming. This NGO has identified over 1 million acres in the North Bay, primarily Sonoma that will be subjected to this Initiative. NOW is the time to organize property owners and America advocates.

It is my expectation that *Bay Area Open Space* is the project designed to take millions of Bay Area acres and put it into Wildlands status. Where I think this is leading us is to grab mass areas, a million acres in Sonoma County, of private land to be converted to government land which will ultimately be off-limits to the citizens of Sonoma. That's the big picture.

Sonoma Open Space is a member of the Bay Area Open Space Council.

**BAY AREA
OPEN SPACE
COUNCIL**

COMMUNITY | Member Roster

Member Roster

The Open Space Council's members range from small land trusts to regional agencies and national conservation leaders.

Presented by FreedomAdvocates.org

Sonoma Open Space

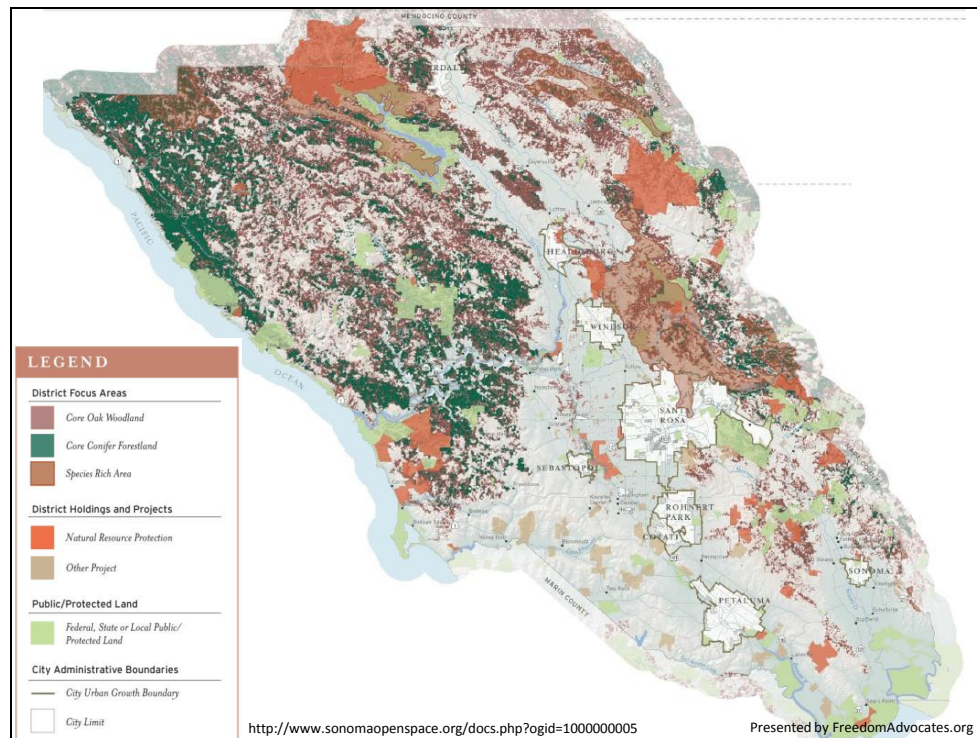

Farming/Agricultural Restrictions:

Recreational Restrictions:

Environmental Restrictions:

Agencies and NGOs or Foundations will gain control over rural land through implementation of regulations, taxes and fees. Often landowners will be condemned directly by government or condemned for the benefit of public private partners. Conservation Easements will be used to tie landowners into knots.

Understand that the plan of the Open Space Council is to create the corridors through this county that connect the Sierras to the coastline for the benefit of

species other than humans. (“Connecting Communities” in their words).

What you don’t see is the map of their intended Wildlands Corridor. But that information will become apparent as targets are chosen.

This is the phony green infrastructure for people control and the takedown of private property.

The Planning Director in Sonoma County is a former land use planner in Santa Cruz and my opinion is that he is infamously committed to the piecemeal abolition of private property.

Do you think the City Council of Santa Rosa or the Sonoma County Board of Supervisors will blindly go along with these policy directives? **Watch** the *Sonoma Open Space* organization.

If they proceed unabated this is what you need to imagine:

Communities surrounded by open space that ultimately you cannot access. In these communities human action is monitored and controlled and where new world human settlements or Smart Growth patterns are connected by public transportation corridors.

Vision: Humans as livestock...

Chamber of Commerce

The American Chamber of Commerce is an NGO. NGOs are accredited for Agenda 21 implementation by the United Nations. The American Chamber of Commerce and the American Planning Association, another NGO, are both playing a role in the Northern California Megaregion.

Let's look at the warm and fuzzy language spewed by the American Chamber of Commerce.

Welcome

The Sonoma Green Business Program is a partnership of government agencies and utilities that assists, recognizes, and promotes local organizations, focusing on small- to medium-sized consumer-oriented businesses that volunteer to operate in a more environmentally responsible way. To be certified, participants must be in compliance with all environmental regulations and meet program standards for conserving resources, preventing pollution, and minimizing waste.

The Sonoma Green Business Program is a partnership of government agencies and utilities that assists, recognizes, and promotes local organizations, focusing on small- to medium-sized consumer-oriented businesses that volunteer to operate in a more environmentally responsible way.

Presented by FreedomAdvocates.org

*The stream
could be a
ditch.*

*A way to
take rural
residential
property.*

These "policy elements" will impose Draconian development limitations in rural areas. Basically they're stealing use of rural property in Sonoma County. They're using water not just to take away the use of your property, but to have policy elements that are designed to squeeze out land owners.

The Sonoma County General Plan 2020 also includes water monitoring.

Sonoma County General Plan 2020 Water Resources Element

Develop a **comprehensive groundwater assessment** that includes:

Monitoring wells and stream gauges

...evaluating the threat to ground water resources from salt water intrusion which would then be incorporated into the well permitting process

<http://www.sonoma-county.org/prmd/gp2020/wre.pdf>

Presented by FreedomAdvocates.org

Collectivists and communitarians have been trying for decades, and with some successes, to convince land owners that water in California is owned by the public. The core of California law since 1849 has been predicated on the idea that aquifer water, like all natural resources below the ground, belong to the overlying land owner. The California Supreme Court has repeatedly upheld that notion. Land owners must

not be intimidated into well monitoring. If there is a water shortage, a long prescribed and effective method for allocating water resources is contained in the California statutes on *water adjudication*.

The regional green police are roaming your lands.

Presented by freedomadvocates.org

Enforcement is a huge aspect of Agenda 21.

The squeeze on rural landowners is going to get much worse.

The youth are being prepped for Global Citizenship and the effort is working.

In polling we learned that a majority of 2009 high school and college grads identify themselves as “global citizens” not as Americans. Sustainability is being jammed down every youngster’s throat. The future is at risk.

Education for Sustainable Development Toolkit

Version 2.0
July 2002

Environment Economy Society

Education is held to be central to sustainability. Indeed, education and sustainability are inextricably linked, but the distinction between education as we know it and education for sustainability is enigmatic for many.

ESD was first described by Chapter 36 of Agenda 21.
major thrusts to begin the work of ESD:
reorient existing education to address **sustainable development**,
develop public understanding, awareness, and...training

Simply increasing basic literacy, as it is currently taught in most countries, will not advance sustainable societies.

<http://www.esdtoolkit.org/discussion/whatisesd.htm>

Presented by FreedomAdvocates.org

The children are being scared, indoctrinated and culled in accordance with their usefulness to the World Government and World Religion.

Check out the “Cool Schools Program” and the Sonoma Ecology Center for the watershed brain washing program that your children are being subjected to.

ICLEI has a hand in the school indoctrination through their Climate Protection Campaign.

Cool Schools Program

Cool Schools recognizes young peoples' desire and ability to create positive change in their community. **Cool Schools** develops and facilitates classroom-based service learning projects, **engaging students to take action at school and in the community to reduce emissions causing climate change.**

<http://climateprotection.org/our-work/past-projects/cool-schools-program>

Presented by FreedomAdvocates.org

The school system is indoctrinating our children into global citizenship through a commitment to globalist ideology. They are not being taught the values of the American experiment. Nor are they being given information or methodology regarding climate issues. Little children are being brain washed at school.

To whom do the children belong? Who decides? Look into what your schools are doing.

The Sonoma County Superintendent supports green education. He's committed to making children environmental stewards.

<http://www.scoe.org/pub/htdocs/superintendent.html>

Presented by FreedomAdvocates.org

Our children are being inculcated into a new political-economic culture. A culture devoid of American principles of individual liberty, free enterprise and equal justice.

The Bay Area, and all of California, has been set up as a “region” to operate within and under a global order.

You *can* organize and disseminate information. The globalist course can be reversed but soon it will become too late.

Our response needs to be: Understand and recognize Sustainable Development locally and spread that understanding to others. We are not going to be salvaged by any existent political party organization. They are in on the globalization process.

Average Americans must understand and act to restore their area as the land of the free.

Consider what has been illustrated here today – Regionalism, Smart Growth, Public Private Partnerships, The Wildlands Network and Education for Global Citizenship, all components of Sustainable ideology. The transformation to a global political economic system is progressing, has even happened. With the transformation comes the end of the American experiment. Lost is the idea of private property. The path for Americans will become very hard if we do not avert Agenda 21 implementation.

Agenda 21 people are organized even as their active drones don't know what they are organized around. Agenda 21 shows itself everywhere you look.

Do you think our politicians and bureaucrats are serving us? If you don't we need to get busy.

For decades Globalism has been transforming America.
Now the pace is moving even faster.

If we understand Agenda 21's Action Plan, then we can
restore Liberty. Cut off Agenda 21 Sustainable
Development at its root;

*Defeat **local** implementation of Agenda 21!*

What happens if people do nothing?

America becomes the *land of the collected* and *home of the enslaved*.

Your “region” will be a local outpost coordinated at the global level to control humans.

Oh Boy!

What can you do?

Think Locally! Expose the regional soviet system running local government. That is where freedom will be won or lost. Go after and expose One Bay Area, ICLEI, ABAG, and the Bay Area and Sonoma Open Space Council for what they are: a massive 5th column leading the Bay Area down the path to becoming an outpost of the New World Order.

The essence of the mission:

To restore the principles set forth in the Declaration of Independence.

The federal government is where the transformation is coming from. It is now everywhere including here. So, take counter-action locally. Local pro-action is our best strategy to stave off world government at this late date.

Understand your area's local Agenda 21 program. Win back your town or neighborhood from Agenda 21's policies then move on to the broader area. Ultimately combine with others working similarly around California. Then expunge Sustainable Development policy out of our state's law and out of the bureaucracy.

When enough states have recaptured their citizens' liberty the federal government can be taken on effectively. Then we will have salvaged the American experiment in individual liberty, equal justice and the *political recognition* of every individual's unalienable rights. Long live the United States! And freedom loving people everywhere.

Thank You
