

The Ultimate War: Globalism vs. America

Presented by Michael Shaw
President, FreedomAdvocates.org

Central Florida
February 26, 2011

Across America, a Constitutional awakening is arising. And just in time(!) because something *is* brewing. The world **is** being politically and economically internationalized.

The big “transformation” has been in motion for a long time and now it is heading for the finish line. Let’s call this transformation, “Globalism”.

The Ultimate War:

Globalism

vs

America

After I discuss some of the major tentacles of modern globalism, I will then focus on the globalist program called Agenda 21, referred to locally as: Sustainable Development, sustainability, sustainable or livable communities. Agenda 21 champions environmental protection, public private partnership and social justice.

I grew up in Orange County, California. When I was 10 Nikita Khrushchev came to southern California to visit Disneyland and said “We will bury you (America) without firing a shot”. Later in the year (1959) he repeated this statement at the United Nations while slamming his shoe on the table. I thought he was nuts!

Yet today America **is** falling. We have not experienced a military invasion. So why are we falling? What is it that Khrushchev knew that many Americans have not yet figured out or acknowledged?

Private property is under attack. Americans no longer feel confident that government secures the protection of their property. Instead, policies are being implemented, through our American government, that actually attack the idea of private property.

Globalist philosophy has swarmed all branches and all levels of American government: Is there a connection between globalism and the loss of our rights?

Our leaders who are working for their own seat at the international table have convoluted the interpretation of the American Constitution. At the core, these people seek to negate the political recognition of an individual's unalienable rights –

one's natural right to life, liberty and the use of his property.

There is a massive fifth column operating throughout our government, supported by a huge and well funded network of Non Governmental Organizations (NGOs) that work at the local level to advance global policies. NGOs are organizations which are accredited by the United Nations for purposes of implementing Agenda 21, the blueprint for Sustainable Development.

Increasingly, the lands across America are being put "Off Limits" as people are increasingly forced into high density so-called "Smart Growth" communities. Your elected officials make this possible by accepting a bogus consensus.

The American Wildlands Network may sound or look benign but what you will discover are vast expanses of land taken from the people, and locked up from any use. There are interconnecting corridors that are designed to limit or block human passage while the

animals roam freely. The Wildlands Network is designed to take control of the land across America.

Power is being centralized and exercised over all of us.

As you will see later these expanses and corridors are throughout the country. The creation of these corridors is now coming into formation, facilitated by the process of public private partnerships once called economic fascism or corporatism. These partnerships have been in formation for decades.

What I am going to do today is:

1. Define and illustrate how globalism works to sublate the foundation of the American experiment.
2. This sublation is planned to occur through implementation of the Global to Local Action Plan of Agenda 21, meaning, the Agenda for the 21st century, which I will describe.

3. Then I will give illustrations of how Agenda 21 plays out in your neighborhoods, cities and landscapes.

4. Finally, I will then suggest what it is that you can do in your own neighborhood to expose and ultimately reverse this anti-American plague that is destroying the entire country.

The battlefield of the modern World War is over the political recognition of unalienable rights. For example, judicial recognition and protection of the right to the use and enjoyment of property has been largely abandoned.

Prohibitive zoning, open space mandates, resource extraction limitations, conservation easements and use prohibitions coupled with enforcement provisions of such things as the Endangered Species

Act and the various Wildland bills are all designed to chip away at the idea of private property.

Organizations like Florida's Department of Environmental Resources Management (DERM) have a major hand in this.

The Endangered Species Act (ESA) under DERM often nullifies a land owner's natural right to the beneficial use of property. Through the ESA the courts have enabled massive legislative takings of property use.

America cannot stand if the idea of private property is not protected. As George Washington said, “Private property and freedom are inseparable”.

And yet the United Nations position on individual land ownership is clearly the opposite: Land is to be held or controlled by government and its partners, not individuals.

There is an organized Globalist assault on the individual and upon the system of government that supports individual rights.

The 20th century saw a continuum of action designed to lead us to where we are now and to where we are headed. Through the formation of the United Nations and the internationalist organizations including the World Bank, the World Trade Organization and the Bank of International Settlements, an infrastructure for centralized world government *has* been established. We are now within the grasp of global governance. Today, this is

euphemistically referred to as “change”. Obama may seek to pound in the final nail.

Why has individual liberty and national sovereignty steadily eroded? One reason is because both political parties have supported nationalized education policies that increasingly have indoctrinated youth into accepting “global citizenship”. Both parties have supported “new” economics: “public private partnerships” in place of free enterprise and both parties are advancing social justice in place of equal justice.

Until recently, when the federal government got off track most Americans thought we could simply ‘throw the bums out’ and elect the other party. But that is not working.

Both parties have spent America to the verge of dollar oblivion; they both support essential tenants of Globalism; meaning they both support the United Nation’s action plan for world government through

Agenda 21, Sustainable Development which uses environmental 'protection' as its excuse for transforming our systems of justice and economics.

What is Agenda 21?

Agenda 21 is a document that outlines the implementation of Sustainable Development, which is a **comprehensive plan** for the restructure of society and the remake of man. After nearly 20 years of implementation, I can report that Sustainable Development policy is now pursued in *every* county in the country!

Agenda 21 is a comprehensive plan of action to be taken globally, nationally and locally by organizations of the United Nations System, Governments, and Major Groups in every area in which human impacts on the environment.

Agenda 21, the [Rio Declaration on Environment and Development](#), and the [Statement of principles for the Sustainable Management of Forests](#) were adopted by more than 178 Governments at the United Nations Conference on Environment and Development (UNCED) held in Rio de Janeiro, Brazil, 3 to 14 June 1992.

The [Commission on Sustainable Development](#) (CSD) was created in December 1992 to ensure effective follow-up of UNCED, to monitor and report on implementation of the agreements at the local, national, regional and international levels. It was agreed that a five year review of Earth Summit progress would be made in 1997 by the [United Nations General Assembly meeting in special session](#).

The 55th General Assembly session decided in December 2000 that the CSD would serve as the central organizing body for the 2002 World Summit on Sustainable Development, which will be held in Johannesburg, South Africa.

Agenda 21 is a comprehensive plan of action to be taken globally, nationally and locally by organizations of the United Nations System, Governments, and Major Groups in every area in which human impacts on the environment.

The [Commission on Sustainable Development](#) (CSD) was created in December 1992 to ensure effective follow-up of UNCED, to monitor and report on implementation of the agreements at the local, national, regional and international levels. It was agreed that a five year review of Earth Summit progress would be made in 1997 by the [United Nations General Assembly meeting in special session](#).

Agenda 21, Sustainable Development is the modern battle field over future political-economics and more.

- i. Despite its appearance as an environmental movement, Agenda 21 incorporates decades of U.N. world governance policies. Agenda 21 was written for and disseminated at the Rio de Janeiro U.N. Earth Summit in 1992.
- ii. 178 nations signed on including George Bush, the father, signing on behalf of the United States.
- iii. The last 4 presidents have made implementation of Agenda 21 the quiet cornerstone of their administrations.
- iv. The U.S. Department of State reports to the U.N. our progress at implementation.

You will find in the FreedomAdvocates.org Research Center the 2002 State Department Report (pictured above/on screen) demonstrating the American implementation of Agenda 21. The Report is entitled “Johannesburg Summit 2002: United States of America Country Profile”.

This document outlines how we are implementing and achieving the objectives of Agenda 21 through federal agencies.

Agenda 21 Sustainable Development is the *Action* Plan for the implementation of a controlled society.

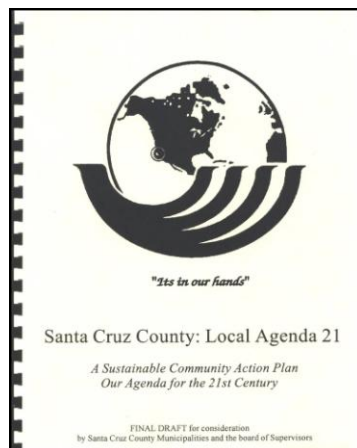

The Plan is not conjecture.

It is laid out in three documents:

1. Agenda 21: This is the global plan.

This is my County's plan - the Santa Cruz County "local" Agenda 21.

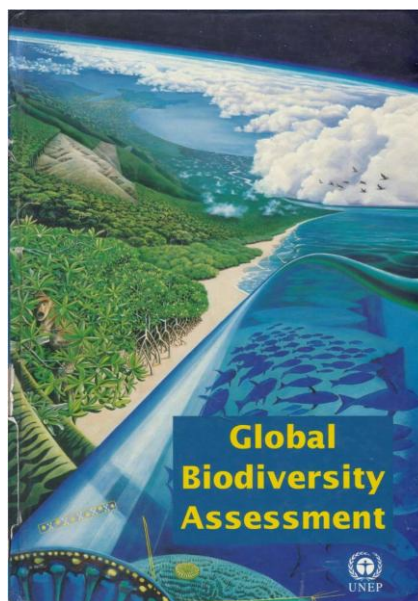

Local infiltration is what proves the existence and the seriousness of this program. Remember, Agenda 21 describes itself as a "Comprehensive Plan of Action".

Only a few communities have titled their plans Agenda 21. But every county in America has adopted Sustainability policies. Discover your county's Plan or Plans. Anticipate sweet sounding titles including "Vision", "2020", "Greenworks", etc...

To know Agenda 21 is to know the political-economic program that is the 'pathway' that America and the world are on. To not know Agenda 21 means we will be slaves to it.

2. The second document is the U.N.'s "*Global Biodiversity Assessment*" Report (1150 pages).

This is the guidebook for world-wide environmental action. To save the environment, this official document calls for a reduction of human population to an industrialized population of 1 billion people world-wide. In the alternative, according to the *Global Biodiversity Assessment Report*, a population comprised of “peasants” may be designed that would ‘allow’ 4 – 5 billion people.

3. Sustainable Development’s short ‘bible’, The *Earth Charter*, was authored by Steven Rockefeller, Maurice Strong and Mikhail Gorbachev.

The *Earth Charter* is taught in American schools.

Each of the authors has proclaimed that the *Earth Charter* is to replace the 10 Commandments.

Centralization of power and proclamation of authority is **known** to be a scary proposition.

When Power sufficiently ferments and foments during its centralization process, surviving humans are turned into drones.

To help you recognize local infiltration of Sustainable policies, I'm going to share a Freedom Advocates tool for showing the 'Warm and Fuzzy' terms that arise regularly. These terms reveal Agenda 21 operating in your neighborhood!

Agenda 21 Sustainable Development

Presented by FreedomAdvocates.org

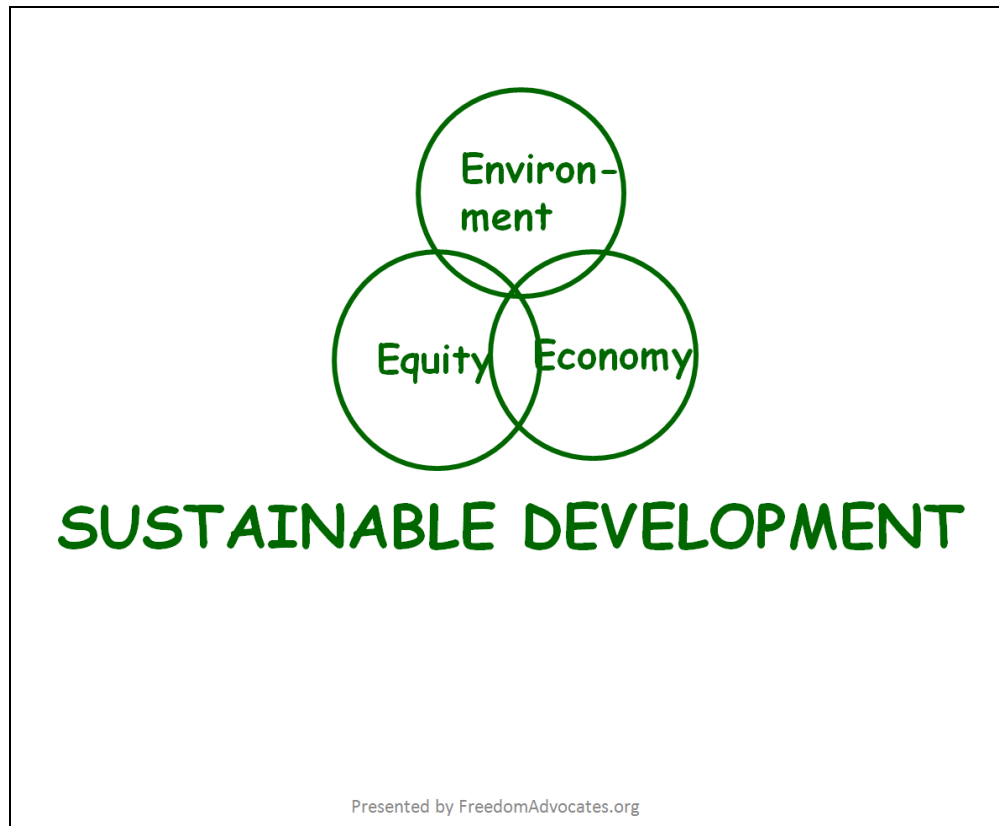

Agenda 21 rarely calls itself by that name. Instead warm and fuzzy terms are used.

The first time the term “Sustainable Development” was used was by Woodrow Wilson while he was President. There is no loss of irony that the man who brought us the Federal Reserve, the income tax, the League of Nations and the war to end all wars would introduce to America the concept, which today, is a synonym for world governance.

Supporters of Agenda 21 use a mantra illustrated by the “Three E” pattern.

The “Three Es” represent a summarization of Agenda 21’s blueprint.

The often repeated Three E concept looks and works like this:

The 3 Es of Sustainable Development

1. Equity

- Use sociology and the law to re-engineer humanity.

2. Economy

- International redistribution of America's wealth.
- Replacement of free enterprise with government/business partnerships.

3. Environment

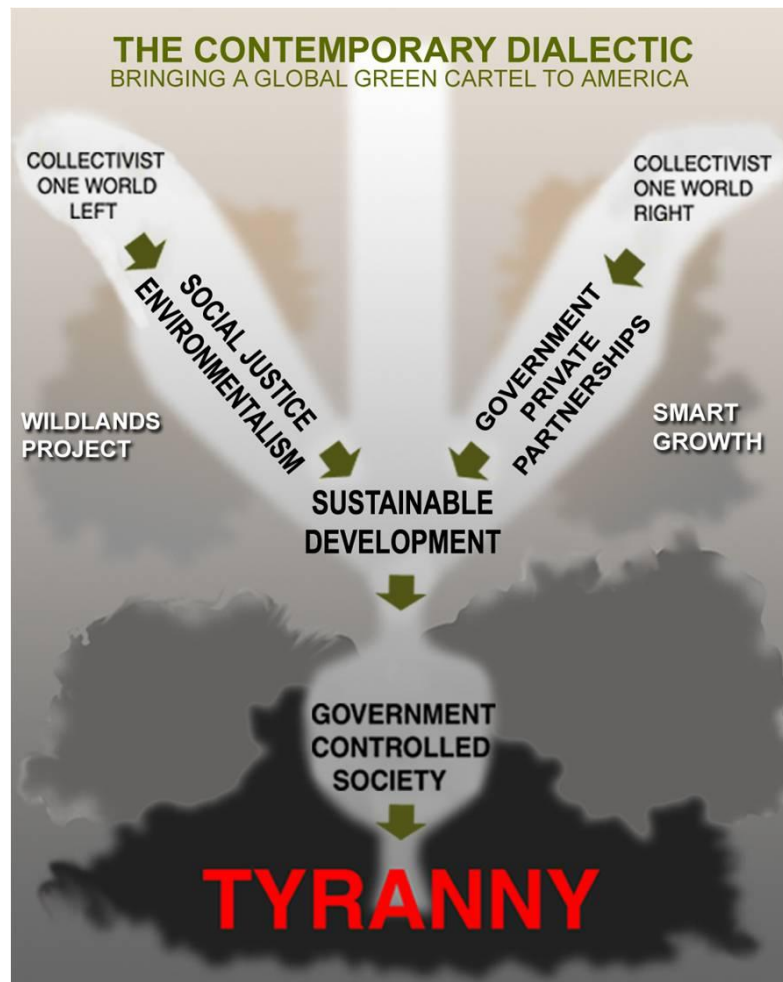

- Nature before man.

The grandest threat posed by globalism is the Agenda 21 Sustainable Development Global to Local 'Action Plan'. This is where the rubber meets the road. This is why the defense of America begins in your neighborhood, hometown and broader local community.

Recognition of this fact will compel ordinary American people to gain control of school boards, fire boards, Sheriff's office, water boards, city councils and Board of County Commissioners.

When Agenda 21 policy has been expunged from every element of the public sphere in a county – that place, and those that follow, will lead America's recovery as the home of the brave and land of the free.

It is important to understand Agenda 21 is not a left vs. right fight.

Our need is to understand how both sides of the contrived political spectrum contribute to the Globalist Action Plan.

Let's contrast the American philosophy of Individual Rights and the Globalist philosophy of community rights.

WHICH PHILOSOPHY OF RIGHTS?

| Nature Source | Individual Rights <i>US Declaration of Independence</i> | Community rights <i>UN Declaration of Human Rights</i> |
|-----------------------|---|--|
| Purpose of Government | <p>Protect the natural or unalienable rights of each individual.</p> <p><i>"That all men are created equal, that they are endowed by their creator with certain unalienable rights ..."</i></p> | <p>Control the individual for the greater good of a global community.</p> <p><i>"Rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations..."</i></p> |
| In short | <p>You're born with rights, government exists to protect them.</p> <p>You and the product of your labor belong to you.</p> | <p>Government grants, restricts, or withdraws your rights according to its needs.</p> <p>You and the product of your labor belong to the community.</p> |

The Judicial system that protects individual rights is based on the principle of freedom called "equal justice". Equal justice supports true diversity – a respect for the independence and unalienable rights of the individual and genuine tolerance for

individuality. Equal justice puts a checkmate on mob rule.

A system of human rights or community rights operates with the pursuit of “social justice”, which can be defined as law formulated to obtain government’s social objectives at the expense of individual liberty.

The Sustainable Development agenda is based on the principle that the collective good is more important than individual rights; this is in direct opposition to the principle of equal justice. Equal Justice is the wonder within mankind’s greatest achievement – the Declaration of Independence.

There are three broad principles that underlie Agenda 21:

- The step by step program for the **abolition of private property.**

- **Education for global citizenship.** Do you think the notion of unalienable rights is presented in today's schools? Take notice of the number of young Sustainablers, many of whom identify themselves as Global Citizens. Universities are building a fifth column for Sustainability – an army of young college graduates.

For even younger people there are the policies and assessments of *No Child Left Behind...* All geared to neuter the next generation's understanding of liberty and of the American experience and experiment.

- The third driving principle of Agenda 21 is: **Control over human action.** For instance, we see technological advances used by government to monitor the individual. We see this happening through federal legislation that would direct biometric identification of you displayed on your state driver's license. We see the advent of cameras everywhere, and of government accessible data bases that have

everything about you that you now think is private.

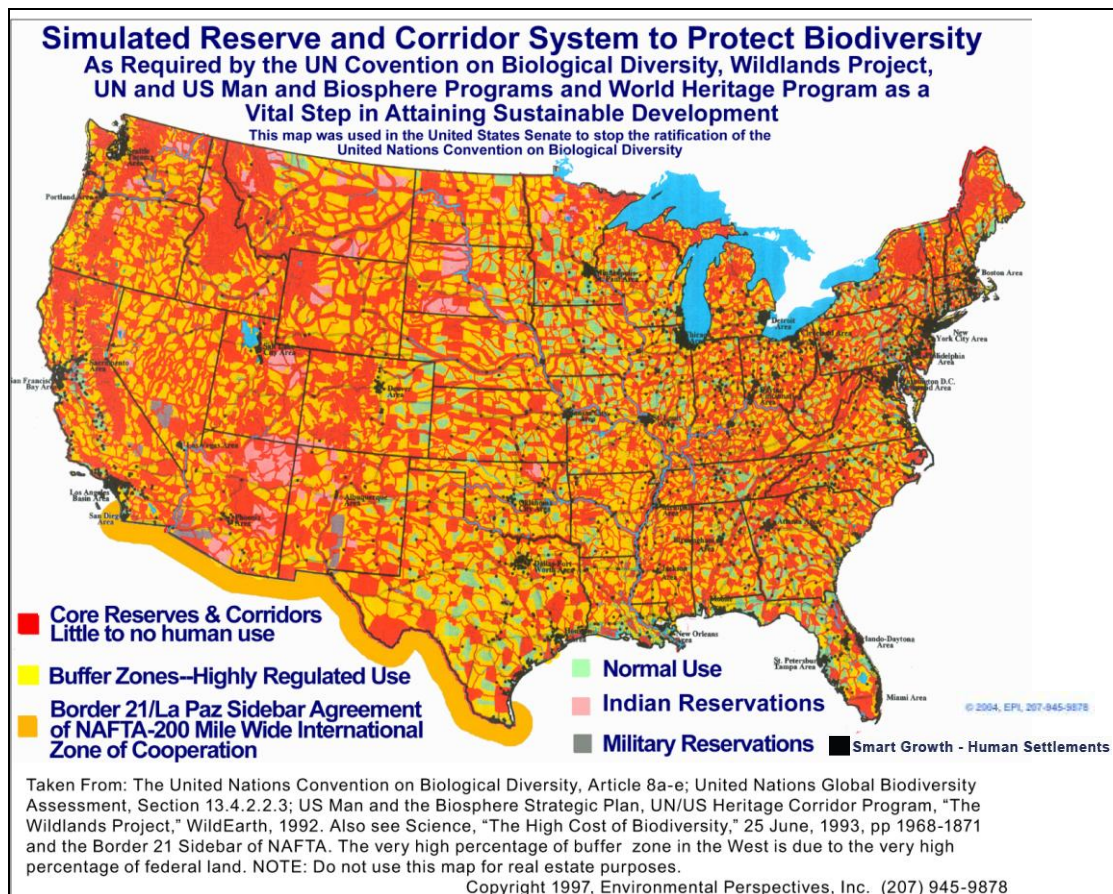

Let me focus my comments on the effort to abolish private property, concerning land.

First, what is private property?

Private property; includes your person, your thoughts and your **relationship** to *something*. By relationship I mean the power to use and enjoy that thing.

Private property can only exist where unalienable rights are recognized. The key is: “All men are created equal, that they are endowed by their creator with certain unalienable rights...” America is the only place where, only if for a brief shining moment, unalienable rights have been politically recognized. Now they are being ignored.

As America implements Agenda 21's two land use programs called Smart Growth and the Wildlands Network, recognition of unalienable rights is obliterated. Let me explain these programs with the help of this map.

To define terms.

“Wildlands”: removal of people and prohibition of resource extraction. These areas are indicated in red.

The yellow areas are buffers to the Wildlands where public private “partners” will engage in limited and controlled activities.

“Smart Growth”: Is the stacking and packing of human beings in dense cities where people will depend on public transportation rather than auto mobility. In the words of a Smart Growth advocate, “It will be the people in cages with the animals roaming freely”. Smart Growth areas (also referred to by the U.N. as Human Settlements) are demonstrated by the black dots.

This web page from *Resource Roundup* is a research tool for citizens. On this page a map created by the Wildlands Network, formally the Wildlands Project, shows the thrust of the Wildland set aside. The Wildlands Network states that it wants to “re-wild” 50% of America, but in actuality it is not about re-wilding (whatever that may mean) but about removing humans from the landscape.

Their Plan for Your Land

This graphic from www.wildlandsproject.org/roomtoroom/connected shows The Wildland Project's (TWP) initial plan for U.S. lands. Arrowed sections would be devoted to large carnivores which would require, of course, the removal of people. TWP wants to 're-wild' 50% of this country. Years ago, this was viewed by most people as a 'pipe dream' and those who exposed it were thought to be paranoid extremists. Today, it is incrementally becoming reality as government acquires lands and stops activities on private lands in the targeted areas and as private landowners unwittingly aid the scheme by selling conservation easements to land trusts.

The graphic above is one of many maps from The Wildlands Project (TWP) website that show TWP's plan for our country. The wide arrowed areas show lands that TWP wants set aside for animals, especially reintroduced large predators. (The prairie lands that such organizations want to dedicate to buffalo are not included in this graphic.) TWP's website has maps for various areas and asserts:

The wide arrowed areas show lands that TWP wants set aside for animals, especially reintroduced large predators. (The prairie lands that such organizations want to dedicate to buffalo are not included in this graphic.) TWP's website has maps for various areas and asserts:

Major ongoing Congressional Breaches of the Constitution include:

Major Constitutional Breaches Undertaken by Congress:

1. Ownership and/or Management of Broad Landscapes

1. Federal ownership and or management of broad landscapes: Implementation of the Wildlands Network is a violation of Article 1 (Legislative Branch) Section 8 (legislative powers) of the U.S. Constitution.

Constitutional authority for land ownership is set out in Article 1 Section 8.

U.S. Constitution: Article 1 Section 8

“To exercise exclusive Legislation in all Cases Whatsoever over such District (not exceeding 10 miles square)...to become seat of the Government of the United States and to exercise like Authority over all Places purchased by the consent of the Legislature of the State in which the same shall be, for the Erection of Forts, Magazines, Arsenals, Dock-Yards and other needful buildings.”

There is no mention of a need or authority for creating the Department of Interior for the creation of massive “Wildlands” zoning anywhere in America!

There is no authorization for the various federal land ownership or contemporary Wildlands bills that have been processed by Congress.

The Constitution was written to protect the unalienable rights of the people not to abrogate them.

Who is Congress working for? There is a war on American ideals and Congress is on the wrong side.

Remember government powers are *granted* under the Constitution – they cannot just be **taken** by a narrow mob, with political front men, seeking power and control over resources. And yet that is exactly what is happening.

Defaulting to federal authority in the area of land and resource management is a huge mistake. Government parks should be determined and owned by states and or local governments. There is no federal authority for the ownership and management of parks and the resources they hold.

A second Congressional breach of Constitutional responsibilities is:

Major Constitutional Breaches Undertaken by Congress:

1. Ownership and/or Management of Broad Landscapes
2. Delegation of Trade Policy to International institutions

2. Delegation of trade policy to international institutions.

Congress has delegated authority over U.S. trade policy to the World Trade Organization and to various multi lateral trade pact organizations. This necessarily comes at the expense of sovereignty. The effects of surrendering trade policy control include:

- A disintegrating border; Example: NAFTA agreement – 124 mile or 200 kilometer wide “International Zone of Cooperation” along the southern border.
- Constitutional taxing authority (Article 1 Section 9) becomes neutered. The Constitutionally intended form of taxation known as indirect taxation consists primarily of import and excise duties that are lost to the World Trade Organization’s so-called “free trade” requirements. It is not free trade that is being established; it is a managed global trade control exercised over America. This policy is designed to economically equalize nations in accordance with the *Earth Charter* mandate to equalize wealth within and between nations.
- American Industries are lost to the Globalization process.

- Average American earner wages are reduced toward global norms.
- Multinational Corporations profit from cheap, often slave, labor from overseas. A massive profit arrangement is protected by the World Bank from American duties.

Domestic production is sacrificed. And America sinks.

The Designs of:
Globalist Managed 'Free Trade'

1. Multinational Corporate Control in Partnership with World Government Agencies
2. Redistribute America's Wealth
3. Neuter American Sovereignty

The modern trade regime results in manufacturing job losses starting with a shuttling of resource extraction activity. The consequence has been: production leaves the U.S.; finished goods are then imported, often from slave labor nations, always concentrating wealth into the hands of global business partners of prospective world government while draining American capital.

Prince Charles established the Sustainable Business Council with major multinational businesses.

Globalist corporate coordination has occurred.

American trade policy must again become American made. America cannot surrender its trade making power and remain a sovereign nation.

American involvement in the World Trade Organization is designed to destroy the Nation.

The Sustainable problem is more than green.

Major Constitutional Breaches Undertaken by Congress:

1. Ownership and/or Management of Broad Landscapes
2. Delegation of Trade Policy to International institutions
3. Delegation of Monetary Authority

3. Another Congressional long standing abrogation of their Constitutional responsibilities is the delegation of its monetary responsibilities to a globalist system of central banks resulting in the loss of a constitutional and honest monetary system.

This is another Congressional breach of Article 1 Section 8: This time it regards the establishment and maintenance of Central Banking within a world system of Central Banking – the indispensable ingredient for creating World Government.

Congress has **NO** authority to delegate an exclusive monetary system authority to a third party. That is what happens when a Central Bank like the Federal Reserve is formed. This accounts for, at least, the financial aspect of the dilemma we face.

The existence of Central Banks, like the Federal Reserve, allows for the printing of the money necessary to fund the globalist movement while accounting for its creation as debt owing from us. The monetary system is designed to cause a financial collapse which allows opportunity to further consolidate and strengthen globalist power.

America will need a new monetary system. Today we must understand this issue if we are to avoid becoming trapped in an arranged future that has little regard for human life.

The collapse of the monetary system appears to be in process now.

Let's observe two facts:

- A pattern begins to take form. The federal government has become an outpost of globalist authority. *Now* the real muscle is being applied where it counts – *in **your** community*.
- Now we have a place where we can effectively fight and defeat the grandest assault on Liberty where it matters most – in your hometown!

As government prohibits resource extraction on much of the American landscape, America has become dependent on other countries for most everything. This causes the interdependency designed to lead us to a world government.

Let us set our sights:

We need to recover our ability to use our resources.

To achieve this:

We need to cause federal land to become private property or state lands;

We need to reestablish an American centered trade policy; and

We must abolish the current fiat monetary system.

American people's goal must be: To recapture the federal government. How do we do that? Not easily. To get there the battle we can and must win soon is the Local battle.

Win back your town or neighborhood from Agenda 21's policies then move on to the broader area. Ultimately combine with others working similarly around your state. Then kick Sustainable Development policy out of Florida's law and out of your bureaucracy.

When enough states have recaptured their citizens' liberty the federal government can be taken on effectively. Then we will have salvaged the American experiment in individual liberty and equal justice including *political recognition* of every individual's unalienable rights. Long live the United States!

As Congress conjures up what they call a 'living Constitution', the pros in Washington D.C. are selling out America. We don't have all that much time.

Remember when American youth were taught that it was a good thing that power was not centralized and coordinated? Oh, I wish it were that way!

- It needs to *become* that way!
- Restore the American Republic not a 15th Century landscape!
- Expose Sustainable Development.

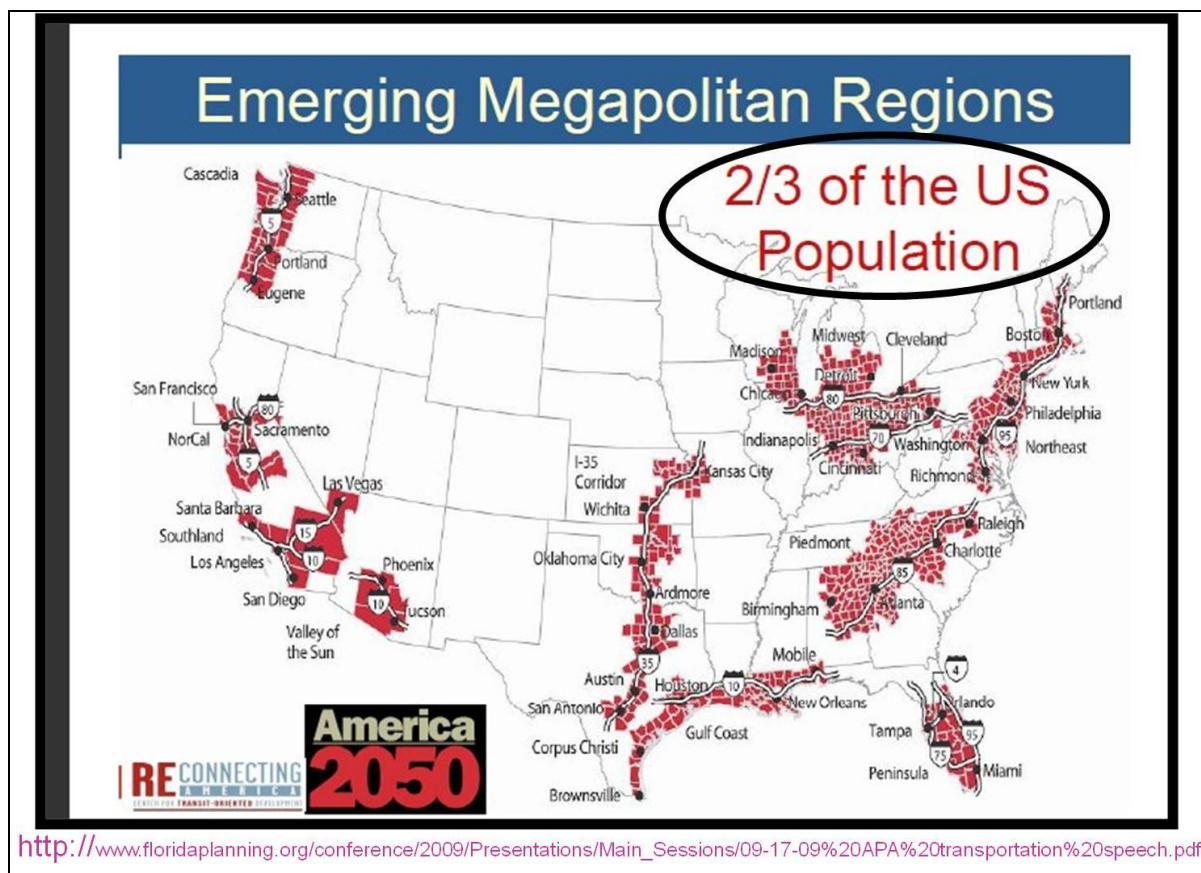

Let's attack the root of the problem:

- Learn to recognize the local and broader patterns and tenants of Agenda 21. This way you can fight back with insight, starting where the attack all around you is happening and where you can win – at the local level.

The Globalist invasion is happening right under our noses. Every county in America has its local Agenda 21 implementation underway.

Florida's Mega Region

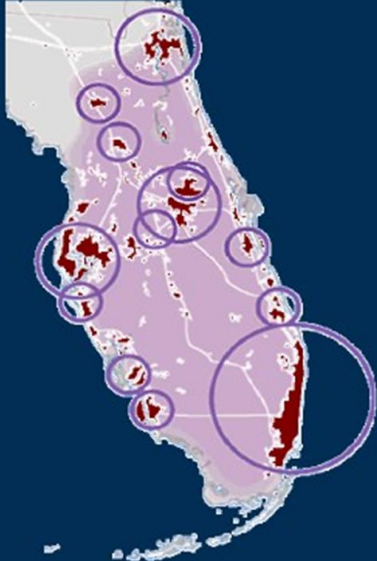

America 2050 wants to shape the infrastructure of the United States based on the concepts of environmental sustainability and social equity to serve the emergence of a global economy.

http://www.floridaplanning.org/conference/2009/Presentations/Main_Sessions/09-17-09%20APA%20transportation%20speech.pdf

Florida has a well developed Globalist Plan. Florida is one of the American Planning Association's "Mega Regions". This Mega Region is designed to be comprised of Smart Growth built along transportation corridors. These corridors will be multi-modals for trucks, trains and passengers.

Florida Megaregion

The map shows the state of Florida with several red-shaded areas representing transportation corridors. These corridors are connected by a network of lines. Key areas are highlighted with purple circles: Central Florida, Tampa Bay, South Florida, and North Central Florida.

Let's examine aspects of the 'Local Action' Plan.

ICLEI

This is the most vulnerable globalist organization operating in America today.

ICLEI is the international environmental agency for local governments.

ICLEI's mission is to build and serve a worldwide movement of local governments to achieve tangible improvements in global environmental and sustainable development conditions through cumulative local actions.

The full name of ICLEI is “The International Council for Local Environmental Initiatives”. It is also called “Local Governments for Sustainability”.

ICLEI is an important NGO that:

- Closely ties policy to man-made Global Warming and climate change.
- Has formed an international Congress filled with city and county representatives. This Congress acts as a shadow World Government.
- Directs Community Development and other local agencies and provides statutory and regulatory provisions that implement Sustainable policy locally.

Local tax funds pay the contract fee. Agenda 21 policy-making is fully embedded upon ICLEI’s arrival. At least 600 cities, including Bloomberg led New York City, from all across the nation, have ICLEI contracts. Local governments have been hijacked by world government agents.

Each ICLEI city's influence is expanded as ICLEI then automatically steers Regional Air, Transportation, Water Boards and many other "regional" transformational governance apparatus such as the *Withlacoochee Regional Planning Council*.

Article 1 Section 10 of the U.S. Constitution makes the following prohibition: "No state shall enter into any Treaty, Alliance or Confederation" with a foreign political entity. Neither may a city. Ask: Is it treasonous for city leaders to contract with ICLEI an International NGO and U.N. related organization? Yes! ICLEI contracts are treasonous.

<http://www.icleiusa.org/about-iclei/members/member-list>

Contracts with ICLEI guarantee implementation of international political and economic policy at the local level. Drive city alliances with ICLEI out of the communities surrounding you.

And ask: “Where’s your Sheriff?” It is time for good Sheriffs to take action! Ridding towns of ICLEI is more important to the future of America than was the Sheriff’s role in ridding the west of rustlers and train robbers! If Sheriffs are America’s last hope, we need Sheriffs to start Kicking ICLEI Out of communities. City

attorneys and County Counsel's offices also have a role to play. Their duty *is* as a fiduciary to you. Failure to protect you from ICLEI breaches their fiduciary duty and makes them liable to citizens.

So much of the Agenda 21 invasion at the local level relies on the man-made global warming fraud. But the unraveling of this masquerade is only beginning to hit the local political scene. ICLEI is particularly vulnerable because of general public awareness concerning the 'man-made warming' fraud relied upon by ICLEI as an excuse for directing local policy. For several reasons citizens need to react to ICLEI soon! Now *is* the time.

Residents in Spokane Washington and various cities in the Colorado plains are taking on their city's contract and contract with ICLEI. County Commissioners in Carroll County, Maryland have kicked ICLEI out. Other localized rebellions brew. You can do this too. We are following the *Kick ICLEI Out!*, campaign at FreedomAdvocates.org.

I am now going to sample the Ocala area and pull examples of Agenda 21 Sustainable Development as it routinely pops up on the local scene. Most hometown participants think they are doing something unique, others think they are doing something for mankind – well – they are. They are putting mankind on the verge of serfdom.

You can recognize globalism operating at the local level by recognizing the themes and programs presented by the local Action network and understanding that network in the context of Agenda 21.

Let's start by viewing a local regional council. The *Withlacoochee Regional Planning Council* is a soviet style council that develops policy that is then rubber-stamped by elected officials, with no meaningful public oversight. The Council is an extra constitutional level of government that advances globalist objectives.

A banner for the Withlacoochee Regional Planning Council. On the left is a map of the region with a red arrow pointing to Marion County. The text on the banner reads: "WITHLACOOCHEE REGIONAL PLANNING COUNCIL", "Proudly Serving Citrus, Hernando, Levy, Marion, and Sumter Counties in Central and West Central Florida Since 1973", "RONALD ALLEN, CHAIR", and "MICHAEL R. MOEHLMAN, EXECUTIVE DIRECTOR". Below this are five buttons: "BOARD OF DIRECTORS", "GENERAL INFORMATION", "CALENDAR OF EVENTS", "MAP TO OFFICE", and "STRATEGIC POLICY PLAN".

STRATEGIC REGIONAL POLICY PLAN

The required strategic regional subject areas include **affordable housing, economic development, emergency preparedness, natural resources of regional significance, and regional transportation...**

The SRPP for the Withlacoochee Region is a long range guide for the **physical, economic, and social development** of the Region which identifies **regional goals and policies...**

<http://www.wrpc.cc/strategicpolicyplan.asp>

In short, the *Withlacoochee Regional Planning Council* exists: to advance the globalist goals of regionalizing, to implement a step by step approach to the abolition of private property, to promote the relocation of people from Wildlands and corridor areas to Smart

Growth areas, and for the conscription of public private partners – the mandatory volunteers of the new fifth column.

Regionalism practiced by the *Withlacoochee Regional Planning Council* has birthed and administered the Florida Wildlands and Smart Growth policies including the environmental, economic, and transportation strategy for the 5-county Central and West Central Florida area that includes Ocala. The *Withlacoochee Regional Planning Council* is a prototypical Agenda 21 soviet council.

What does “Soviet” mean?

- A soviet is a system of councils that report to an apex council and implement a predetermined outcome, affecting a region or neighborhood often arranged through a process of facilitated consensus.
- Members of a soviet council are chosen by virtue of their willingness to comply with that outcome and their one-mindedness with the group.
- Soviets are the operating mechanism of a government-controlled economy, whether it be socialism or public/private partnerships.

The scary part is that organizations like this are everywhere. But the battle ground is always local.

Regionalism is the watchword. It is a core aspect of Sustainable Development. Regionalism might sound benign, but the consequences that come as a result of political regionalism must be understood by freedom loving people or liberty will be trampled. Regionalism is being used to destroy traditional boundaries and usher in a transformed system of governance that abolishes private property; the direct goal of Sustainable Development Agenda 21.

In the words of Charlotte Iserbyt former Department of Education Official, “Regionalism is Communism”. Regionalism is also Fascism. It erases political boundaries and thus representative government. Regional governance cannot coexist with a Republican form of government. We can account for much that is wrong today to organizations such as the *Withlacoochee Regional Planning Council*.

The purpose of regionalism is to consolidate (“collaboration”) the global and regional effort to conspire against the idea of private property. They do this, in part, by advocating and establishing a system of

“partners” who will cooperate with the new order. Often these people are present landowners. Of course the “partnership” has one way authority for most participants. The table will be shrunk once the collaboration consolidates. Such is the change or transformation that is taking place today.

The Florida Earth Foundation (FEF) partners to “create a sustainable future for Florida”.

The banner features a landscape with a blue sky, a yellow field, and a red sun. On the left, there is a small graphic of a tree and a book. The text "FLORIDA EARTH FOUNDATION" is centered in white capital letters.

**The Florida Earth Foundation (FEF),
a *public-private partnership* with over 70 agency,
university, industry and nonprofit partners,
launched a multi-year initiative that invited
Floridians to be a part of visioning what Florida will
look like in the next 50 years
and *empowering people in creating a sustainable
future for Florida...***

The American Planning Association's Florida Chapter implements Agenda 21. No surprise here. The APA is a U.N. accredited NGO. The APA advances Agenda 21 in every state.

You can bet on that! These “other organizations” are the vast globalist 5th column!

Another NGO promoting sustainable development in Florida, the *Florida House Institute for Sustainable Development* has developed a Toolkit for Sustainable Development, “A Framework for Vision-Based Planning”.

A Toolkit for Sustainable Development.

A Framework for Vision-Based Planning

A Toolkit for Sustainable Development.

A Framework for Vision-Based Planning

The Florida House Institute for Sustainable Development is a non-profit organization that works to build civic capacity around a practice of **vision-centered, place-based** planning for a **sustainable future**. We view **sustainable development** as a process of **continuous improvement** where each new project in a place is measured by its contribution to the desired future.

Our Mission:

To **facilitate change** for a **sustainable future** by partnering with others to create a practice of **sustainable community development** and a learning network of organizations and communities similarly engaged. In addition to practice in our home community, the Institute provides **consulting, facilitation and implementation support** for **neighborhoods, local governments, private developers, and community organizations and initiatives** involved in **sustainable community development**.

<http://www.i4sd.org/about.htm>

The pictures are so nice, the simple expression of the words so innocent sounding... Beware. Does the *Institute for Sustainable Development* support the sustainable principle that population be reduced by 85%? In the end Sustainable Development is the Action plan designed to lead to a massive reduction in human population by proof of their published documents.

The Wildlands Network in action in Florida:

The screenshot shows the Florida Department of Environmental Protection (DEP) website. The header features the Florida DEP logo and navigation links: DEP Home, About DEP, Programs, Contact, Site Map, and a small 'S' icon. Below the header is a banner image with various nature scenes. A navigation bar below the banner has 'sources for:' on the left, 'Florida Forever' in the center, and 'Highlights' on the right. The main content area contains the following text:

Florida Forever replaces **Preservation 2000 (P2000)**, the **largest public land acquisition** program of its kind in the United States

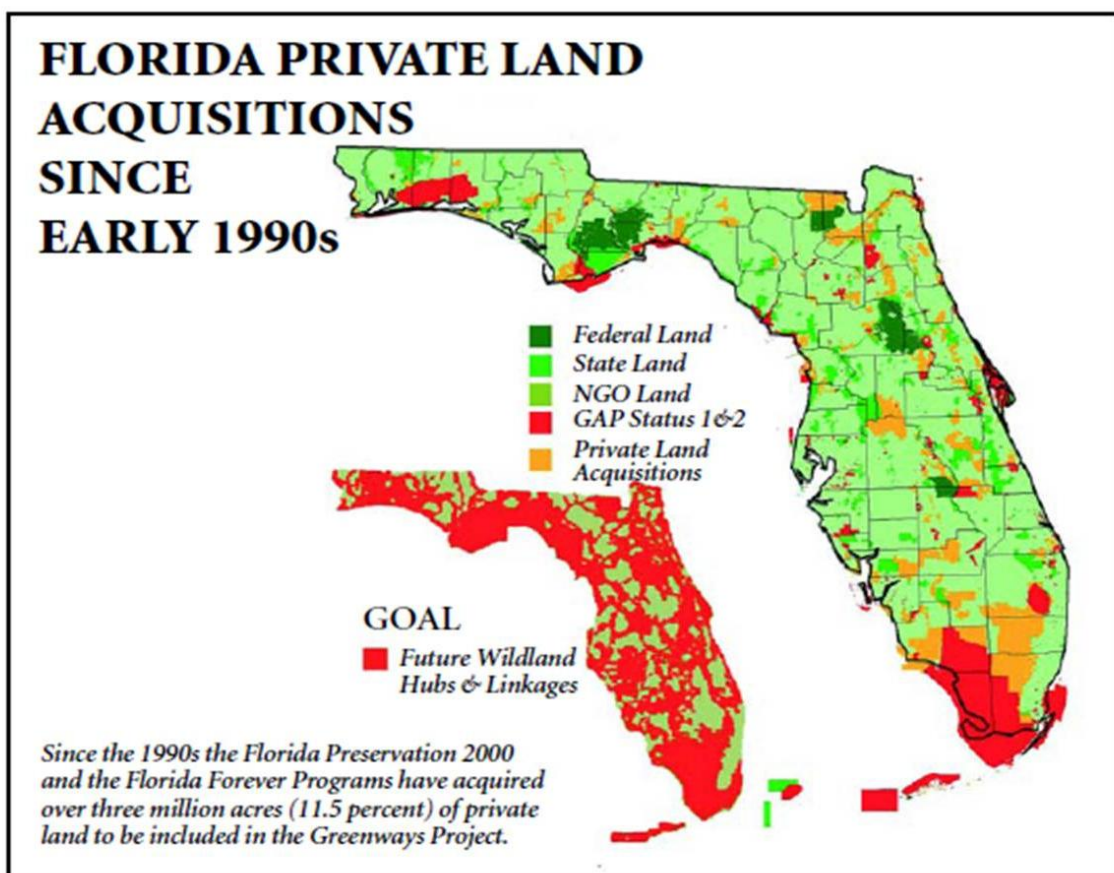

Florida Forever - more than two million acres of valuable lands have been preserved, protecting habitat for 190 native and endangered animals and plants, while restoring ecosystems throughout the state.

Between its inception in July 2001 to the present, the *Florida Forever* program has acquired more than 650,000 acres of land with \$2.73 billion.

http://www.dep.state.fl.us/lands/fl_forever.htm

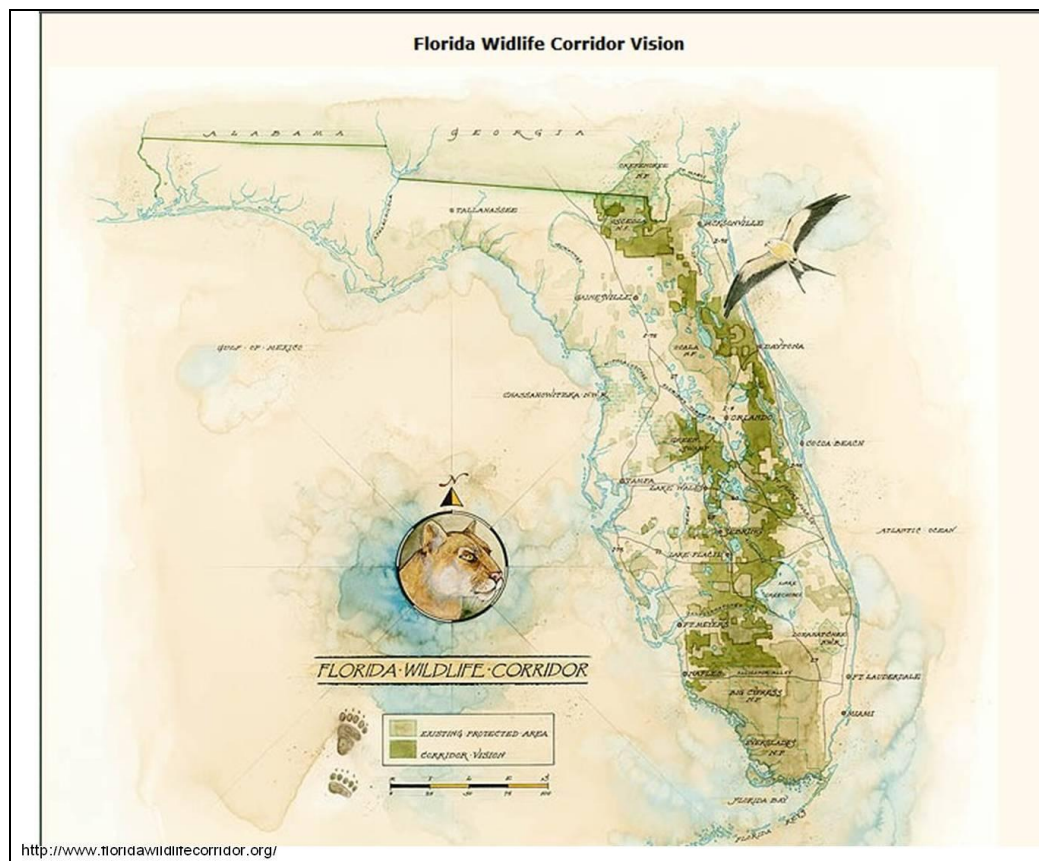

Since the 1990s the Florida Preservation 2000 and the Florida Forever Programs have acquired over three million acres of private land to be included in the Greenways Project.

Florida Wildlands Map

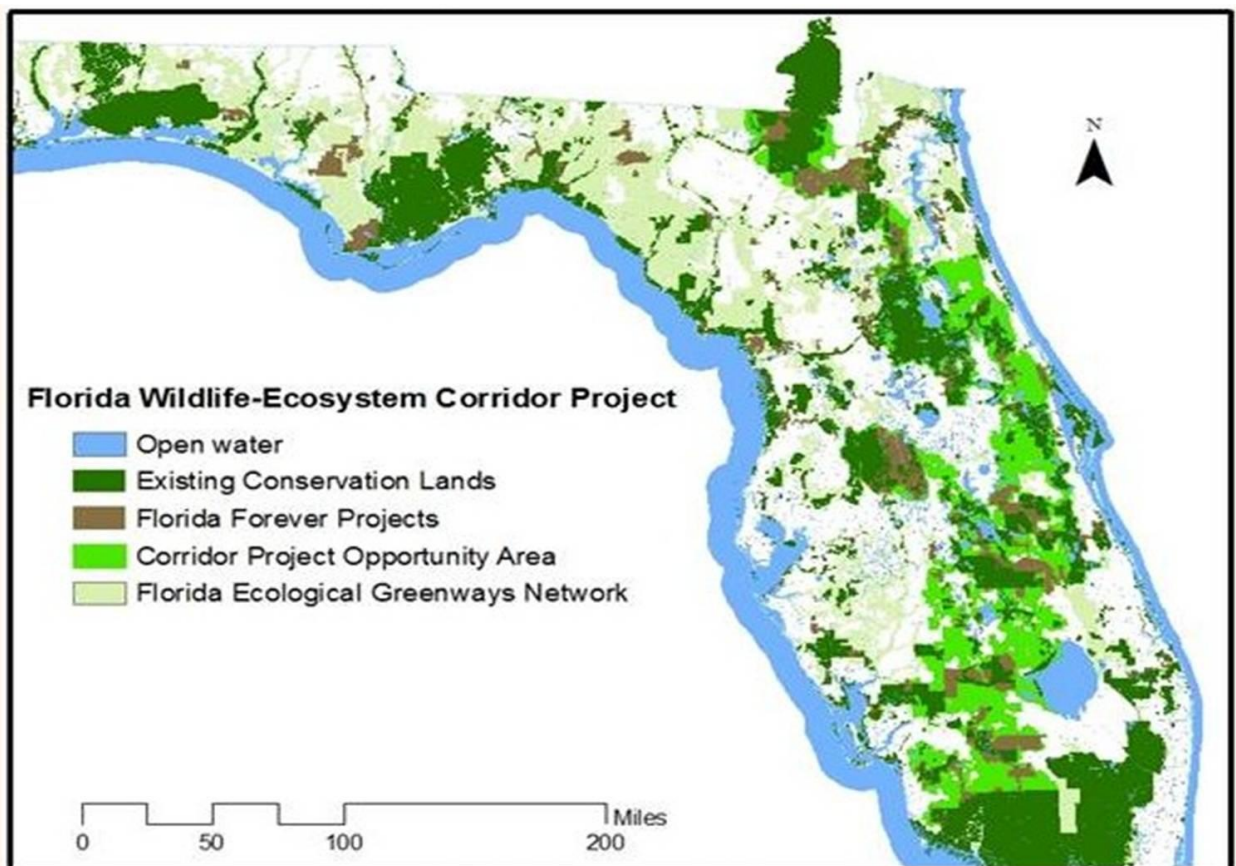

<http://www.ccfassociation.org/coffman05.pdf>

The “Florida Wildlife Corridor” project was established on Earth Day April 22, 2010 as a vision to connect, protect and restore natural ecosystems between the Everglades and Georgia. The Florida Ecological Greenways Network identifies several priority landscape connections throughout the state, including the *Ocala to Osceola greenway (O2O)* and the *Fisheating Creek to Ocala greenway*. These greenway projects have been combined with proposed landscape connections south toward the Everglades to form the vision for a cohesive peninsular corridor.

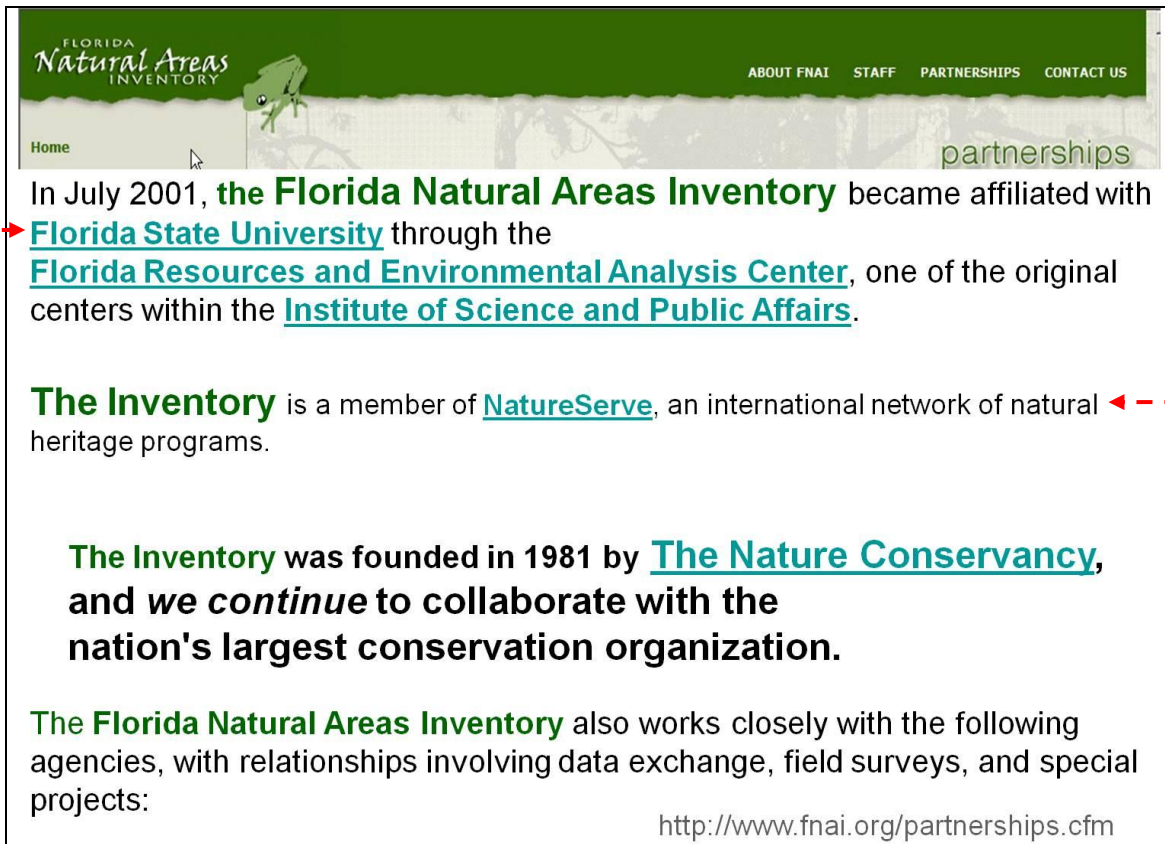

The graphic below shows the final draft vision map for the Florida Wildlife Corridor initiative, which is intended to publicize the need for a functionally connected set of public and private conservation lands from the Everglades to Okefenokee. (Open waters are included.)

http://www.linc.us/FloridaWidlifeCorridor_Info.html

The “Florida Natural Areas Inventory” was founded in 1981 by *The Nature Conservancy*. The Nature Conservancy is the world’s largest landowner. It is an NGO. The corrupt nature of The Nature Conservancy was exposed in *The Washington Post’s* explosive 2006 investigation. The fact is that The Nature Conservancy is a perfect partner for government when the goal is to control humanity by centralizing control over resources.

The screenshot shows the Florida Natural Areas Inventory website. The header is green with the logo on the left and navigation links (ABOUT FNAI, STAFF, PARTNERSHIPS, CONTACT US) on the right. Below the header is a banner with a frog illustration and the word 'partnerships' on the right. The main content area has a 'Home' link on the left. The text describes the inventory's affiliation with Florida State University and its membership in NatureServe. It also mentions its founding by The Nature Conservancy and lists its collaborative agencies.

Ocala 2035 Vision – the program for the city of Ocala.

Welcome to the
City of Ocala

Florida

Ocala 2035 Vision

The Vision provides guidance for the future design,
use and connectivity of the community's streets;
the relationship of its buildings to those streets and how the buildings
and streets best serve the community's **pedestrians**;

This long term vision will be based upon **community consensus**,
including numerous public meetings and a
citizen Leadership Group, **to ensure its implementation over time.**

<http://www.ocala2035vision.org/default.asp>

Santa Cruz has a citizenship leadership group.
Globalism is cooking cutting America in its “visioning”
image!

As human beings are barred from rural land there will be a concentration of human activity in urban areas and the promotion of extremely dense development.

http://www.ocala2035vision.org/pdf/CityCouncilPresentation_5-18-10.pdf

**PLANNING STRATEGIES
ADAPTIVE REUSE**

Fast food restaurant transformed into mixed use oriented to the street with a pedestrian scale.

Ocala 2035 Vision

Galina Tahchieva from Dwell Magazine

**PLANNING STRATEGIES
ADAPTIVE REUSE**

Strip retail transformed into a mixed use with an orientation to the street, a pedestrian plaza and a transit stop.

http://www.ocala2035vision.org/pdf/CityCouncilPresentation_5-18-10.pdf

Expansion and repurposing of strip center with multi-story wings and public plaza

What that means is that we are to live in tightly controlled environments, with high density, without autos and subject to “smart” system monitoring.

A Million Smart Meters for Miami
Miami will spend an estimated **\$200 million** on an ambitious smart grid project to insert smart meters in every building and residence in the city.

A close-up photograph of a gloved hand holding a circular smart meter. The meter has a digital display showing '00000' and the text 'SmartMeter' and 'STAVELAND'.

... that under the Energy Smart Miami plant, funded in part by federal stimulus dollars, ... Later, FPL **will spend \$500 million** more to bring smart meters to the rest of its four million plus customer base. The companies lined up on the project include General Electric and Silver Spring Networks, two of the more familiar names in smart grid, as well as: Cisco.

<http://www.greentechmedia.com/articles/read/a-million-smart-meters-for-miami1-6062/>

Planned Communities = “Smart Growth”; the stacking and packing of human beings in dense cities where people depend on public transportation rather than auto mobility.

Imagine communities surrounded by Wildlands, where human action is monitored and controlled and where new world human settlements or Smart Growth patterns are connected by public transportation corridors.

Vision: Humans as livestock...

The youth are being prepped for Global Citizenship and the effort is working.

In polling we learned that last year a majority of 2009 high school and college grads identify themselves as “global citizens” not as Americans. Sustainability is being jammed down every youngster’s throat. The future is at risk.

The Green Schools Challenge

Dream in Green believes that schools and youth play a critical role in transitioning towards a more sustainable society.

Helping schools measure reductions in their carbon footprint...

Visit Us

Home of the...

A unique program for educating K-12 students about environmental and energy challenges by getting them involved in real world solutions that reduce energy consumption, waste and greenhouse gas emissions.

The Green Schools Challenge involves students and staff directly in designing and implementing environmental and energy solutions at their schools.

So much of the globalist invasion at the local level relies on the man-made global warming fraud. The unraveling of this masquerade has not yet hit the local political scene. People across America need to realize that the man-made global warming charade is being used to drive local policy to usher in globalism in transition from the American way.

The screenshot shows the top portion of the ICLEI Global website. The header features the ICLEI logo (I.C.L.E.I. with dots) and the tagline "Local Governments for Sustainability". To the right, it says "ICLEI Worldwide | Member login". Below the header is a banner image showing a group of people and a green bus. A navigation menu is located below the banner, with links: Home, About ICLEI, Members, Supporters, Programs, Services, News & Events, and Contact Us. The word "Home" is also visible on the left side of the banner image.

Cities Climate Registry –
the *global reporting service for cities'* climate action

The cCCR is operated by carbonn, the Bonn Center for **Local Climate Action and Reporting**, which was launched by **ICLEI** and the **United Nations Environment Programme (UNEP)**

One of the hottest negotiation topics between national governments at the UN Climate Talks is how to **track** national governments' climate action in a **measurable, reportable** and **verifiable** way. The cCCR satisfies this need for **local governments**.

http://www.worldmayorsagreement.com/index.php?id=1487&tx_ttnews%5Btt_news%5D=4557&tx_ttnews%5BbackPid%5D=983&cHash=91d5745533

The carbonn Cities Climate Registry (cCCR) has been developed with support from ICLEI.

Carbonn Cities Climate Registry

Under the auspices of the [World Mayors Council](#) on Climate Change and with the endorsement of [United Cities](#) and [Local Governments](#) and [Club of Madrid](#), the carbonn Cities Climate Registry (cCCR) has been developed with support from [ICLEI – Local Governments for Sustainability](#) and Government of Mexico City.

The cCCR will be operated by the Bonn Center for **Local Climate Action and Reporting** – carbonn.

<http://www.wmsc2010.org/carbonn-cities/>

ICLEI and The Climate Registry Partner to Track Rigorous GHG Emissions Accounting for Local Governments

Organizations launch initiatives to encourage use of Local Government Operations Protocol to track and report climate action progress

(December 2, 2008 – Los Angeles and Oakland, CA) ICLEI – Local Governments for Sustainability, USA and The Climate Registry announced a new partnership to jointly promote responsible greenhouse gas (GHG) emissions accounting by local governments in North America.

Through this new partnership, the two organizations will launch initiatives to encourage local governments to use the highest standards of the Local Government Operations Protocol and report their emissions as members of The Climate Registry. By becoming members of both The Climate Registry and ICLEI, local governments will have access to the organizations' comprehensive support for building emissions inventories.

<http://www.theclimateregistry.org/downloads/press/iclei-the-climate-registry-120208.pdf>

Florida has 77 Cool Mayors listed in their Climate Change Campaign. These elected officials give their support to ICLEI global warming policy. These people need to be voted out of office.

 **Serve to Preserve**

A commitment to protecting Florida's air, water and natural resources against the damage of greenhouse gas emissions

Last year, Governor Charlie Crist set a New direction for Florida's energy future by signing a groundbreaking set of **Executive Orders** during the *Serve to Preserve* Florida Summit on Global Climate Change...

Governor Crist appointed an **Action Team** on Energy and Climate Change. Florida formed a **partnership with the United Kingdom** and outlined action items to support the climate control policies of each partner and work towards the rapid transition to a global low carbon economy.

http://myfloridaclimate.com/leading_by_example

Serve to Preserve serves to revoke Article 1 Section 10 of the U.S. Constitution. You may have changed governors, but *Serve to Preserve* continues.

Programs like “Serve to Preserve” and ICLEI’s climate change “Best Practices” account for the federal government’s financial condition. States and municipalities also commit massive resources to the climate policy commitments that fuel the Globalist transformation.

Our response needs to be: Understand and recognize Sustainable Development locally and spread that understanding to others. We are not going to be salvaged by any existent political organization. Average Americans must understand and act to restore their area as the land of the free. There is no profit or power in Sustainable Development’s exposure. There is only freedom for you, and me... and our children.

Consider what has been illustrated here today –
Regionalism, The Wildlands Network, Smart Growth,
Public Private Partnerships, Sustainable ideology, and
Education for Global Citizenship.

Agenda 21 people are organized even as their active
drones don't know what they are organized around.
Agenda 21 shows itself everywhere you look.

Do you think our politicians and bureaucrats are serving
us?

America has been “being transformed” for decades. Today the pace has increased. And the transformation objective becomes clear: “Globalism”.

A thousand points of Globalist darkness are descending upon us. If we understand Agenda 21’s Action Plan, then we can restore Liberty without fighting a thousand battles. Cut off Agenda 21 Sustainable Development at its head; *Defeat local implementation of Agenda 21!*

What happens if people do nothing?

America becomes the *land of the collected* and *home of the enslaved*.

Your “region” will be a local outpost coordinated to control and depopulate humans.

Oh Boy!

What can you do?

Think Locally! That is where freedom will be won or lost.

Here are 6 suggestions:

- 1) Recognize and resist the trend to replace local political boundaries with “regional governance”. Recognize that this form of government leads to a breakdown of accountability to the citizenry.

- 2) Refuse local government receipt of federal or state money for new Sustainable Development programs because they breach the American system of federalism, and raid the treasury. Withdraw from established Sustainable Development programs.
- 3) Avoid local government partnerships with the federal government, NGOs, foundations, and corporations that advance the anti-liberty Sustainable Development agenda. Do not surrender your town or county to the insider privilege of Sustainable Developers and their moneyed interests.
- 4) Understand and enforce the role of public officials in your community to administer government in a manner that protects individual liberty and ensures equal justice.
- 5) Know and understand the Constitution, to which elected officials swore an oath with particular

attention to Article 1, Section 8, the 9th and 10th Amendments, which address the limitations on federal power, and the 14th Amendment, which limits the states' police power.

6) Kick ICLEI out of the town nearest you. Visit FreedomAdvocates.org to study: the *ICLEI Primer*, The Consensus Process and Agenda 21.

Expose ICLEI's traitorous activities.

Inform and motivate residents in local cities named earlier to take on their city leaders. Counter-action to ICLEI is, I believe, the 21st century 'shot to be heard round the world'.

Wouldn't it be personally satisfying if your town or county joined the growing bandwagon that is Kicking ICLEI Out? This is what the public must accomplish to recapture our country and way of life. Always remain committed to the essence of the mission:

To restore the principles set forth in the Declaration of Independence.

The outcome of the second war for independence can only be won by understanding the nature of the infiltration we are experiencing. Guns will not win this war. Knowledge, commitment and engagement will. If we can't win that kind of war we cannot expect, nor will we, nor our descendants, be – free.

America urgently requires a new political direction with new political majorities. And we need that soon! The good news is that places in a number of states have begun that process. Make sure that your community gets on track.

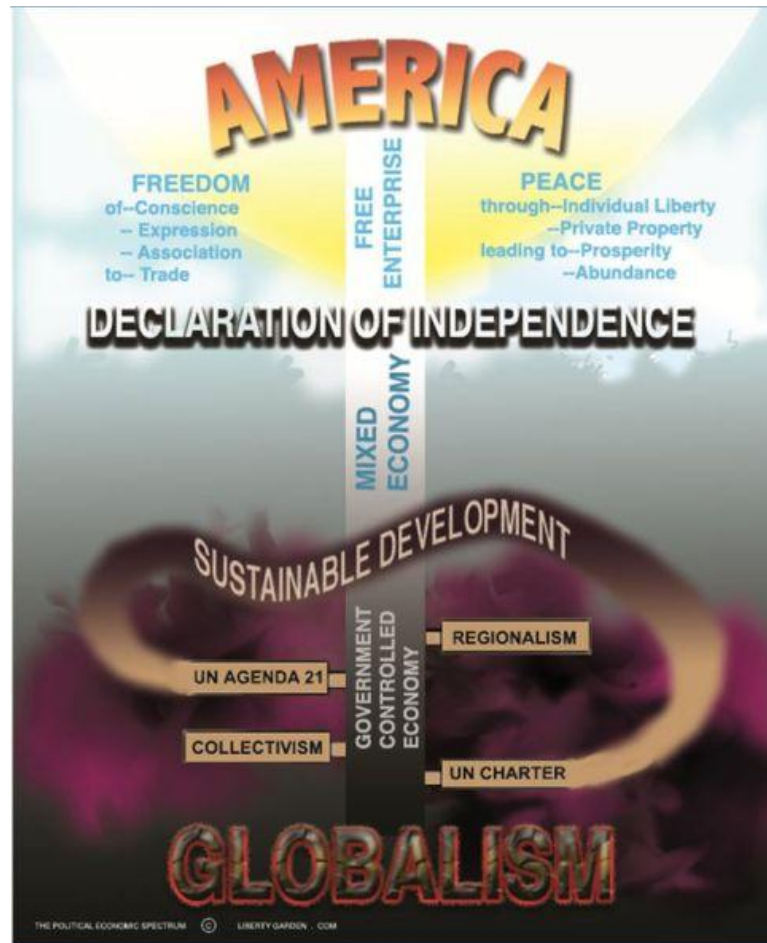

If communities recover their town and county government – including freeing yourself from Regionalism – states can demand restoration of the American system of federalism. Only then we will be truly capable of regaining control of the federal government.

Do not look for today's federal crop of Democrats and Republicans to take us anywhere but down the path to globalism.

The federal government is where the transformation is coming from. Today it has flowed into locales everywhere including here. So, take counter-action locally. Local pro-action is our best strategy to stave off world government at this late date.

The modern war is between Globalism vs. America.

Let me show an illustration that captures the contrast between America and Globalism:

I contend that the dynamics of Liberty vs. Tyranny or America vs. Globalism reflects the true political spectrum. One that measures good v evil, reason v nonsense, and a view of humanity as made in the image and likeness of God and not as chattel of ruling elite.

A left/right spectrum is contrived to produce confusion and false battles, it is designed to deliver to us all a transformation of America into an outpost of the sustainable one world tyranny.

Only by **winning** the local war undertaken by the globalist machinery, brought against the independence of this country and the independence of the individual, can we earn a second coming of America, *the land of the brave and home of the free*.

Good Fortune to each of you engaged in renewing the American experience and May God Bless the United States.
