

Let's attack the root of the problem:

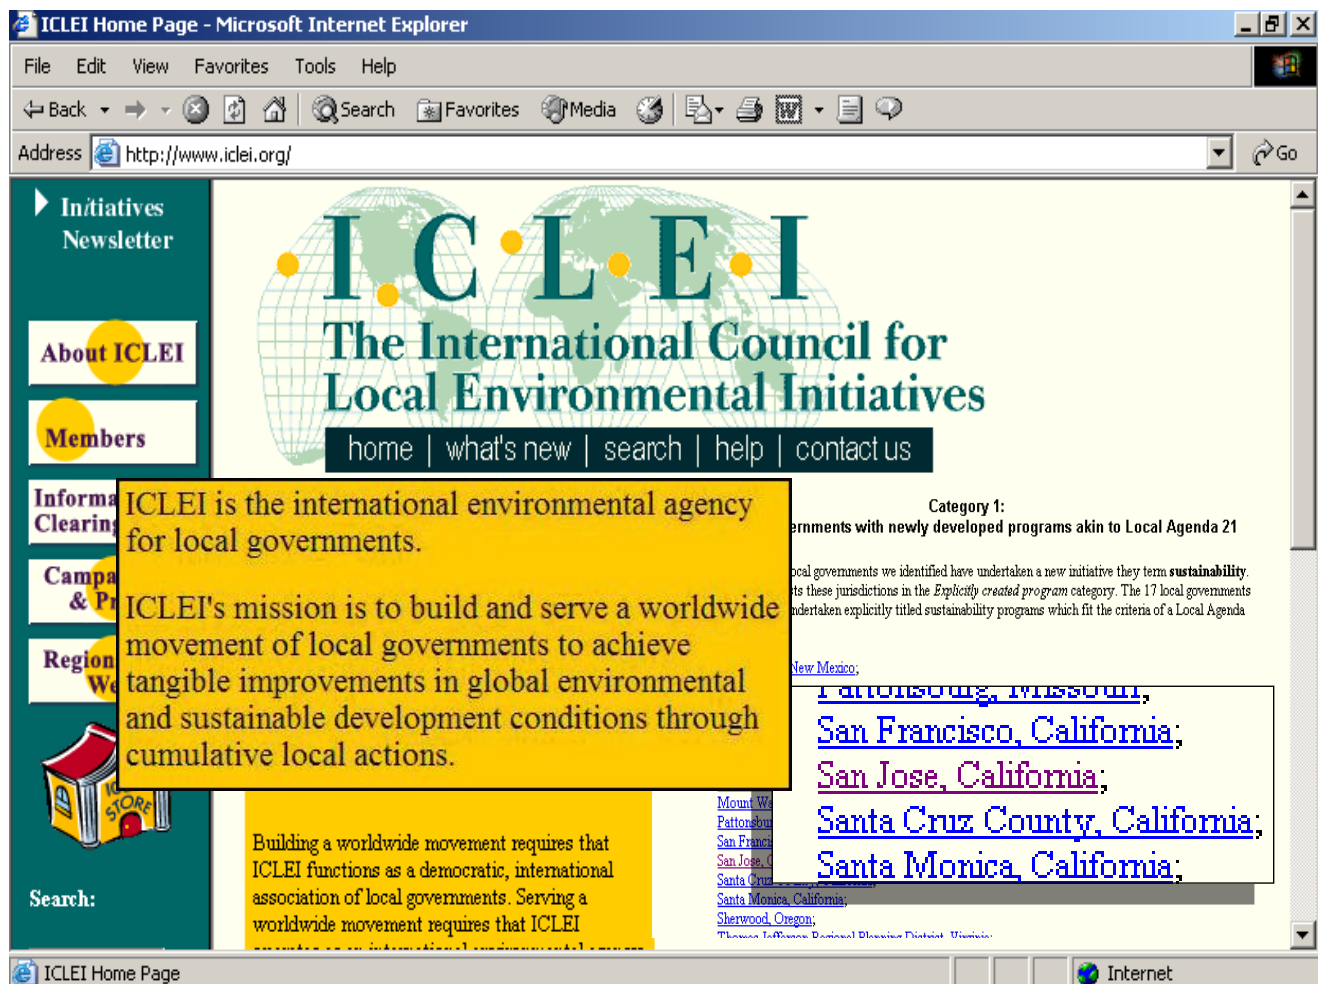

- Learn to recognize the local and broader patterns and tenants of Agenda 21. This way you can fight back with insight, starting where the attack all around you is happening and where you can win – at the local level.

The Globalist invasion is happening right under our noses. Every county in America has its local Agenda 21 implementation underway.

Let's examine aspects of the 'Local Action' Plan:

ICLEI

This is the most vulnerable globalist organization operating in America today.

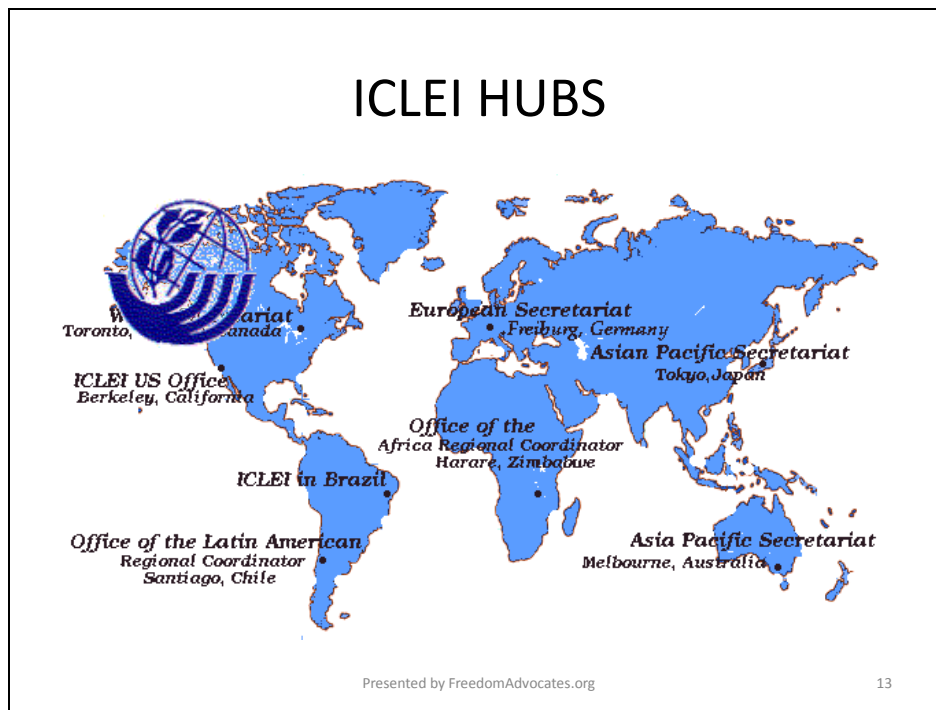

The full name is “The International Council for Local Environmental Initiatives.” It is also called “Local Governments for Sustainability.”

ICLEI is an important NGO that:

- Closely ties policy to man-made Global Warming and climate change.
- Has formed an international Congress filled with city and county representatives. This Congress acts as a shadow World Government.
- Directs Community Development and other local agencies and provides statutory and regulatory provisions that implement Sustainable policy locally.

Local tax funds pay the contract fee. Agenda 21 policy-making is fully invaded upon ICLEI’s arrival. At least 600 cities, including Bloomberg led New York City, from all across the nation, have ICLEI contracts. Local governments have been hijacked by world government agents.

Each ICLEI city's influence is expanded as ICLEI then automatically steers Regional Air and Water Boards, and many other "regional" transformational governance apparatus such as the Puget Sound Regional Council.

Article 1 Section 10 makes the following prohibition: "No state shall enter into any Treaty, Alliance or Confederation" with a foreign political entity. Neither may a city. Ask: Is it treasonous for city leaders to contract with ICLEI, an International NGO and U.N. related organization? Is it treasonous at least in spirit? Yes! ICLEI contracts are treasonous.

Contracts with ICLEI guarantee implementation of international political and economic policy at the local level. Drive city alliances with ICLEI out of the communities surrounding you. A list of contracted ICLEI cities can be picked up at the Freedom Advocates table.

Where's the Sheriff? It is time for good Sheriffs to take action! Ridding towns of ICLEI is more important to the future of America than was the Sheriff's role in ridding the west of rustlers and train robbers! If Sheriffs are

America's last hope, we need Sheriffs to start Kicking ICLEI Out of communities.

City attorneys and County Counsel's offices also have a role to play. Their duty is as a fiduciary to you. Failure to protect you from ICLEI breaches their fiduciary duty and makes them liable to citizens.

So much of the Agenda 21 invasion at the local level relies on the man-made global warming fraud. But the unraveling of this masquerade has not yet hit the local scene. ICLEI is particularly vulnerable because of public awareness of the warming fraud. For several reasons citizens need to react to ICLEI soon! Now *is* the time.

Residents in Spokane, Washington and various cities in the Colorado plains are taking on their city's contract and contract with ICLEI as other localized rebellions brew. You can do this too. We are following the *Kick ICLEI Out!* campaign at FreedomAdvocates.org.

I am going to sample the Puget Sound and pull examples of Agenda 21 Sustainable Development as it routinely pops up on the local scene. Most hometown participants think they are doing something unique, others think they are doing something for mankind – well they are. They are putting mankind on the verge of serfdom.

You can recognize globalism operating at the local level by recognizing the themes and programs presented by the local Action network and understanding them in the context of Agenda 21.

Businesses for an Environmentally Sustainable Tacoma (BEST)
Are you one of Tacoma's BEST Businesses?

For a business to be competitive in this economy, companies must find how to increase profits while being a good corporate citizen at the same time. They need to learn how to keep investors, customers, employees and community members happy all while watching the bottom line. Citizens for a Healthy Bay has a new program that will help local businesses do just that, and best of all, it's free. The Businesses for an Environmentally Sustainable Tacoma (BEST) program provides Tacoma businesses with free assistance to help them increase their profitability while lessening their environmental impact. It can help local companies learn about cost-saving, sustainable business practices such as:

Energy conservation
 Water conservation
 Recycling and waste reduction
 Storm water pollution prevention
 Carbon footprint analysis
FREE, CONFIDENTIAL ENVIRONMENTAL ASSESSMENTS

“Businesses for an Environmentally Sustainable Tacoma” is a standard localized business recruitment center designed to discover suitable public private partners – people who will simply do what they are told in order to compete for insider advantage. Many participants will not make the final cut as further downward shifts in the economy take place. Others will be used for mutual benefit until the process of further economic centralization results in their being thrown under the Sustainable bus. Fascism works for very few people. Green is a pacifying lure.

The pictures are so nice, the simple expression of the words so innocent sounding... Beware.

**Northwest
Environmental
Business
Council**

- The Environment is Our Business**
Since 1996. As a non-profit trade association, NEBC represents the interests of its members, while promoting the health of the industry and the environment as a whole. Formed as a regional organization in 1996, NEBC is the recognized voice of the industry - advocating for science-based regulation, supportive policies and tax structures, the dissemination of knowledge, and the adoption of best practices.

All Sectors. Growing beyond its roots in environmental protection and remediation, NEBC's members now also work in energy and efficiency, waste and recycling, water supply, wastewater treatment, land use, design and construction, "green" chemistry and manufacturing, greenhouse gas management, and related fields. This collection of sectors now falls under the umbrella of "sustainability" or "clean technologies," but NEBC members were there from the beginning.

All Disciplines. Members cover an ever-widening spectrum, including engineers, consultants, contractors, scientists, lawyers, product and technology providers, insurers, project developers, financiers, architects, business support professionals, plus a host of other disciplines and organizations supportive of NEBC's goals.

NEBC is the Hub
NEBC's uniqueness and strength lies in its breadth. As a cross-sector, cross-discipline, organization NEBC fosters transfer of knowledge and learning, builds synergies among members, and expands business opportunities.

NEBC also brings together diverse parties and fosters complex, multi-discipline conversations that address emerging industry issues. In an era of blurred boundaries and the need for cross-sector solutions, NEBC members provide the answers.

<http://www.nebc.org/Content.aspx?PageId=6>

The *Northwest Environmental Business Council* is another public private partnership. This time we are talking about professional associations across a five state "Region". The NEBC is, of course, dedicated to Sustainable Development policy implementation while it looks for its 'Schindler' fellows.

[ICLEI - Local Governments for Sustainability](#)

<http://www.cityoftacoma.org/Page.aspx?hid=14693>

This is a government – NGO partnership for Sustainability centered here in Tacoma. Tacoma is as knee deep in Globalist policy as is Spokane.

Local government's elected officials combine with unelected Regional "Councils," state and federal agencies and global NGOs. This is accomplished through the Tacoma city government program *Sustainable Tacoma*.

This Sustainable Tacoma Commission smacks of ICLEI direction. Today the ICLEI banner relates to global warming. Global Warming is close to dead in D.C. When Puget Sound residents catch on to the climate fraud you can expect ICLEI to change its globalist focus from global warming to biodiversity matters. Then land use – the use of private property, will then be under increased, massive attack.

This is the time to cleanse the community of ICLEI!

DOWNTOWN:
On the go!

-
- **Downtown: On The Go!**
Downtown: On the Go! is an active partnership between 23 downtown businesses and the Tacoma-Pierce County Chamber, the City of Tacoma, and Pierce Transit. Leveraging their resources and relationships, these organizations work together with employers, commuters, and anyone whose daily life is downtown to promote and advocate for transportation choices and integrated land use systems in Tacoma's downtown.
- **VISION**
- *Downtown: On the Go! envisions a vibrant, integrated downtown Tacoma – where daily life is enhanced by connecting people, green spaces, arts & culture, and jobs. Interdependent land use policies and transportation options reinforce an active, compact urban core that is connected locally and regionally, promoting a focus on the movement and interactions of people rather than cars.*

<http://www.tacomabia.org/Services/TacomaTransportaion>

“The American Transformation in Action”

An example of another public private partnership. This one focuses on the transportation element of Smart Growth policy. This time the assault is lead by the local Chamber of Commerce. Did you know that the American Chamber of Commerce is a U.N. accredited NGO and that accreditation is for purposes of implementing Sustainable policy? Some Chambers are effective at this, others are not.

OSPI

Education for Environment and Sustainability

The focus of the Education for Environment and Sustainability program is to support academic success and life-long learning, and to develop a responsible citizenry capable of applying knowledge of ecological, economic, and socio-cultural systems to meet current and future needs. Environmental education is a mandatory area of study in Washington, required by [392-410-115](#): *Instruction about conservation, natural resources, and the environment shall be provided at all grade levels in an interdisciplinary manner through science, the social studies, the humanities, and other appropriate areas...*

[Learning Standards](#)

The state's K-12 Integrated Environmental and Sustainability Learning Standards describe what students should know and be able to do at each grade level.

[Sustainable Design Project](#)

Sustainable Design is a statewide interdisciplinary project bringing industry, business, community, and higher education partners together with K-12 students to design sustainable solutions to real world challenges.

The youth are being prepped for Global Citizenship and the effort is working. In polling we learned that last year

a majority of 2009 high school and College grads identify themselves as “global citizens” not as Americans. Sustainability is being jammed down every youngster’s throat. The American future is at risk.

Green Building Program comes to Tacoma

The Greening of Tacoma Community College

Sustainability Guides Innovation at TCC

Tacoma Community College will partner with the National Sustainable Building Advisor Program (NaSBAP) this fall to offer the first Green Building Program in Pierce County, and the sixth program of its kind in the State of Washington. This nine-month certificate program is designed for working professionals planning to apply sustainable building design, development and construction concepts to their own projects. The program begins Sept. 22, 2008 on TCC's Tacoma Campus.

nes.tacomaacc.edu/.../advantageimages/139.jpg

The Sustainable Order is everywhere! I see this as a typical program of centralized control that works to contribute to the destruction of the dollar. And this is becoming standard training for young people.

Puget Sound Regional Council is Regionalism gone wild.

Regionalism is designed to destroy political boundaries. And thus Regionalism destroys the Republic. Regionalism is the system of governance used in Communist and Fascist political systems.

The following listing incorporates those elected officials who give their support to Vision 2040. These Regionalists need to be voted out of office.

<p><i>University Place, Other Cities in Pierce County</i> Commissioner Josh Brown, <i>Kitsap County</i> Councilmember Shawn Bunney, <i>Pierce County</i> Councilmember Mary-Alyce Burleigh, <i>City of Kirkland, Other Cities in King County</i> Mayor Suzette Cooke, <i>City of Kent</i> Councilmember Jan Drago, <i>City of Seattle</i> Councilmember Ron Hansen, <i>City of Shoreline, Other Cities in King County</i> Paula Hammond, <i>Secretary of Transportation, Washington State Department of Transportation</i> Councilmember Bruce Harrell, <i>City of Seattle</i> Councilmember Linda Kochmar, <i>City of Federal Way</i> Mayor Darlene Kordonowy, <i>City of Bainbridge Island, Other Cities in Kitsap County</i> Executive John Ladenburg, <i>Pierce County</i> Mayor Denis Law, <i>City of Renton</i> Councilmember Mike Lonergan, <i>City of...</i></p>		<p>Funding for this report provided in part by member jurisdictions, grants from the U.S. Department of Transportation, Federal Transit Administration, Federal Highway Administration and Washington State Department of Transportation.</p>
---	--	---

No wonder the federal government is bankrupt... Vision World Government.

Regionalism practiced by Vision 2040 has birthed and administered the Growth Management policies, and the Environmental, Economic and Transportation strategy for the Puget Sound area. There is no more prototypical Agenda 21 soviet council in all of America. The scary part is that organizations like the *Puget Sound Regional Council* exist all over the place.

Resolution A-08-04

A RESOLUTION of the Puget Sound Regional Council Adopting VISION 2040

WHEREAS, the Puget Sound Regional Council is designated by the governor of the State of Washington....

WHEREAS, the Interlocal Agreement signed by all the Regional Council members establishes the Council as a forum for collaborative work on regional growth management and transportation planning and other issues requiring regional coordination and cooperation, including maintaining the adopted regional growth strategy that addresses regional issues including transportation, open space, air and water quality, economic development, and regional facilities, as well as producing the regional transportation plan; and

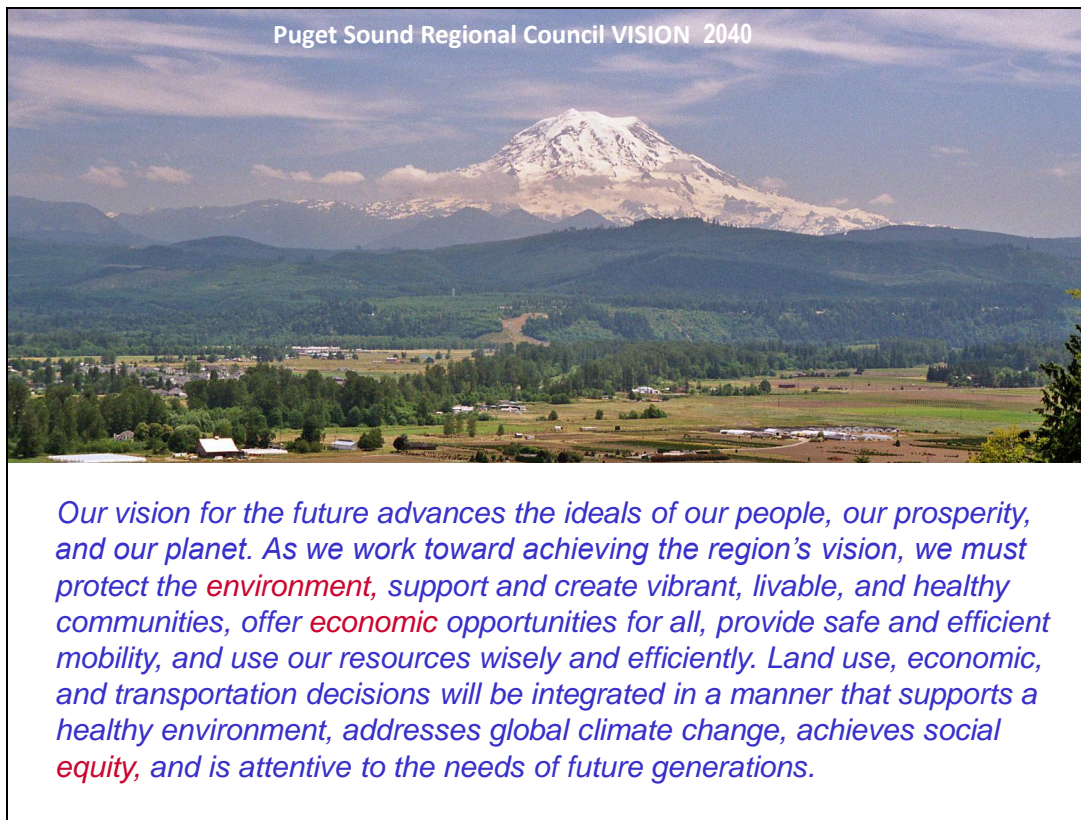

This Regional policy making makes it easy for globalist forces to attack and squeeze the principles of private property. Land owners around the Sound ought to know that.

Resolution A-08-04

A RESOLUTION of the Puget Sound Regional Council Adopting VISION 2040

NOW, THEREFORE, BE IT RESOLVED, that the Regional Council General Assembly adopts VISION 2040 as the growth management, environmental, economic, and transportation vision for the central Puget Sound region, meeting state Growth Management Act requirements, and in so doing reaffirms its commitment to an integrated regional approach to growth management, the environment, the economy, and transportation.

Regionalism in Action Now!

The Nanny State now has muscle!

The elected government also contributes mightily to the takedown of America. This occurs through the creation of federal and state agencies that play a big role in advancing the globalist agenda. Part of that Agenda is the step by step process of abolishing private property. A great example of this is the State of Washington's Department of Ecology.

The logo for the Department of Ecology, State of Washington, featuring a stylized sun and water waves.

Sustainability

A photograph showing a group of people at a farmers market, with various fresh produce and plants on display.

What is Sustainability?

These web pages on sustainability are designed to provide the necessary framework for understanding sustainability. Their purpose is to help individuals, businesses, and government learn how to turn the concepts of sustainability into action.

In 1987 the World Commission on Environment and Development, known as "the Brundtland Commission", issued the "Our Common Future" report and defined sustainability as "development that meets the needs of the present without compromising the ability of future generations to meet their own needs."

The "Our Common Future" report called for a new charter to guide the transition to sustainable development. The resulting Earth Charter, finalized in 2000, earned global consensus. Today, it is used internationally as a reference document in peace negotiations, government processes, community development, and as an educational framework.

According to the Earth Charter, we must work together to create a global society founded on respect for nature, universal human rights, economic justice, and a culture of peace. Toward this end, it is imperative that we, the peoples of Earth, declare our responsibility to one another, to the greater community of life, and to future generations.

The three pillars of sustainability include the environment, social equity, and the economy. A strong resilient economy depends upon a vibrant and equitable society which in turn relies on a vigorous flourishing environment. The balance of the three pillars leads to prosperity and peace for future generations. The stacked model represents one view of the sustainability framework. It attempts to demonstrate that a healthy environment provides the foundation for life. The economy is placed in the center to illustrate its key role in creating and maintaining an equitable society and a healthy environment: <http://www.ecy.wa.gov/economy.html>

I think Washingtonians have been captured by the Department of Ecology.

Environmental Permit Handbook

Welcome

Environmental Permit Handbook is a website developed by the Department of Ecology that contains information about local, state and federal environmental permits, approvals, or licenses for Washington State in a handbook like format.

The Environmental Permit Handbook

Provides in-depth information about environmental permits, approvals and licenses.

Explains the "why" and "when" of each permit.

Has links to state and federal statutes authorizing each permit.

Copyright © Washington State Department of Ecology. All Rights Reserved.

Adolph Hitler was an early green. His commitment to forest protection was fulfilled as he implemented his resource monitoring system. It was... well, pure fascism. Today we call the same thing in America 'public private partnership'! You too can be a partner – just accept the concept of voluntary compliance.

“Get your Permit!” (or else... says the Fuhrer)
